Youth Employment and Entrepreneurship
Global Forum:
Building partnerships for inclusive and sustainable youth entrepreneurship and employment in green and emerging sectors.

Date: November 14-15, 2023
Location: Accra, Ghana

SNV, in partnership with the European Commission in Ghana, will organise the 2023 YEE Global Forum. The event will take place between 14-15 November 2023 in Accra, Ghana.

SNV organised similar platforms in Mali (2019) and Ethiopia (2021) to enable young people to engage with key actors and stakeholders as well as discuss successes and challenges of activities aimed at increasing youth employment and facilitate entrepreneurship.

The forum will bring together local, regional, and international stakeholders including young entrepreneurs to explore how young people can engage with the Green Jobs market.

We will again amplify the voice of young entrepreneurs and employees in the agri-food, energy, water, and emerging green sectors. The global forum will:

1. enhance partnerships,
2. contribute to and influence the youth employment and entrepreneurship discourse in the ‘green’ sector, regionally and globally,
3. share evidence of successful approaches,
4. provide networking opportunities, and
5. promote exchange of ideas among young people to promote youth innovation.

The forum will utilise plenary sessions, breakout sessions, exhibition sessions, a practitioner forum, and other forms of dialogue to develop concrete outputs to help lower barriers to youth employment in Africa.

The outline of the Forum’s agenda will be shared in due course.

We look forward to your participation. Please save the dates in your agenda.

Best regards,

André de Jager
SNV Managing Director, Sectors: Agri-Food, Energy and Water.
