Single and Double doors: If you have seen another handle that you like that isn't on this data sheet, please send a link or picture through to us and we can see if it is compatible. In general for Single and double doors it must have a back plate no wider than 35mm. Our standard spindle and screw positions are as shown below. If the handle you like has different fixing positions to this, we must know in advance of sign off.

Hinges: hinges on our doors can be in Satin Chrome, Black or white as standard. We can spray the hinges a RAL colour for an extra charge. Inward opening doors have hinges on the inside, Outward doors have hinged on the outside.

Pull bars: Doors can also be supplied with stainless steel external pull bars, please ask a member of the windows team to discuss options and we will provide photographs from our library or links to the 21° website.
