

SCULPTING

Ribs glass bottles

berlin
PACKAGING

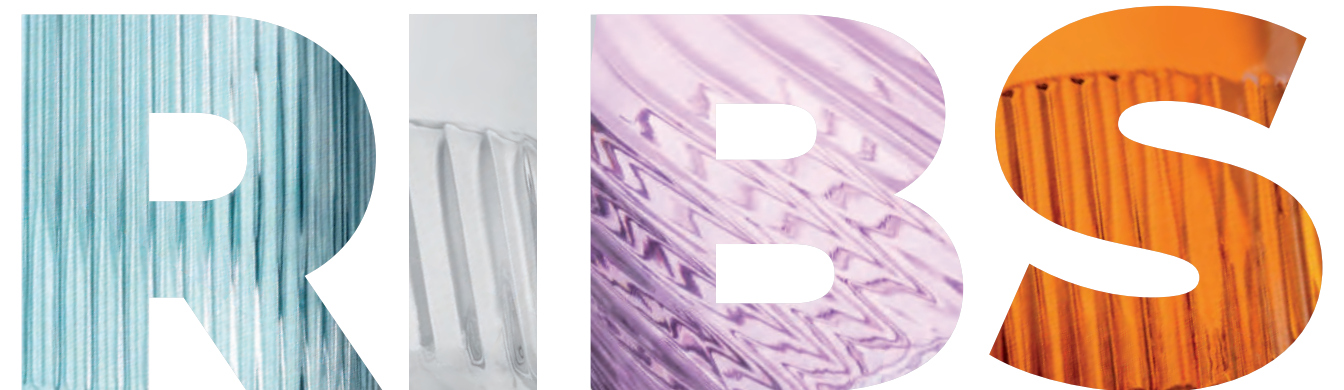

A perfect balance of aesthetics & functionality in premium packaging

The **RIBS glass bottle collection** brings together four of our Spirits best-sellers, reimagined through **Sculpting**, an innovative approach that gives the packaging a **unique visual and tactile identity** through **different types of ribs** (clean, bold, oblique) enhancing their design while preserving the soul of their original forms.

Sculpting is a **fast, safe and engineered glass premium customization** technique, applied only in selected areas of the bottle. It delivers distinctive aesthetic effects while **preserving smooth central surfaces for labels and decorations**, ensuring a bold yet production-ready transformation.

Ribs bottles can be matched with **Vinolok™ glass closures**, an elegant and functional solution that is fully recyclable and ideal for high-end spirits, ensuring a perfect balance between aesthetics, functionality and sustainability.

SLIM RIBS

PERFECT MATCH WITH

VINOLOK CLOSURES
