

## **Wind Farm Project Name Change**

### **True Blew Wind Farm becomes Bullawah Wind Farm**

AUGUST, 2022

Renewable energy company BayWa r.e. Projects Australia is announcing a name change for its proposed wind farm near Hay, NSW.

The project on grazing land 30km southeast of Hay was launched earlier this year as True Blew Wind Farm.

The name has been changed to Bullawah Wind Farm effective immediately.

Bullawah was chosen after public input during a series of community information sessions held in Coleambally and Hay in May, 2022. The new name better reflects the site's location by referencing the property of one of the project's landowners.

Bullawah Station is in the middle portion of the wind farm site and represents a large section of the overall project. It covers approximately 12,000 hectares of the project site and is well known in the area, offering better context for the location.

Our contact email address has changed to [bullawah-windfarm@baywa-re.com](mailto:bullawah-windfarm@baywa-re.com) though the old address will continue to be monitored.

Our direct phone number remains the same (02) 9199 4851 and our new website address is [bullawah-windfarm.com](https://bullawah-windfarm.com)- a re-direct is in place for anyone landing on the old website address.

BayWa r.e. Projects Australia would like to thank the community for its ongoing input to the project.

Kind Regards,

Aidan O'Mahony
