step 3

Now follow the instructions to fit your doors and panels.

kaboodle® KITCHEN

attaching drawer panels

Things you need to know

- Make sure not to drill screws too far into the panels as they can protrude out the other side.
- Make sure you leave plumbing and electrical work to qualified trades people. Never try this yourself.
- Always drill screws from inside the cabinet into your panels and use stick-on screw caps to hide unsightly screw holes.
- Thermoformed panels have a rounded edge, make sure this always faces the outside of a cabinet.
- **Gloss vinyl doors & panels are protected with a top clear wrap that needs to be removed. Depending on application of the panel, this may need to be removed prior to installation.**
- Whenever cutting or drilling panels, always protect the area being cut with masking tape and cut with the good side facing down.
- All holes that aren't already pre-drilled should be drilled prior to screwing using a No 12 countersinking drill bit.
- Make sure you always use safety gear like a mask, ear muffs and glasses when using tools.
- If you have any questions, contact us on: Australia: **1800 666 078** Monday to Friday between 8:00am and 6:00pm AEST, New Zealand: **0800 522 663** Monday to Friday between 8:00am and 5:00pm NZST or email: **info@kaboodlegroup.com.au**.

Hardware needed

A

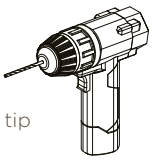

28mm wood screws

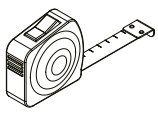

Note: Fixing hardware required is provided with the cabinets.

Cordless drill with:
- Number 2 screw tip
- 4mm drill bit
- Number 12 countersinking drill bit

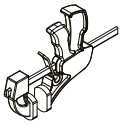

Tape measure

Pencil

Safety gear

Clamps (quick release)

step 3

hardware key

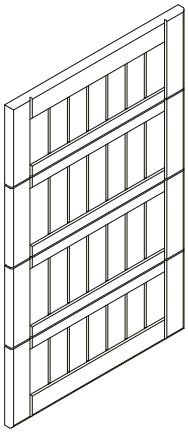

kaboodle KITCHEN

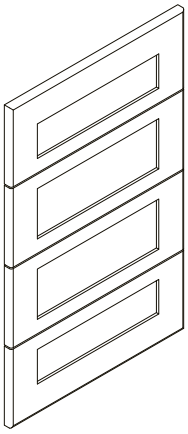

attaching drawer panels

Note: The drawer panels for the Country and Alpine profiles need to be placed in the correct order.

Country profile

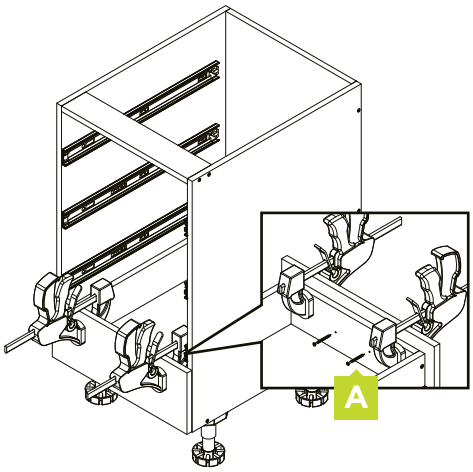

Alpine profile

attaching drawer panels

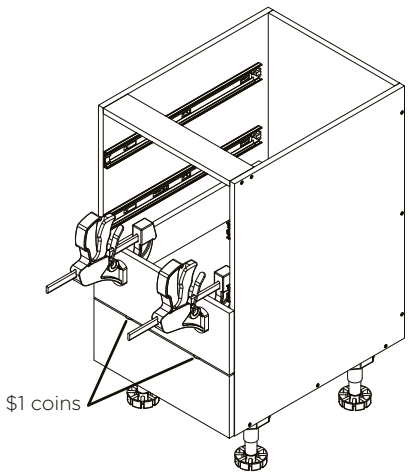

1.

Place bottom drawer panel flush with bottom of cabinet base and with the sides of the cabinet. Clamp into position.

Pre-drill and fix using 28mm screws.

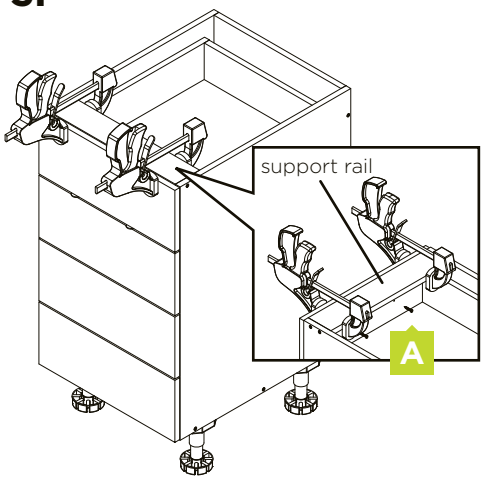

2.

The following drawers should be flush on either side, with even spacing from the other drawers.

Tip. Use 2 x $1 coins as a spacer between the drawers.

3.

When it comes to the top drawer, clamp drawer front onto cabinet support rail.

Note: With profiles be careful not to screw too far into the panel.

Caring for your kaboodle doors and panels

Looking after your cabinets is really easy and with the right care and maintenance they will last you for many years. Just follow these simple steps and if you need any more information you can contact us: Australia: **1800 666 078** Monday to Friday between 8:00am and 6:00pm AEST. New Zealand: **0800 522 663** Monday to Friday between 8:00am and 5:00pm NZST or email: **info@kaboodlegroup.com.au**.

All doors should be cleaned with warm soapy water or an all purpose, non-abrasive cleaner with a damp cloth and make sure you never use a saturated cloth, harsh chemicals or thinner based cleaners. Try to avoid using sponges on your doors and these can leave residue streaks on the surface. Never use steel wool, scourers, dry cloths or rough products on any doors as this will scratch the surface.

Handy hint: Most stains will wipe off if attended to straight away, but for more stubborn stains you can use an undiluted, commercial non-abrasive cleaner and soak for a few seconds and then clean with warm soapy water. Just make sure you test the cleaning product on an unexposed section of the surface first to ensure it won't damage the finish. If a door or panel is gouged, chipped or scratched, you can try and use a matching coloured texta to rub into the area...or just buy a new door!

We offer a dedicated customer service line for advice or any questions you may have on kaboodle products.
