Application: Junior Electrical Technician position at EMR

Dear Hiring Manager,

I am excited to apply for the Junior Electrical Technician position at EMR. Having recently completed an industrial electrical apprenticeship, I am eager to develop my technical skills and gain hands-on experience in control systems and PLCs within a practical, high-impact engineering environment.

During my apprenticeship, I gained a solid foundation in industrial wiring, motors, sensors, and control panels, as well as experience reading electrical schematics and supporting hands-on projects. I also completed several practical exercises involving panel assembly, circuit testing, and fault diagnosis, which strengthened my problem-solving abilities, attention to safety protocols, and commitment to detail.

I am particularly drawn to EMR's focus on creating sustainable solutions for materials recycling and the opportunity to work alongside a Senior Engineer on projects involving shredders, conveyors, and complex electrical systems. I am highly motivated to contribute to the efficiency and reliability of your operations while learning to support PLC programming, installation, and commissioning. My proactive attitude, willingness to travel, and eagerness to develop new skills make me confident I can thrive in this role.

I would welcome the opportunity to bring my enthusiasm, soft skills, and commitment to learning to EMR's Central Engineering team. Thank you for your time and consideration, and I look forward to the possibility of discussing how I can support your electrical and automation projects.

Sincerely,
Benjamin Wright
