

Factsheet

MS Schippers

We believe in farm hygiene.

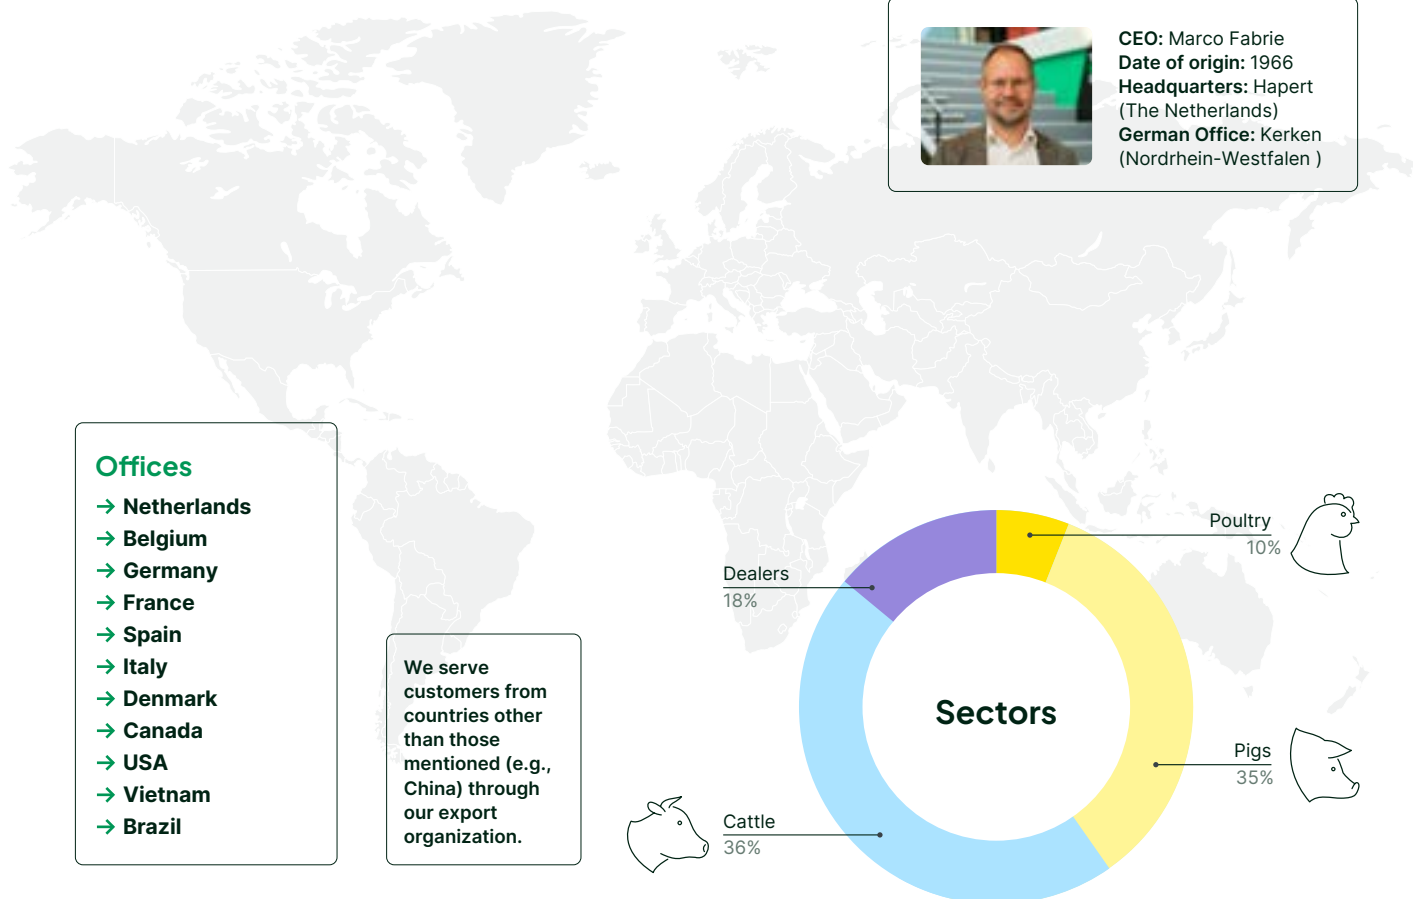

Why? Because hygiene works.

It works for healthy animals, a healthy business, and a healthy world. That's why we empower farmers in putting hygiene into practice.

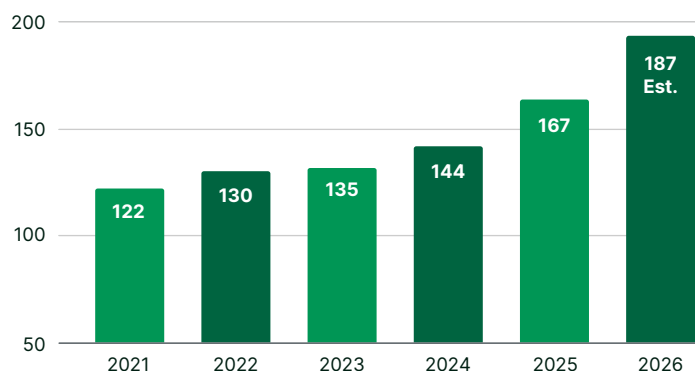

We have spent over 60 years standing shoulder to shoulder with farmers in more than 42 countries, not behind a desk but in the barn. As a family business, we innovate and develop practical solutions and digital tools, tested on our own demo farms before they reach the barn. With HyCare, we give farmers insight and grip on hygiene through data. With MS Gold, we deliver the best-performing hygiene products.

In the end, it's the farmers who make hygiene work. Their dedication, day in and day out, is what keeps barns running, businesses strong, and the world healthier. Therefore, we support farmers today, and get them ready for the farming of tomorrow.
