

Schaerer *Coffee Skye*

Spectacular selection. Made for every niche.

Schaerer Coffee Skye

- Standard • Optional

Versatility and style, everywhere.

The perfect solution for every place where premium quality and variety matter. With its flexibility for smaller applications, the Coffee Skye brings first-class coffee enjoyment exactly where it's needed. Versatile, with a smart price structure – ideal for locations with lower foot traffic.

Simplified installation & maintenance.

Installing your Schaerer Coffee Skye has never been easier: All connections for installation are accessible from the front, and the waste water hose can be removed without tools. Hose assembly on the under-counter unit can be done easily without removing the side panels. All components – main power connection, accessories, fixed water connection, wastewater drain – are also accessible from the front for fast service. The bean hoppers are outside on top and can be removed individually for cleaning.

More hoppers, more choice.

Expand your standard version with an additional bean hopper and grinder. Add a single (2000 g) or double (2x1000 g) powder container with a separate preparation system to complete your range with numerous specialty beverages. You can also double the capacity of the bean hoppers from 750 g to 1500 g – simply attach the extension sets on top of the existing hopper (three flexible sets; compatible with all Skye configurations except Twin Powder). The locking system makes insertion and removal quick and easy.

Milk hose openings on both sides.

The extra-large openings on each side allow connection to any external milk coolers. The flaps blend harmoniously into the design and increase versatility and functionality.

Designed to Fit –

Coffee Shops

Premium enjoyment and fast service
– even in smaller locations.

Bakeries

More than just coffee to go:
variety for your customers.
