Note:
This Zone of Theoretical Visibility (ZTV) has been generated using ESRI ArcGIS Spatial Analyst extension. The digital terrain model (DTM) has been derived from Copernicus 25 m DTM dataset (accuracy: +/- 7 m RMSE). The ZTV has been generated from a viewing height of 1.8 m above ground level, and a surface offset of 15 m. The ZTV is generated from a bare earth terrain and does not account for the screening effect of features within the landscape such as woodland.
