ENG

who we are

Alsico contamination control is a global supplier of garments for cleanrooms, clean areas, ESD environments and operating theatres.

We develop, produce and supply high quality garments to rental companies, end-users and specialised distributors.

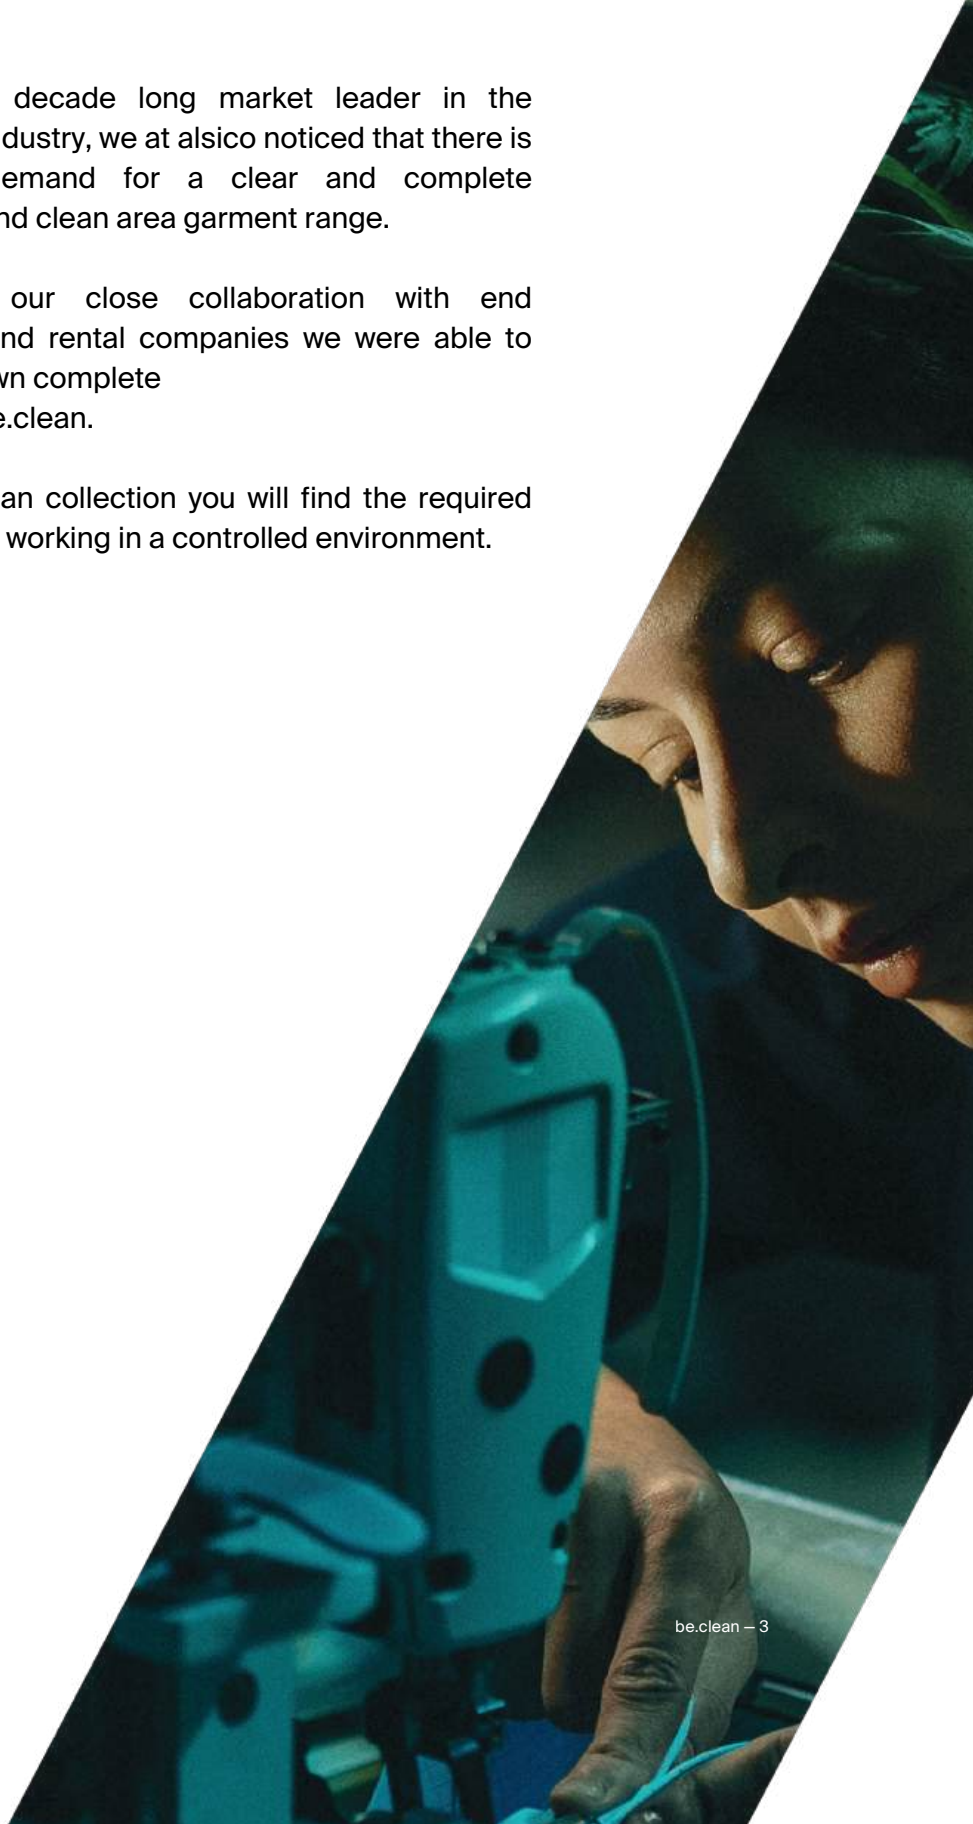

We are part of the alsico group, a specialist in workwear with more than 80 years of experience. Alsico contamination control is a business unit of alsico group. This enables us to concentrate 100% on our core business: protecting your environment.

Our performance protects yours.

As a three decade long market leader in the cleanroom industry, we at alsico noticed that there is a strong demand for a clear and complete cleanroom and clean area garment range.

Thanks to our close collaboration with end customers and rental companies we were able to create our own complete collection: be.clean.

In our be.clean collection you will find the required garments for working in a controlled environment.

our complete collection

/ according to IEST-RP-CC003.5

/ approved durability

Twill 3/2

Colours on demand:

zr0.dye - a smarter approach to color

The dyeing process is one of the most resource-intensive steps in textile production, consuming large amounts of water, energy and chemicals. Making it a significant environmental challenge.

With **zr0.dye**, we eliminate the dyeing stage, significantly reducing water use with 8% (or 3,36 liters) and energy consumption with 31% while lowering the overall environmental impact with 30% less CO² emissions. The result? A fabric that performs just like traditional cleanroom textiles, with minimal visual difference compared to standard white fabrics but with a cleaner production footprint.

A simplified process, fewer resources, **zr0.dye** is a step forward in responsible material innovation.

The ARX Initiative

The ARX Initiative is a movement designed to facilitate and accelerate the shift needed to ensure a livable world on a habitable planet. It was created to show that starting modestly is perfectly fine, that making this shift is possible, and that we can take the first steps today.

Through the ARX Initiative, we take responsibility by reducing our impact—making high-quality garments, extending their lifespan through repair services, and facilitating garment collection when they are due for a second life.

If you would like your Alsico end-of-use clothing to be sent back to us for repurposing, please contact us, and we will connect you with a responsible person who can provide all the details.
