APPLICATION

FUTURefill is the perfect refillable packaging solution for Skincare & Makeup emulsions:

- Serum • Face Cream • Moisturizer • Liquid Foundation
- Face Primer • Highlighter • BB & CC Cream • Concealer

DECORATION

Accessories decoration

Apply your logo or get a unique look!

Accessories can be customized with many decorations: screen printing, hot stamping, metallization.

Glass decoration

External varnishing, metallization, acid etching, partial acid etching, screen printing, organic and ceramic screen printing, 3D inkjet, UV screen printing, "precious metals" screen printing, hot stamping, inkjet, laser etching.

TECHNICAL DETAILS

BOTTLE 30 ML with connector, pump and cover

NECK: 24/410
SHAPE: ROUND
BOTTLE MATERIAL: GLASS
DIAMETER: 35.4 mm
HEIGHT with MAKY COVER: 107,6 mm
CONNECTOR MATERIAL: LDPE
ACTUATOR MATERIAL: PP
COLLAR MATERIAL: PP
COVER MATERIAL: PP
Accessories: cream pump with cover
or safety clip

REFILL BOTTLE 30 ML with connector and cap

NECK: 24/410
SHAPE: ROUND
BOTTLE MATERIAL: GLASS
DIAMETER: 35.4 mm
HEIGHT with CAP: 84.3 mm
CAP MATERIAL: PP | ALU + PP

CONNECTOR

SHAPE: ROUND
MATERIAL: LDPE

MAKY 35 - 24/410 CREAM PUMP with cover or safety clip

NECK: 24/410
SHAPE: ROUND
COLLAR MATERIAL: PP in MATTE
& SHINY FINISH
DIAMETER: 32 mm
DOSING: 250 mcl

COVER

SHAPE: ROUND
DIAMETER: 35 mm
MATERIAL: PP in MATTE,
SHINY & METALLIZED FINISH

SAFETY CLIP

MATERIAL: PP in MATTE
FINISH

GAME CHANGER CONNECTOR TECHNOLOGY

FUTURefill

Berlin Packaging Beauty introduces a **patent-pending recharge system** that redefines sustainable beauty packaging. Engineered to prevent the standalone use of the refill, **it ensures the continued use of the original bottle and pump for up to 25 refills** - extending product life and minimizing single-use waste.

This innovation merges hygiene and luxury aesthetics with a design that is both user-friendly and sustainable.

key component *the connector*

A NEW WAY TO REFILL & REUSE

The consumer can't use the standalone product inside the refill bottle without the connector.

THE REFILL SYSTEM

The connector ensures a clean and controlled refill experience. By locking the dip tube inside the refill bottle, it prevents product leakage and minimizes the risk of contamination, enhancing both hygiene and functionality.

a new connector inside every new refill bottle

PRODUCTION JOURNEY

01.
filling

All glass bottles are **filled on the same line** optimizing purchase & supply chain for both the main product and the refill.

02.
assembly

Connectors are assembled on all bottle-necks. **The connector and the geometry of the top part (similar to a wiper) lock the bulk in the bottle.**

03.
pump
assembly

The main products (first sale) are assembled on the bottle with the **pump engine connected now with the connector**, ready to use as a normal product.

03.
locking cap
assembly

Refill bottles are closed with a **locking cap that plugs into the connector body** locking the bulk and keeping the connector clean.

CONSUMER JOURNEY

BUY, REUSE, REFILL...REPEAT!

UNPACKING Y/OUR SUSTAINABILITY POTENTIAL

REUSE
reusable & refillable
CIRCULARITY
separable components

Reusable & Refillable: thanks to the connector, FUTURefill allows to maximize the use of the most technical and environmentally impactful component in a dispensing system: the pump. Customers can reuse the pump up to 25 times, thanks to the innovative mechanism designed by Berlin Packaging Beauty.

Separable components: the connector can be removed at the end of packaging life cycle and separated from glass to facilitate proper disposal by consumers.
