

Plentific's Compliance Management Solution.

Overview

Handling compliance in property management is always challenging due to the ever-changing legislations and lack of the right technology to manage it.

With Plentific, you can stay compliant with ease by quickly identifying hazards, and seamlessly delivering remedial work to remove or reduce risks within the required timeframe.

Efficiently track, manage and assure building safety and compliance across all areas in a robust, flexible and secure way.

The solution covers the areas of **fire, gas, electrical, lift and water safety**. What's more, you can **keep track of all types of building records**, such as damp & mould and smoke alarm checks with **full configuration**.

Keep control of all compliance areas with ease.

Stay on top of compliance by monitoring progress and taking immediate actions to rectify issues all at your fingertips.

Reduce admin and human errors with streamlined compliance management powered by automation.

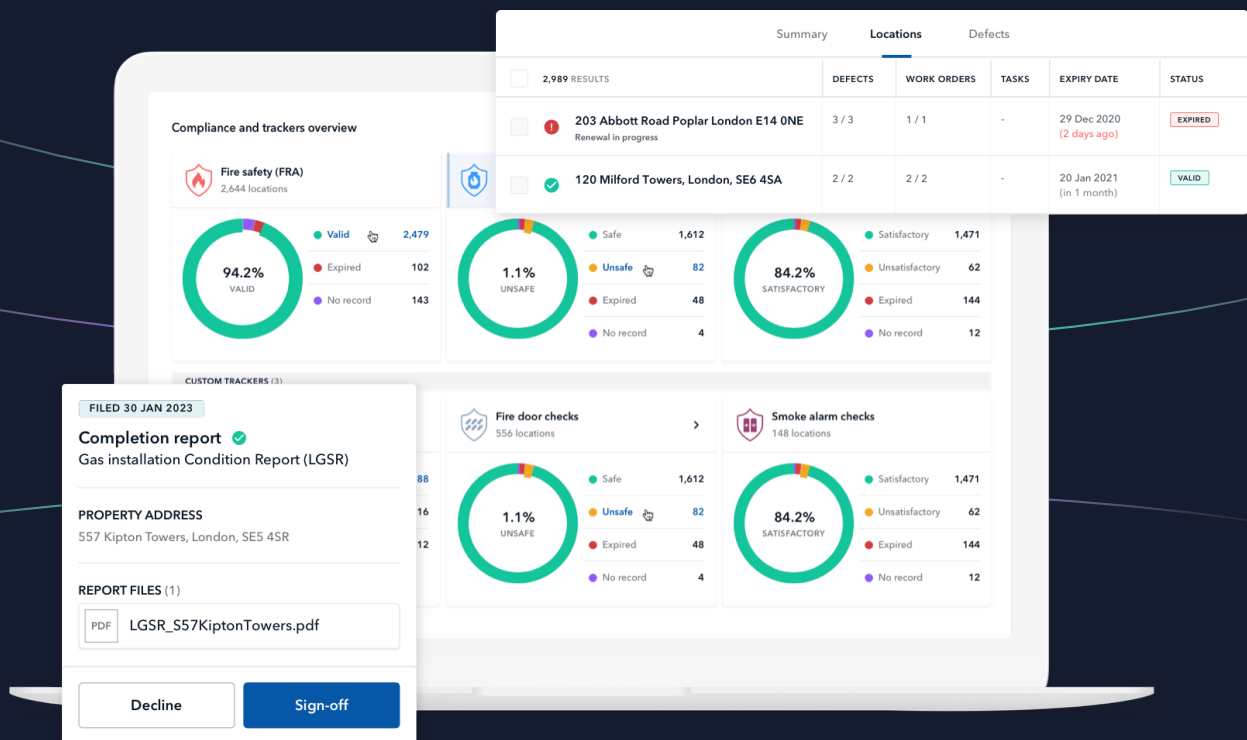

Gain a 360-degree view of building safety through Plentific's trackers with configuration and flexibility.

Access historical data in one place and track findings and documentation for internal and external audits - enhanced visibility and shared insights.

Compliance management in one clean interface.

How Plentific helps monitor and track compliance.

Standard trackers: tailored-made that help you control and monitor five key areas, including fire safety (FRA), gas safety (LGSR), electrical safety (EICR), lift safety and water safety.

Custom trackers: customisable so that you can create and add anything to fit your business needs on top of the five key areas already available to you.

Standard Trackers

Fire safety (FRA)

Gas safety (LGSR)

Electrical safety (EICR)

Lift/Water/Asbestos*
Asbestos tracker coming soon

Custom Trackers

- Regular planned checks
- Playground safety check
- Damp and mould
- PAT test, fire alarm check

...and more

Simplify compliance management process in one place.

Automate renewals

Build standardised procedures for inspections, work orders and tasks, and set up automatic renewal.

Conduct assessments

Mobilise verified contractors quickly to conduct assessments and inspections to identify hazards and risks.

Optimise performance

Gain overviews into compliance performance and areas that require attention. Review findings and share reports easily across teams.

Rectify issues

Turn issues into remedial work seamlessly and take follow-on actions swiftly to reduce or remove hazards faster.

Elevate your compliance management strategy.

Monitor compliance progress and take immediate actions to rectify issues seamlessly all at your fingertips within a project view. What's more, you will get notifications on automatic renewals before expiry.

Leverage Plentific's vetted contractor network to find the right professionals for inspections and remedial work, ensuring compliance needs are covered with verified qualifications.

From inspections to renewals, remedial work, reporting, and payments, Plentific provides a unified solution, eliminating fragmented data and disconnected actions.

How Plentific redefines compliance management.

A suite of smart features

Overview dashboard

Track record status with a single view and take actions immediately

Tracker templates

Configure templates and customise procedures and auto-renewals

Built-in inspections

Capture issues quickly with photos and videos on the go

Team management

Define who can view and edit different trackers and records

Flexible supply chain

Dynamically select your method of service with appointed contractors, internal team or Plentific's contractor marketplace

Insights and analytics

Identify due/overdue compliance areas that need attention and review performance for business optimisation

Transforming the way Flagship Group manages compliance.

- Flagship Group operates 31k properties in the UK.
- Prior to Plentific, Flagship Group managed fire safety manually with significant paperwork and double keying, which was time-consuming for the team and often involved human error or delays along the way. Without a centralised solution, it was difficult to streamline data collection, monitor compliance work, validate results and access documents and reports.
- Flagship Group is now able to simplify compliance operations from conducting inspections, reviewing assessments, and delivering remedial work to processing and paying invoices to contractors, all in one place.
- With Plentific's built-in inspections mobile app, assessors can intuitively capture property conditions with photos and videos, and flag the actions that need to be taken afterwards. All data is saved and seamlessly synced with Plentific's platform so that office-based teams can review inspection reports and send work to operatives and resolve issues quickly.
- Moving away from manual operations, Flagship Group now have more visibility into compliance progress and performance, and can ensure remedial actions are correctly prioritised and acted on within the required timeframe to reduce risk and hazards in their properties.

Elevate your compliance management strategy to a new level with Plentific.
