

DEEP STORM

DEEP STORM

The Deep Storm is a multi-purpose hydrographic survey vessel. The vessel can be deployed for various projects related to hydrographic, geophysical, UXO and environmental surveys.

The vessel is fitted with the latest equipment to carry out complex surveys in shallow waters and nearshore waters. With her standard equipped moonpools and brackets the vessel fits all needs for multi-disciplinary surveys like sub-sea cable detection, route surveys, nearshore site-surveys, environmental surveys and UXO detections.
