dolomite marble

Elegance and durability combined

- ◆ Timeless class
- ◆ Heat and stain resistance
- ◆ High level of hardness
- ◆ Easy maintenance
- ◆ Ideal as a long-lasting kitchen worktop
- ◆ Elegant palette of colours
- ◆ Various finishes possible

DECORATIVE DURABILITY

Dolomite marble brings a traditional look to every interior with a high level of hardness .

Like quartzite, dolomite marble combines the design of marble with a high level of hardness. Like marble, this natural stone is an age-old metamorphic rock with comparable properties. These include heat and stain resistance, as well as elegance and an impressive play of lines.

Whereas traditional marbles are made of the mineral calcite, dolomite marble contains the mineral dolomite. It is precisely that composition that gives this natural stone its strength and hardness. It makes dolomite marble more resistant to acid and scratches than classic marble, without compromising on appearance.

This higher level of hardness makes dolomite marble perfectly suited for interior applications, such as durable kitchen worktops that are easy to maintain. Although dolomite marble is highly resistant to scratches and acids, it is still important to take good care of it with the right products to ensure it lasts a long time and retains the classic patina of natural stone.

Dolomite marble is a pure product created by the power of nature. That makes this natural stone an environmentally friendly material with a very long lifespan. No energy is lost during production. This is enhanced by Brachot also keeping its CO₂ emissions as low as possible when sawing the stone. So dolomite marble not only adds a strong, stylish touch to your interior: more than anything, it is a sustainable choice.

Choose contemporary elegance

Marble appeals to everyone's imagination. With a colour palette full of elegant tints of white and grey and a fascinating play of lines and figures, dolomite marble offers the same radiant appeal. No two slabs are the same, and every project is unique.

Dolomite marble has a high level of hardness. Together with its appearance, this makes it a popular material for all kinds of interior applications: kitchen worktops, wall coverings, indoor flooring etc. Also various formats, thicknesses and surface finishes are possible.

A selection of our finishes

With these finishes, dolomite marble looks great in any project and is suitable for every application. Brachot works continuously on optimising its finishes and developing new ones. This ensures that we can find the finish best suited to the material, your taste and the style of your home.

Brosso Vecchio

This unusual matt finish has been developed especially for marble. The surface is gently brushed to give it a 'leather touch' and accentuate its natural colour.

Polished

The shiniest and smoothest finish by far, bringing out the best in the colours, veins and minerals.

Sensato

This mechanical treatment gives the dolomite marble a somewhat rough, matt look that is pleasant to the touch.

Honed

A warm, matt shine created with a scoured surface. The grain used for scouring determines the final result.

Beautiful and easy maintenance

Super White Extra

Dolomite marble is characterised by its composition, based on the mineral dolomite. This gives the material its natural heat and stain-resistant properties. Opting for dolomite marble means choosing aesthetic looks combined with easy care.

Just like traditional marble, the appearance of this natural stone gets more and more beautiful as the years go by. Be careful with acid stains: never scrub with abrasive materials and don't use too much water. Use the correct daily care products to increase the dolomite marble's scratch and acid resistance. That way, you will be able to enjoy your long-lasting choice for many years to come.

CRAFTING VALUE FOR FUTURE GENERATIONS

www.brachot.com

Brachot extracts, produces and distributes landscape and surface materials in natural stone and blended materials. With its 20 quarries, 7 production sites and 14 distribution centres across Europe and Africa, Brachot has the entire production process in its own hands: from extraction to sawing and processing to distribution. This creates endless possibilities for the production of blocks, slabs, tiles and accessories for indoor and outdoor applications in natural stone and blended materials.

Brachot and its Family Members are firmly united by their focus on innovation. They continuously come up with new possibilities and applications, both in production and distribution. State-of-the-art machines and techniques enable Brachot to work faster and to ensure higher quality and greater sustainability. As a result, Brachot has become an internationally leading name in the world of natural stone and blended materials.
