AISE

The first Bordelais dedicated to sparkling wine

A Bordelais bottle with a generous diameter and slightly reduced height - the most classic and widespread design for wine bottles. What's new is that its pressure resistance exceeds that of traditional sparkling wine bottles. A disruption of traditional standards made possible by persistent design research and ongoing study of the mechanical properties of glass. With Aise, the rules of form change and ways of expression multiply.

EXCELLENT CORK®
SYNTHETIC MATERIAL

An alternative to the micro-agglomerated or agglomerated stopper, it's created from polymers and characterised by its elasticity, and its best advantage is the absence of TCA.
