

FLEX at BAU 2023: Hall C6, Stand 422

FLEX extends its range of accessories with versatile multi-tool and bit sets

Steinheim, March 2023 – Well-organised and effective accessories are crucial when it comes to using power tools efficiently. That's why just in time for BAU 2023, FLEX-Elektrowerkzeuge GmbH is expanding its extensive range of accessories to include versatile multi-tool and bit sets.

At BAU, FLEX is unveiling two multi-tool sets with attachments for working on wood, metal and tiles to go with the FLEX MT 18.0-EC C cordless multi-tool. Specially designed for wood and metal, the SM BI-SET VE3 set has three robust and durable blades. These are suitable for example for grooving or cutting wood, hard wood or plastic, and for cutting non-metallic cables and pipes as well as non-hardened nails, screws and profiles. The sophisticated design of the blades aids precise cutting and prevents chips and abrasion.

Multi-tool set for tiling jobs

FLEX has another multi-tool set especially for tiling jobs in the shape of the three-piece SM/RM SET VE3. The multi-tool blades it contains are designed especially for routing joints and cut-outs, removing mortar and glue residues and cutting nails, copper pipes and plasterboard or even for rasping wood cuttings. The robust carbide blades ensure fast removal and boast a long service life.

Bit sets for more tidiness and clarity

The new handy bit sets now make screwing jobs with FLEX power tools even faster and easier. The flexible sets are available either empty with 41 slots or filled with 25 or 41 different bits. The contents of each box can be individually determined so that the most frequently needed bits can be selected during the ordering process. For optimum tidiness during transport and storage, the sets can be stacked inside and on top of each other, and can be bundled in a stack

with a lock on the side. A reliably-closing latch opens and closes the boxes.

About FLEX

For FLEX-Elektrowerkzeuge GmbH, based in the south German town of Steinheim/Murr, the craftsman comes first. For this reason, this renowned power tools manufacturer has for over 90 years been going to wherever these are used: Building sites, workshops and factories. Continuous dialogue and many years of experience mean that FLEX is constantly coming up with new and innovative solutions that ensure better and more economical working. FLEX products have already received many awards, including the Plus X Award 2020, 2019 & 2014, and the Red Dot Design Award 2018 & 2014, and the 'Designpreis Deutschland' 2011 and the IF product design award 2011. FLEX currently employs 240 people and sells its products via a global network of trade vendors. More information is available at www.flex-tools.com

In our texts, the generic masculine is used for better readability. Female and other gender identities are explicitly included as far as it is necessary for the statement.
