

AXON ENTERPRISE FOR TECHNICIAN SERVICES

Axon is the world's most reliable way to protect your business. The Axon Network provides clarity into technician operations in the field that can be used for training purposes, to provide proof of completion to customers, and for remote monitoring and auditing purposes without the need to dispatch additional resources to the field.

Proof of Work

Equipping technicians with Axon body cameras provides an automated method of capturing field activity to ensure work is completed correctly, professionally and on time. Provide proof of proper completion to customers to eliminate the need for unnecessary second visits.

Remote Field Support

Axon live-streaming capabilities provide an option for experts to remotely support field technicians on difficult jobs without having to dispatch them to the customer site.

Liability Reduction

Any claims of unprofessional behavior can be easily confirmed or dispelled with iron-clad video documentation. Verify or dispel worker safety claims relating to OSHA adherence or injury claims.
