Forging
Alu Die Casting
Alu Gravity Casting

FORGING FUTURE SINCE 1946

Abadiño Machining Plant
20.000m²

Machining
Heat Treatments
Painting
Assembling

SUPER-EGO

FORGING QUALITY

At SUPER-EGO we're proud to be celebrating 75 years of design and manufacture of professional tools. Over the years, SUPER-EGO, which started out as an industrial project for some entrepreneurs from the Basque town of Eibar, has become a respected benchmark in the global tools market.

Our development has been based around lifelong learning thanks to the contact and close collaboration we have with our clients, which, over time, has allowed us to adapt and better tailor our products to their intended purpose.

It's been a long time since we made our first tool, but we continue to strive for excellence, just like we did when we started out 75 years ago. This is why we continue to work with the latest production technology in our factory, ensuring that we can equip new generations of professionals with the highest quality tools.

EUROPEAN MANUFACTURER SINCE 1946

SUPER-EGO Hand Tools have been manufactured to the highest international standards since 1946 and are used by pipe installation and maintenance professionals worldwide every day

www.super-ego.com

QUALITY

Every SUPER-EGO mould comes with a long warranty and material. This speaks for highest quality and reflects the values of the Company, which have been consistently pursued since its foundation

EXPERIENCE

SUPER-EGO has developed into an innovation forge for professional tools and a technological pioneer in the industry, combining all processes from design to manufacture under one roof

HERITAGE

Thanks to the values that always defined SUPER-EGO :
Courage, endeavour and innovation. Our heritage is
the basis of our future, as we continue working with
the same passion as we did then

FLEXIBILITY AND ENDURANCE

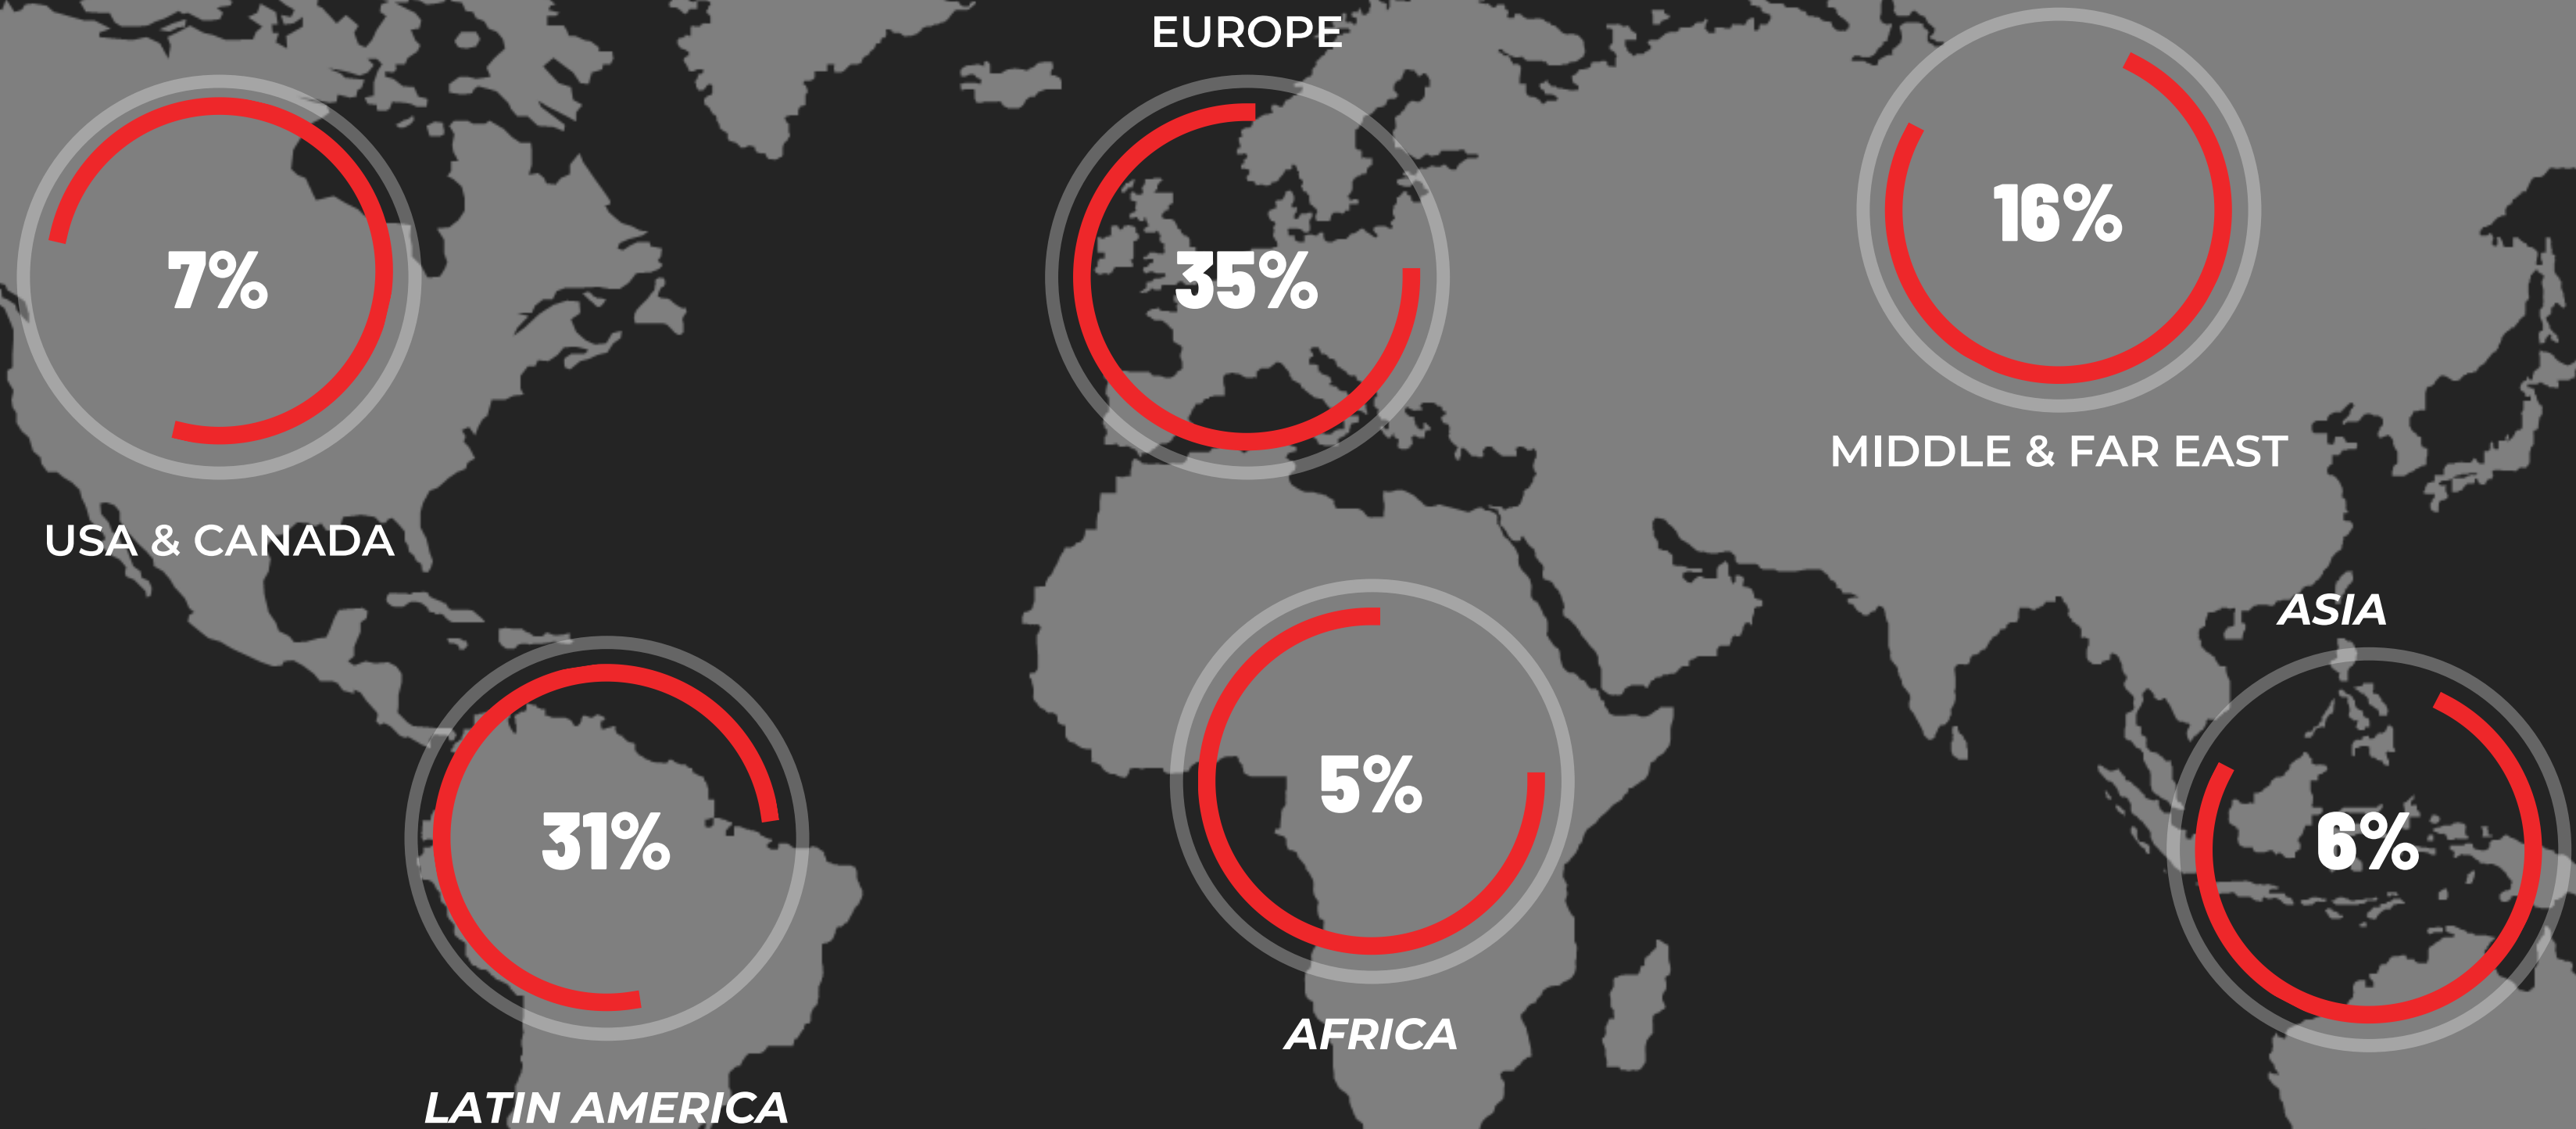

Forging and casting, as the first steps in the manufacturing process, play a decisive role for quality, which is characterized by a perfect combination of strength and flexibility, making the tools particularly resistant. Further production steps, such as machining and heat & surface treatment turn the forged blanks into first-class tools with global reputation.

PREMIUM SERVICE

SUPER-EGO controls all steps in the supply chain, offering a flexible, fast and reliable service, strengthening the relationship of trust and commitment with customers
