

FACTSHEET

HyCare | Research 1-star broilers

APRIL 2023

What is HyCare?

With the HyCare-method, The Schippers Group supports livestock companies across the world to improve hygiene on their farm. Livestock companies who apply the HyCare method are improving the health of their animals and see their technical results increase.

HyCare in poultry farming

With HyCare we offer poultry-programs that focus on top hygiene management. Our method increases animal health and optimizes hygiene management. Besides the products, we also provide our customers with the right tools and guidance.

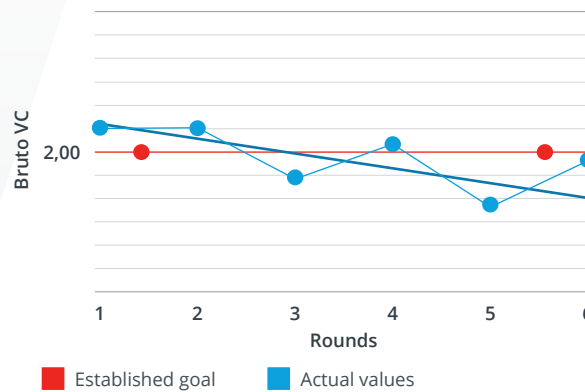

Current results

The results in this review were obtained on a poultry farm with 1-star broilers. With the poultry farmer, (technical) goals are set as a guide. The graphs and table alongside show the improvement of the technical results since the start with HyCare.

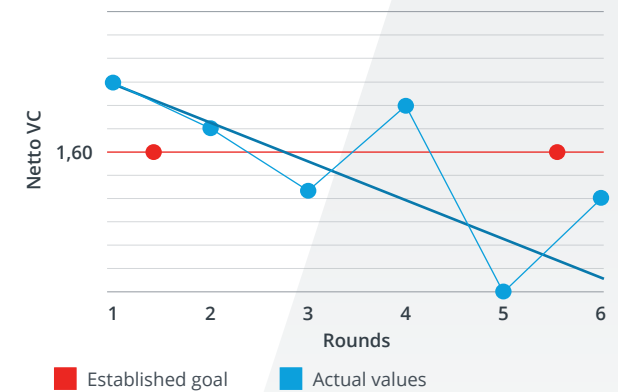

The **Schippers** Group

Let's beat AMR with HyCare

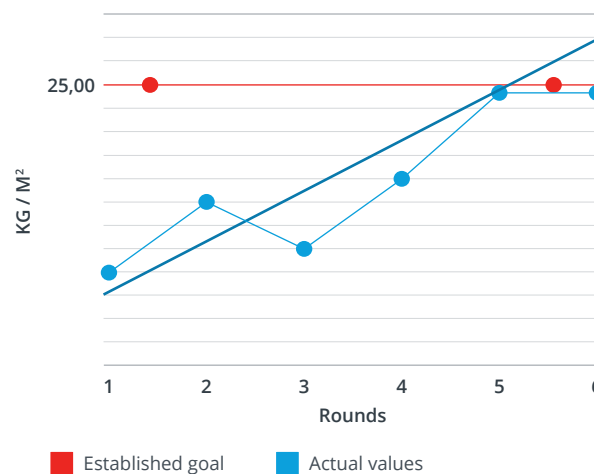

GROSS FEED CONVERSION

NET FEED CONVERSION

KG / M²

The average improvement along the trend line over the past six rounds (one year) is as follows:

Gross feed conversion	-9 points
Net feed conversion	-9 points
Day growth	+1.5 gram (84 gram total)
KG/M ²	+1,3 KG

For comparison:

- With a feed price of 50 euro/100 kg, -1 point feed conversion saves about 1.20 cents/chick.
- With a yield price of 1.70 euro/100 kg, +10 gram final weight saves 1.70 cents/chick.
