

Dear there,

Most of you are probably back in the office today after what was hopefully a restful holiday. Happy New Year 2025 from all of us at Vertex Ventures Southeast Asia & India!

We had an action-packed 2024, having made 11 new investments last year. We welcome the founders of these companies to our network and look forward to working alongside them as they grow their companies. 14 of our portfolio companies successfully secured additional funding, including NIUM which completed its [Series E round](#), and Metub which raised its [Series B financing](#). We also welcomed 3 new members to our team.

2025 promises to be an equally exciting year with several new investments nearing completion over the next few weeks. We hope to continue meeting globally minded entrepreneurs who have their sights set on tackling substantial problems and creating outsized opportunities.

Chua Joo Hock
Managing Partner
