Our **Metal-free Pumps** — available in both airless and atmospheric systems — are designed to simplify material compatibility while delivering a refined, precise beauty gesture. **Entirely free of metallic components inside the dispensing chamber and formulated without POM**, they result in a purified material architecture paired with a premium sensory experience.

# UNPACKING Y/OUR SUSTAINABILITY POTENTIAL

**CIRCULARITY**  
designed for recycling

**Designed for recycling:** by removing metal components, Metal-free Pumps are designed to simplify recycling processes and support a more circular packaging approach. Their streamlined plastic structure reduces material complexity and improves waste sorting, helping brands move towards packaging solutions **reducing environmental impact** without compromising performance or design quality.
