1. SIEVING EXERCISE FOR DESIGNATED ASSETS BETWEEN 5 AND 15 KM

1.1 Introduction

This report considers the potential for Setting Impacts on heritage assets located between 5 and 15 km from the CSA. A sieving exercise is described that aims to screen out assets that are unlikely to undergo a change in setting as a result of the Proposed Development.

1.2 Assets not considered

Regionally Designated Assets of 'National Significance' located at distances greater than 10 km from the CSA have not been included following input from the archaeological advisor to Dumfries and Galloway Council.

Regionally Designated Assets of 'Regional Significance' have also not been included for assessment on the grounds of the distance from the proposed Development and the low potential for significant (in terms of EIA regulations) adverse impacts to setting.

Regionally Designated Gardens and Designed Landscapes, Promoted Sites and Areas of Archaeological Sensitivity (as detailed under Dumfries and Galloway Council Local Development Plan 2 (DGLDP2) adopted 3 October 2019¹) have not been included for assessment on the same grounds.

1.3 Methodology

Assets considered for this sieving exercise include:

- All Nationally Designated; and
- All Regionally Designated Assets of 'National Significance'

Between 5 and 15 km from the CSA there are 244 Nationally Designated Assets:

- 28 Scheduled Monuments;
- 7 Conservation Areas,
- 207 Listed Buildings; and
- 2 Gardens and Designed Landscapes

Between 5 and 15 km from the CSA there are a further 21 Regionally Designated Assets of 'National Significance'.

For heritage assets between 5 km and 15 km, a sieving exercise was undertaken to identify Nationally Designated/Regionally Designated heritage assets that meet the following criteria:

- asset must lie within the Zone of Theoretical Visibility (ZTV);
- asset must have potential for views of the Proposed Development; and
- an asset must derive part of its cultural significance from long distance views and distant landscape context.

Only those heritage assets that meet these criteria have been included in the assessment.

A review of the ZTV indicates that there are several areas within the 15 km Setting Study Area where assets are either outside the ZTV and / or there is limited to no potential for views towards or across the asset so that impacts to setting are unlikely. To aid description in this report, the 15 km Study Area around the CSA has been split into four quadrants. All plates are taken from Figures 9.10-13 in the EIA Report.

1.4 Assets to the North-west

Two Scheduled Monuments (SM13747, SM3311) are located in the north-west quadrant along with eight Locally Designated Assets of 'National Significance' (MDG11235, MDG11245-47, MDG75, MDG21444 and MDG21369). There are also 12 Listed Buildings (Category B and C) located within the settlement of Kirkconnel and around the settlement of New Cumnock.

The ZTV for the proposed Development suggests views 5-10 km from the CSA are limited to upland areas around and north of the A76 between Kirkconnel (c. 160m AOD) and the summit of Kirkland Hill (c. 507m AOD). Views beyond Kirkland Hill to the north-west are blocked by topography. South of the A76, views of the proposed Development are restricted to hilltop locations above 350 m AOD.

The ZTV for the proposed Development suggests views 10-15 km from the CSA are limited to a thin strip of land on the southern slopes of Craigdullyear Hill, north of New Cumnock. Additionally isolated viewpoints are located around Auchitench Hill and surrounding peaks above 400m AOD. The settlement of New Cumnock falls completely out with the ZTV.

Of 22 heritage assets located within the north-west quadrant only SM13747, MDG75, MDG21444, MDG216369 and a cluster of five Listed Buildings around Kirkconnel fall within the ZTV.

Of the 9 assets located within the ZTV, MDG21444 records the location of a Medieval farmstead and quarry. This asset is located more than 8 km from the CSA and long distance views towards the CSA do not contribute to the setting of the asset. As such, this asset will be sieved from the assessment. MDG75 records the same asset as SM13747 and as such will not be taken forward to assessment. All of the remaining assets located within the ZTV will be taken forward to assessment.

A total of seven heritage assets from the north-west quadrant will be taken forward for assessment, inclusive of eight Nationally Designated Assets and one Locally Designated Asset of 'National Significance'.

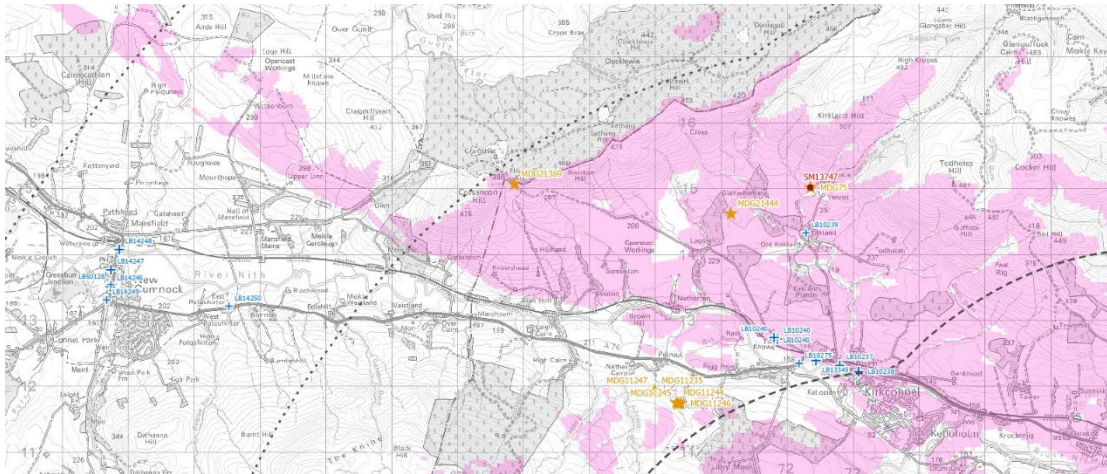

Plate 2: Location of heritage assets in the north-west quadrant in relation to the ZTV

1.5 Assets to the north-east

Five Scheduled Monuments (SM678, SM90310, SM5597, SM5817 and SM13677) are located in the north-east quadrant along with five Locally Designated Assets of 'National Significance' (MDG21689, MDG235, MDG13074, MDG9466 and MDG22308) and 2 Conservation Areas (CA180 and CA393). There are also 15 Listed Buildings (2 Category A and the remaining buildings Category B and C) and a single Garden and Designed Landscape (GDL00339) within the north-east quadrant. The built heritage assets are primarily located around the historic villages of Wanlockhead and Leadhills, with a third small group of listed buildings around the hamlet of Dalveen.

The ZTV for the proposed Development suggests views 5-10 km from the CSA are limited to upland areas around above c. 400 m AOD with the Brown Hill, Auchensow Hill and Dalpeder Hill on the edge of the 5 km Study Area providing a screen to lowland assets.

The ZTV for the proposed Development suggests views 10-15 km from the CSA are limited to hilltops above c. 500 m AOD scattered north and south of the villages of Wanlockhead and Leadhills. Both of these historic settlements, their Conservation Areas, Listed buildings and Garden and Designed Landscapes fall out with the ZTV of the proposed Development.

Of 28 heritage assets located within the north-east quadrant only SM4275, and MDG13074 fall within the ZTV.

Of the 2 assets located within the ZTV, SM4275 records a hilltop Cairn located some 12.5 km north of the CSA and some 15 km from the nearest turbine of the proposed Development. Whilst long distance views play a role in the cultural significance of this asset, a distance of 15 km is thought to be too great for the proposed Development to have a significant adverse impact to setting. As such, this asset will not be taken forward to assessment. Asset MDG13074 records a Medieval to post-Medieval mine on the slopes of Green Hill, just outside of Wanlockhead. This asset is located 9 km from the CSA and some 12 km from the nearest turbine of the proposed Development. Long distance views do not play a role in the setting of this asset and there are no historic links to the CSA, as such this asset has been sieved out of any further assessment. Other assets outwith the ZTV in the north-east quadrant have no historic link to the CSA and as such are sieved out.

No assets in the north-east quadrant will be taken forward to assessment.

Only two heritage assets are located within the south-west quadrant. These consist of a single Scheduled Monument (SM2238) and a Locally Designated asset of 'National Significance' (MDG9425). The ZTV indicates only very limited views of the proposed Development from within this quadrant. Between 5-10 km views are limited to hilltop locations above 450 m AOD (above Ordnance Datum). Between 10-15 km views are even more limited to a small group of hills at 500m AOD clustered around Moorbrock Hill, located c. 14 km to the south-west of the CSA.

1.7 Assets to the south-east

All remaining assets fall within the south-east quadrant, consisting of 20 Scheduled Monuments, five Conservation Areas, 179 Listed Buildings (inclusive of nine Category A buildings); one Garden and Designed Landscape and seven Locally Designated Assets of 'National Significance'.

The ZTV for the proposed Development suggests very limited visibility of the proposed turbines from across the south-east quadrant at distances of between 5 and 15 km from the CSA, visibility being limited to west facing sides of hills to the north and east of the A76/A702.

Ten heritage assets are located within this relatively narrow area of visibility, including one Scheduled Monument (SM681), one Locally Designated Asset of 'National Significance' (MDG146), one Conservation Area (CA496) and seven Listed Buildings (inclusive of one Category A building). Of these buildings, five are located in and around Durisdeer, 12.8 km from the CSA and 14 km distant from the nearest turbine of the Proposed Development. The remaining two listed buildings are located in and around the small hamlets of Kirkbride and Coshogle, 9 km distant from the CSA.

Of the ten assets located within the ZTV, MDG146 and SM681 relate to the same heritage asset. As such, MDG146 will be sieved out of any further assessment. The Listed Building located at Coshogle (LB3880) records a Category B Post-Medieval farmhouse and steading. This asset is located 9 km from the CSA and distant views towards the CSA do not contribute to its setting. As such, this asset has been sieved out of the assessment.

Within the south-east quadrant a total of eight Nationally Designated heritage assets, all of which are located within the ZTV, will be taken forward to assessment.

The remaining assets outside the ZTV have no historic link to the CSA and as such are sieved out of any further assessment.

2. SUMMARY OF ASSETS SCOPED OUT

A review of the Zone of Theoretical Visibility (ZTV) and heritage assets, as described in the preceding section, has resulted in 227 Nationally Designated heritage assets (26 Scheduled Monuments, 199 Listed Buildings, two Gardens and Designed Landscapes) and six Regionally Designated Conservation Areas being sieved out of consideration. A further 19 Locally Designated Assets of 'National Significance' have also been sieved out of the forthcoming assessment. The final selection of assets scoped out of consideration are detailed in Table A9.3.1.

3. ASSETS SELECTED FOR SETTING APPRAISAL

A review was undertaken for all designated heritage assets between 5 and 15 km to identify heritage assets for inclusion in the consideration of changes to setting. Between 5 and 15 km from the CSA there are 244 Nationally Designated Assets:

- 28 Scheduled Monuments;
- 7 Conservation Areas,
- 207 Listed Buildings; and
- 2 Gardens and Designed Landscapes

Between 5 and 15 km from the CSA there are a further 21 Regionally Designated Assets of 'National Significance'.

The Zone of Theoretical Visibility of the turbines indicates that the greatest potential intervisibility between heritage assets and the Development is focused to the north-west and north-east of the CSA, with a small sliver of upland visible to the south-east as shown on EIA Report Figures 9.10-13.

The final selection of heritage assets included in the assessment is based on the location within the ZTV, historic association with the CSA, or where views across an asset may include the Proposed Development with consideration for the contribution of long-distance views and distant landscape context to setting. Based on the sieving exercise outlined within this document, 227 nationally designated heritage assets (26 scheduled monuments, 199 listed buildings, two Gardens and Designed Landscapes), six regionally designated conservations area and 19 Locally Designated Assets have been sieved out of consideration for changes to setting. All remaining assets within the 15 km Study Area have been included within the setting assessment. The final selection is detailed in Table A9.3.2 and includes 13 Nationally Designated heritage assets (two scheduled monuments, 11 Listed Buildings) as well as one regionally designated Conservation Area and two Locally Designated Assets of 'National Significance'.
