```
apt install apache2 mariadb-server
```

Activer le module rewrite d'apache2

```
a2enmod rewrite
```

```
systemctl restart apache2
```

Ajout du dépôt PHP 8.1

```
apt install software-properties-common apt-transport-https curl -y
```

```
curl -sSL https://packages.sury.org/php/README.txt | bash -x
```

```
apt update && apt upgrade -y
```

Installation de PHP 8.1 en plus des extensions requises par PrestaShop

```
apt install php8.1
```

```
apt install php8.1-simplexml php8.1-zip php8.1-curl php8.1-gd php8.1-pdo php8.1-intl php8.1-mysql  
php8.1-mbstring
```

```
systemctl reload apache2
```

1.3 Création de la BDD

mariadb-secure-installation

Répondre aux questions :

unix_socket → n

Définit le mdp root de mariadb → y

Remove anonymous user → y

Disallow root login → y

Remove test database → y

Entrer dans la console mariadb

mariadb

Créer la BDD

create database prestashop;

create user prestashopuser@localhost identified by 'p';

grant all privileges on prestashop. to prestashopuser@localhost;*

flush privileges;

exit

1.4 Installation de PrestaShop

Télécharger PrestaShop

cd /tmp

wget https://github.com/PrestaShop/PrestaShop/releases/download/8.1/prestashop_8.1.zip

Télécharger unzip afin de dézipper l'archive

apt install unzip

unzip prestashop_8.1.zip

Copier PrestaShop dans le répertoire d'apache2

```
cp prestashop.zip /var/www/html
```

```
cd /var/www/html
```

```
rm index.html
```

```
unzip prestashop.zip
```

Donner les droits sur les fichiers de PrestaShop à l'utilisateur d'apache2

```
chown www-data:www-data /var/www/html/ -R
```

```
chmod 775 -R /var/www/html/
```

2 Initialisation de PrestaShop

Installation of demo products ☒ Yes ☐ No

Installation of modules

☒ Install all modules (recommended)
☐ Select the modules to install

Demo products are a good way to learn how to use PrestaShop. You should install them if you are not familiar with it.

If you are using PrestaShop for the first time, you should install all modules now and uninstall the ones you don't need later.

Configure your database by filling out the following fields

To use PrestaShop, you must **create a database** to collect all of your store's data-related activities. Please complete the fields below in order for PrestaShop to connect to your database.

Database server address 127.0.0.1

The default port is 3306. To use a different port, add the port number at the end of your server's address i.e. "4242".

Database name prestashop

```
Database login: prestashopuser
```

Database password

Tables prefix

Drop existing tables

Test your database connection now!

Your installation is finished!

You have just finished installing your shop. Thank you for using PrestaShop!

Please remember your login information:

E-mail

Password (Display)

 [Print my login information](#)

For security purposes, you must delete the "install" folder.

Back Office

Manage your store using your Back Office. Manage your orders and customers, add modules, change themes, etc.

[Manage your store](#)

Front Office

Discover your store as your future customers will see it!

[Discover your store](#)

2.1 Security purposes

Supprimer le dossier d'installation :

```
rm -rf /var/www/html/install/
```

Renommer le chemin du panel d'administration

```
mv /var/www/html/admin /var/www/html/dashboard
```

Recharger apache2

```
systemctl reload apache2
```
