

Windows 11

Enhance productivity, collaboration

& security

Upgrading to Windows 11 has never been more important

Windows 10 22H2 is the current and final version of the operating system, which reaches end-of-support on 14th October 2025. This means you will need to purchase expensive Extended Security Updates in order to continue receiving security updates.

boxxe understand that transitioning to a new operating system can seem daunting, but with expert guidance and tailored solutions, the process can be seamless and stress-free.

Our comprehensive approach and hands-on support can ensure your Windows 11 upgrade is smooth, efficient, and fully optimised for your organisation's needs using either Microsoft Endpoint Configuration Manager (MECM) or Intune.

Don't compromise on your system's security, performance, or access to the latest features. Embrace the enhanced capabilities of Windows 11 and future-proof your systems with confidence and assurance from boxxe, a leading UK Microsoft partner.

Faster deployment

Deployment is **25-30% faster** compared to Windows 10.

Increased productivity

Employees save **45 minutes per week** on average with modern tools and workflows.

Compatibility

99% of legacy apps run smoothly on Windows 11, and for the rare exceptions, boxxe works with Microsoft's App Assure to resolve compatibility issues and keep your organisation running smoothly

Faster workloads

Devices perform up to **20% more efficiently** with Windows 11's optimised architecture.

Return on Investment

Companies achieved a **107% ROI** within three years, with benefits including reduced downtime.

Our offering

Wherever you are on your migration journey, we're here to support you. Every organisation has unique needs so leveraging boxxe's extensive industry expertise and strong technology partnerships, we can ensure your migration plan is scalable, efficient, and delivers maximum return on investment.

boxxe offers a range of services designed to support your transition to Windows 11:

Readiness assessments to thoroughly evaluate your organisation's compatibility with Windows 11, providing detailed insights and tailored recommendations to ensure a smooth and efficient migration.

Pilot deployments that help identify potential compatibility issues, allowing us to refine strategies, optimise deployment plans, and establish a structured, scalable migration process.

Expert configuration and deployment services to make your Windows 11 migration seamless. Our team ensures smooth integration with your existing IT infrastructure, while aligning with modern device management principles for long-term success.

Device as a Service (DaaS) solutions that streamline the setup process, offering tailored configurations designed specifically for your organisation. From managing custom images with MECM, to provisioning devices with Autopilot and utilising zero touch deployment principles to ensuring optimal performance, we help you maximise efficiency and minimise disruption.

Professional support and guidance to address every stage of your journey. From troubleshooting and post-deployment assistance to adoption, training, and change management, we ensure your organisation is fully equipped to embrace Windows 11's capabilities and unlock enhanced productivity.

Tailored change and adoption services that identify user personas to deliver solutions that work for everyone—from mobile and office-based workers to high-performance teams. With our recommendations, your team will have the ideal devices, configurations, and essential accessories—such as headsets, monitors, and peripherals—to create a seamless and optimised end-user experience.

Copilot+ PCs

boxxe can recommend and provide access to the latest Copilot+ PCs, designed to redefine productivity, security, and NPU performance with cutting-edge AI integration.

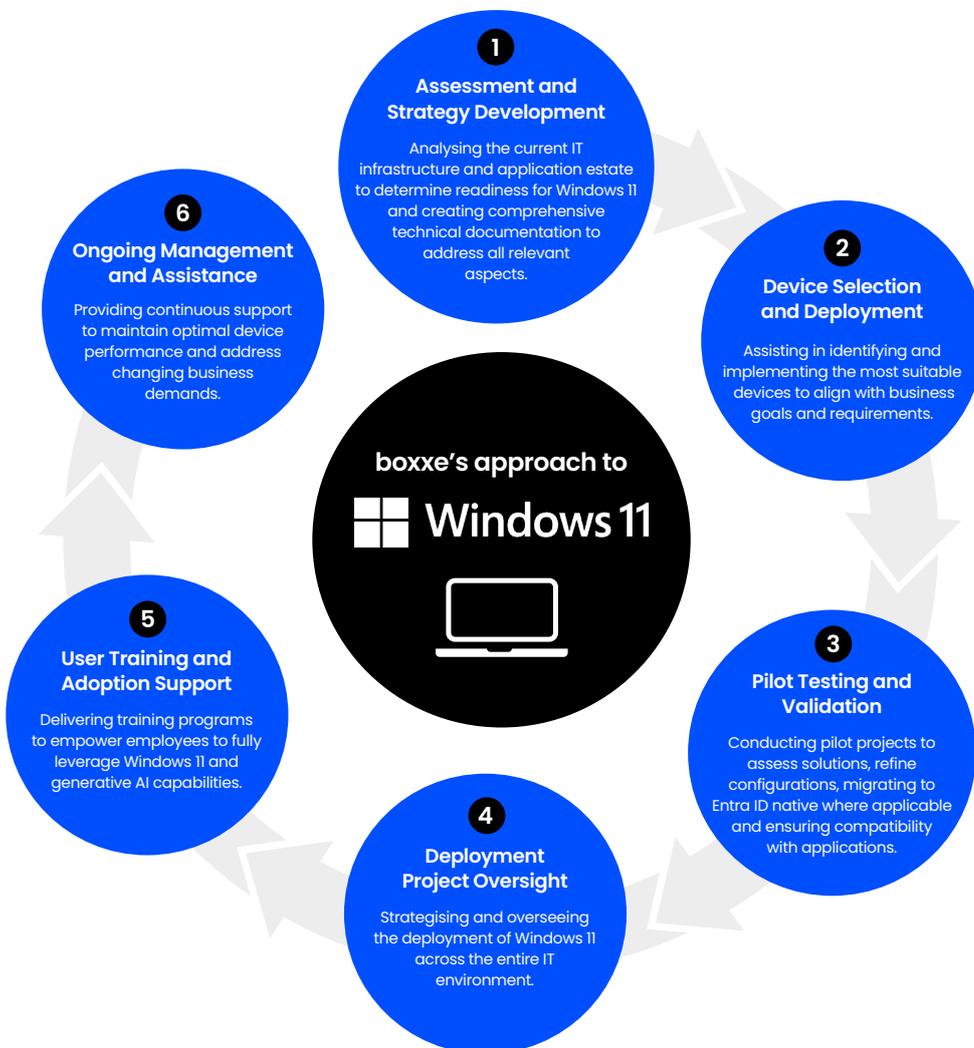

Powered by next-generation AI capabilities, these devices bring features like natural language processing, real-time data insights, and smarter workflows, enabling teams to work faster and more effectively.

Through partnerships with Lenovo, HP, Dell, and as a Microsoft Surface Partner, boxxe connects you with solutions that transform how you create, collaborate, and secure your work environment.

Why boxxe?

For us, tech has never been just hardware and software. At boxxe, our focus is more about you. Through our people centred approach, we strive to make life better with tech.

- ✓ We understand your world, because we share your passion
- ✓ We collaborate with you every step of the way
- ✓ We simplify every challenge, even when they feel impossible to overcome
- ✓ We have the expertise and experience to create real solutions that will push your organisation forward
- ✓ We care about our people, our partners and our planet. Choosing to work with boxxe is choosing a sustainable and proactive way to progress.
