

Annex 1: the authority's requirements

1 Objectives

- 1.1 The Authority has designed the procurement with the following key objectives in mind:
- To provide an example payment mechanism that, if adopted internationally, could provide a pull incentive to contribute to renewed research and development into new antimicrobials.
 - To test a new NICE Health Technology Assessment (HTA) for antimicrobials;
 - To test a subscription-type payment model for antimicrobials;
 - To contract for an antimicrobial via an affordable subscription-type payment model; and
 - To comply with the Public Contract Regulations 2015 (PCR 2015);

2 Key Requirements

- 2.1 Therefore, the Authority's key requirements are:
- To contract with the Supplier of the antimicrobial that can best satisfy the Authority's award criteria;
 - To contain total expenditure, for the antimicrobial within £10m per annum, excluding fees and taxes;
 - To maximise value for money for the Authority;
 - Supplier acceptance of and compliance with the Authority's terms and conditions of contract (the Contract);
 - For industry to proactively support antimicrobial stewardship;
 - Supplier compliance with relevant legislation and guidance including (but not limited to) the PCR 2015 and Association of the British Pharmaceutical Industry (APBI) guidelines.
