

UTN (part of AFI-Uplift) are now a CITB Approved Training Organisation (ATO)

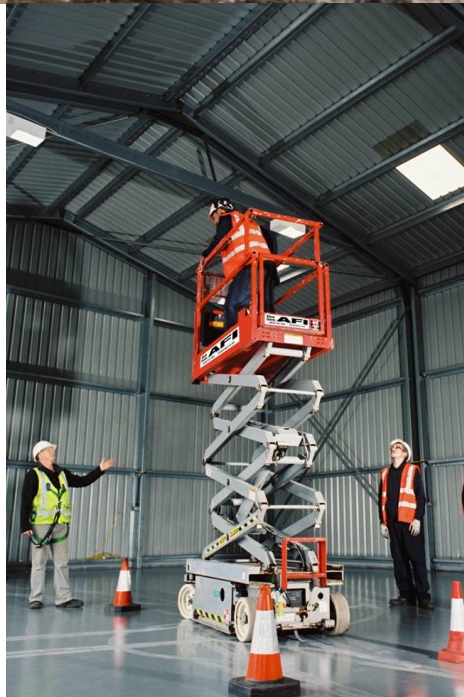

Having recently been awarded CITB Approved Training Organisation (ATO) status, UTN can offer you benefits, such as, a streamlined grant payment process and a continued high level of training for candidates.

What we can do for you

We will register your candidate's details* with the Construction Training Register on your behalf. This will then automate your grant payments - this means we take all the paperwork off your hands!

****We will need from you:**

- Full Name
- Address
- DOB
- NI Number

Benefits of being trained by an ATO

- We train our delegates to an industry recognised standard
- All CITB grant payments are now automatic, when an ATO registers your candidates training achievements
- Funding is targeted to address priority skills areas to improve industry productivity
- Training is consistent in quality and is transferable across the industry
- Individuals can easily evidence skills and achievements required for work

*Candidate information is securely stored in our training system and only shared with relevant 3rd parties (Awarding bodies and CITB). Full details of our privacy policy can be found [here](#).

**If we cannot capture all of the candidates information during the training session, we will need to contact the person that booked the course at a later stage.
