QUARTZ
WORKTOPS**

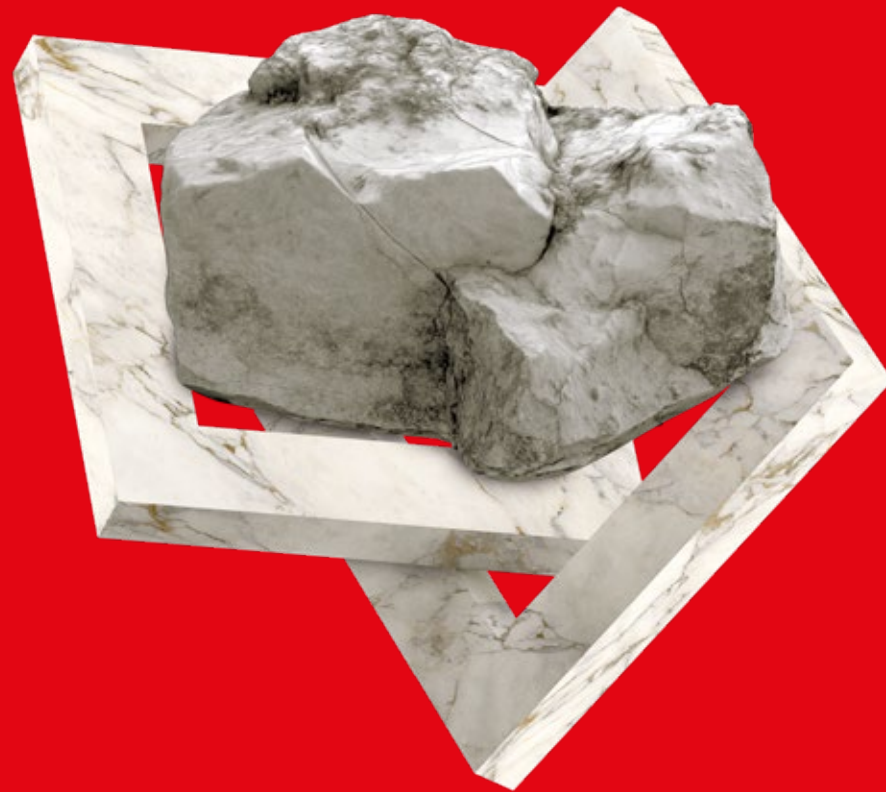

bqs

bqs

Probably the most natural looking quartz

- ♦ Quartz composite at an attractive price-quality ratio
- ♦ Scratch, heat, and stain-resistant
- ♦ Easy maintenance
- ♦ Low water absorption
- ♦ Food-safe

Inspired by nature, perfected by Brachot

Inspired by nature's finest stones, BQS® offers a carefully curated selection of quartz worktops that echo the depth, detail, and texture of real stone. Designed for interiors where aesthetics matter, BQS® bridges the gap between natural beauty and engineered perfection.

Handcrafted with natural variation

Each BQS® slab is handcrafted, resulting in subtle differences that give every lot its own unique character. Just like natural stone, our surfaces feature slight variations in vein prominence and definition, intentionally crafted to enhance authenticity.

Veins may appear more or less pronounced from slab to slab – particularly in finer patterns – and our custom press technology introduces intentional variance in vein clarity and contrast. This softening effect, especially at the edges of thinner or larger veins, brings a truly natural appearance that mirrors marble or quartzite.

BQS slabs are available exclusively in a jumbo format of 320 x 160 cm and are offered in two thicknesses: 2 cm and 3 cm. This material therefore lends itself to numerous specific indoor applications in different types of settings.

Precision-crafted with superior performance

BQS® is not just a beautiful surface – it's a material built for performance. Engineered with refined craftsmanship and premium materials, every slab is produced to the highest standards of quality and durability.

Compared to marble, BQS® offers significantly better scratch resistance, stain resistance, and acid resistance. These properties make it exceptionally well-suited for kitchens, bathrooms, and high-traffic interiors – delivering natural elegance without the maintenance challenges.

Stain resistant

Dense surface structure that keeps out liquids, so stains rarely stand a chance.

Scratch resistant

Extremely hard material that resists marks from daily kitchen tools and utensils - though we still recommend using a cutting board.

Easy maintenance

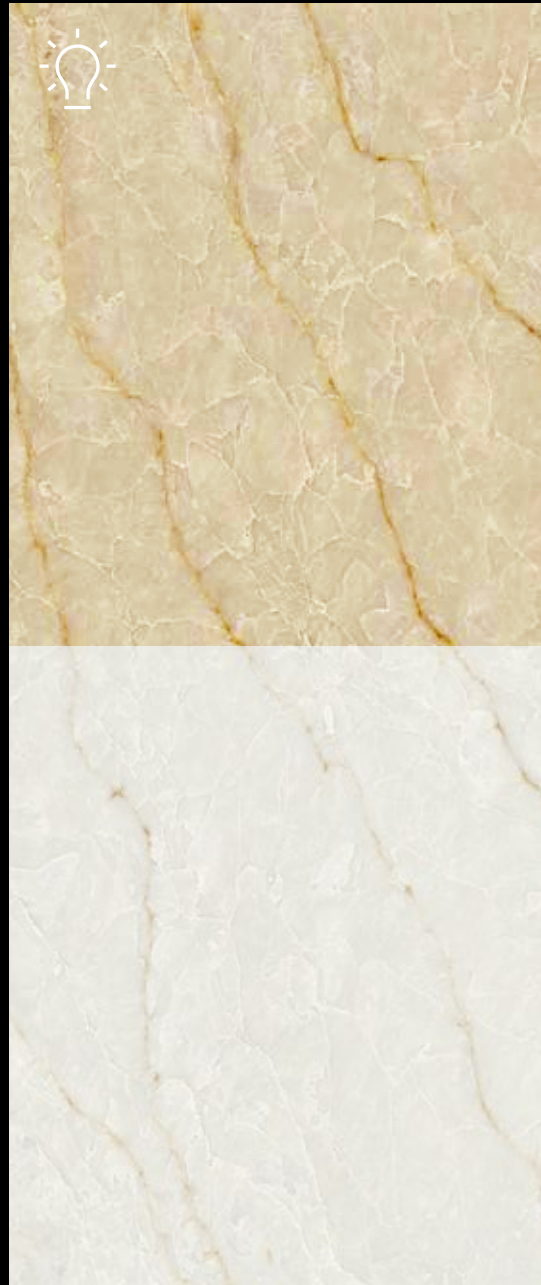

Dense surface structure that keeps out liquids, so stains rarely stand a chance.

Food-safe & certified antibacterial

Non-porous and hygienic, ideal for safe and clean food preparation.

BQS® Lumen Ice - translucent

Translucent innovation

The newest innovation in the BQS® collection introduces translucent quartz slabs, designed to interact with light in extraordinary ways. These special slabs allow light to pass through selected zones, opening up a world of possibilities for backlit applications, mood lighting, and striking interior features.

 Borealis Green

 Lumen Ice

Available in two refined designs — Borealis Green and Lumen Ice — this translucent series blends material depth with atmospheric lighting. Perfect for bar fronts, vertical panels, or artistic statements where elegance meets innovation.

Cleaning and maintenance

First cleaning

When first cleaning the worktop after installation, we recommend using a product such as Lithofin MN Power Clean. This ensures that all dirt and product residues are removed, so you can start using your worktop in clean condition.

Daily maintenance

Regular cleaning is important to maintain the enduring quality of your worktop. We recommend cleaning your worktop with a damp cloth and a mild detergent, such as Lithofin MN Easy Clean. Whatever the stain may be, it is always best to wipe it up as soon as possible.

Water stains

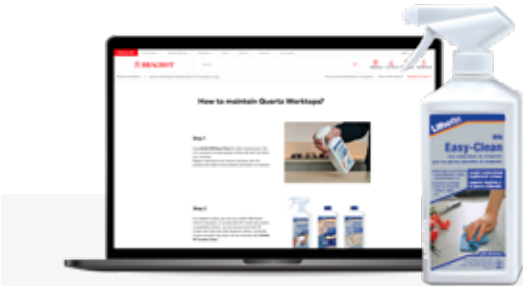

Excess water can cause calcification in time. In order to avoid this, you should wipe it away immediately. If you notice scale deposits, we recommend the use of a product such as Lithofin KF Ceramic Clean.

How to prevent damage

Some products are liable to cause damage to the surface's polished finish or cause dull spots. You should therefore avoid using products such as abrasives, ammonia, scouring pads, steel wool and thinners.

In addition, you should avoid placing hot pans or appliances directly on to the worktop and make use of trivets or a heat resistant board. Please be careful while using sharp objects (such as knives), we strongly advise the use of chopping boards when you are.

For more information regarding maintenance, use and installation, visit our website www.brachot.com

Not sure about the right product?

Maintenance of your BQS quartz composite is easy. However, if you're not sure about using the right cleaning product, or if you have a specific question about the maintenance of quartz composite, do not hesitate to ask for advice at +44 1384 56 43 15 or info.uk@brachot.com.

CRAFTING VALUE FOR FUTURE GENERATIONS

www.brachot.com

Brachot extracts, produces and distributes landscape and surface materials in natural stone and blended materials. With its 20 quarries, 7 production sites and 15 distribution centres across Europe and Africa, Brachot has the entire production process in its own hands: from extraction to sawing and processing to distribution. This creates endless possibilities for the production of blocks, slabs, tiles and accessories for indoor and outdoor applications in natural stone and blended materials.

Brachot and its Family Members are firmly united by their focus on innovation. They continuously come up with new possibilities and applications, both in production and distribution. State-of-the-art machines and techniques enable Brachot to work faster and to ensure higher quality and greater sustainability. As a result, Brachot has become an internationally leading name in the world of natural stone and blended materials.
