

SCULPTING

Nocturne Sculpted line

berlin
PACKAGING

From a timeless symbol of elegance to **a new expression of glass design**

The **Nocturne Sculpted line** reimagines the iconic Nocturne bottle for spirits through a refined modelling of the base, achieved with **Sculpting** — a **fast and innovative glass customization approach** that maintains the bottle's timeless and recognizable shape while introducing bold, distinctive details which **give the packaging a unique visual and tactile identity**.

Sculpting preserves the original shape of the bottle, enriching it with **a punt developed to enhance the design**, introducing an innovative concept of personalization while reducing weight and materials.

Each Nocturne Sculpted bottle is paired with a **Vinolok™ glass closure** — an elegant and functional solution, fully recyclable and ideal for high-end spirits — ensuring a perfect balance between aesthetics, functionality, and sustainability.
