**THE UNPARALLELED
HARDNESS OF GRANITE**

 **granite**

granite

The purity of natural stone

- ♦ Unparalleled hardness
- ♦ Scratch, acid, heat, and stain-resistant
- ♦ Timeless character
- ♦ Maintenance-friendly
- ♦ Various finishes possible
- ♦ Rich palette of colours
- ♦ Own quarries in Tarn, Nari Black, Labrador, Rose de la Clarté and Blanc Perlé

GRANITE EXPERTS

Granite reconciles the unique beauty of nature with its indomitable power.

With over a century of experience and counting, we are true granite experts. Our specialists select the granite from our own quarries (in France, Norway, Portugal, and South Africa) as well as other quarries worldwide. In addition, our geological team subjects all materials to a strict quality control. We combine this quality guarantee with a very thorough knowledge of all the technical properties, applications, and finishing possibilities of this material.

Granite is a natural stone, meaning geological processes have determined its character for centuries. The result is a product that is never 100% the same.

The colour palette, the patterns, ... each slab is different, surprising, and authentic.

Even after mining, granite lives on. It gets more beautiful over time. With its exceptional hardness and limited porosity, granite has plenty of time for this. These technical properties form the basis for decades of resistance to water, frost and wear.

That durability is more than just a very long lifespan. Granite is also an environmentally friendly product that is only shaped by the power of nature. So it doesn't need any energy for its production. CO2 emissions during production are also low. And because it is 100% recyclable, granite can be reused for a wide range of applications.

Choose the granite that suits you

Granite creates a special visual effect through the unique interplay of lines, shading and structures. Sometimes speckled, sometimes uniform, but always so different, so unique. This unpredictability is characteristic of a product that was modelled by nature.

It is also a versatile material for various applications that add an aesthetic value to your interior and exterior.

The fact that this ancient material is also offered in various sizes, standard thicknesses of 2 and 3 cm (and up to 20 cm on request) and a broad range of possible surface finishes ensures a personal touch.

A selection of our finishes

The finishes shown here are a selection of the surface finishes Brachot offers as standard. We are also constantly developing new finishes and optimising existing ones at Brachot, which ensures that we can find the finish best suited to the material, your tastes, and the style of your home in every case.

Anzano

Although this semi-coarse finish is somewhat coarser than a matt or polished finish, it still feels very satisfying and soft. The non-slip result still has a beautiful satin shine to it.

Polished

Without a doubt, the glossiest and smoothest finish, highlighting the colours, patterns, and white spots. Dark shades create a mirror effect.

Honed

The surface is sanded until a warm, matt shine is obtained. The grain size during sanding determines the final result.

Letano

This original, matt, and slightly brushed finish enhances the natural colour of granite. The result is a 'leather feel'.

Extremely strong and maintenance- friendly

Cosmic Black

Granite is the hardest of all types of natural stone. As a result, this natural material is highly scratch, heat, acid and stain-resistant. So it can withstand decades of intensive use, in the kitchen as a floor or kitchen worktop, for example. In addition, granite can also be used perfectly indoors and outdoors as wall and façade cladding, as well as for patios.

Granite is also very maintenance-friendly. With the right cleaning and protection products adapted to the use, soiling and surface coarseness, granite will remain intact for many decades. In fact, it gets more beautiful over time.

CRAFTING VALUE FOR FUTURE GENERATIONS

www.brachot.com

Brachot extracts, produces and distributes landscape and surface materials in natural stone and blended materials. With its 20 quarries, 7 production sites and 14 distribution centres across Europe and Africa, Brachot has the entire production process in its own hands: from extraction to sawing and processing to distribution. This creates endless possibilities for the production of blocks, slabs, tiles and accessories for indoor and outdoor applications in natural stone and blended materials.

Brachot and its Family Members are firmly united by their focus on innovation. They continuously come up with new possibilities and applications, both in production and distribution. State-of-the-art machines and techniques enable Brachot to work faster and to ensure higher quality and greater sustainability. As a result, Brachot has become an internationally leading name in the world of natural stone and blended materials.
