**Advanced Care,  
Exceptional Compassion**

## OUR VISION & MISSION

### Our Mission

Vanguard Animal Hospital exists to provide data-driven, compassionate veterinary care that swiftly delivers accurate diagnoses and effective treatments. By combining state-of-the-art diagnostic technology with a patient-centric, low-stress environment, the hospital helps pets and their families thrive. Through a preventative care membership model and specialized, acoustically optimized care pathways, it aims to stabilize operations, foster lasting client partnerships, and elevate the standard of companion-animal medicine so no family must face preventable health challenges alone.

### Our Vision

In twenty years, Vanguard Animal Hospital envisions a world where advanced, non-invasive diagnostics and empathetic, premium care redefine routine pet health. It aspires to be the first choice for families seeking proactive, AI-enhanced veterinary excellence, a trusted leader in patient wellbeing, and a benchmark for compassionate, data-supported care that sustains healthy bonds between people and their pets.

## Project Phases

Funding round is aimed to accelerate the development of Phases and create core infrastructure for operations.

Investment will be used to finance CAPEX, WC buffers, etc.

Vanguard Animal Hospital redefines veterinary medicine by merging state-of-the-art diagnostic technology with a low-stress, patient-centric design paradigm. The clinic moves beyond standard triage to offer comprehensive, data-driven companion animal care, utilizing AI-assisted imaging and non-invasive diagnostic suites to ensure swift, highly accurate treatment paths for clients who treat their pets as integral family members. Strategically, the hospital relies on a preventative care membership model to stabilize operational cash flow and foster long-term client retention. By creating separate, acoustically isolated sensory pathways for different species and maintaining a tier-one clinical staff, the enterprise achieves a premium market position, justifying higher-average invoice values through unmatched medical excellence and an empathetic client experience.

# The Main Phases: Projects & Impacts

# Product Impact on Core Stakeholders

| Main Stakeholder                    | Product Benefits                                                                                                              |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Pet Owners (Clients)                | Primary beneficiaries receiving high-quality, data-driven veterinary care for their companion animals.                        |
| Veterinary Clinicians & Staff       | Tier-one clinicians and support staff who deliver premium care and benefit from advanced diagnostics and optimized workflows. |
| Pet Insurance Providers             | Partners in care that align with preventative memberships and data-driven treatment pathways to manage risk and costs.        |
| R&D & Technology Partners           | Collaborators providing AI imaging tools, non-invasive diagnostics, and data insights to advance capabilities.                |
| Investors & Shareholders            | Stakeholders seeking sustainable growth through memberships, premium services, and scalable operations.                       |
| Local Community & Pet Care Networks | Community members and partner organizations benefiting from improved pet health outcomes and access to high-standard care.    |
| Regulators & Accreditation Bodies   | Entities ensuring compliance with veterinary care standards, safety, privacy, and data governance.                            |

# Key Performance Components

## Competitive Advantage

### Advanced Diagnostic Toolkit

Vanguard Animal Hospital leverages AI-assisted imaging and non-invasive diagnostics to deliver swift, precise treatment paths, reducing unnecessary procedures and enhancing diagnostic confidence for companion animals.

### Low-Stress, Family-Centric Design

The clinic uses acoustically isolated sensory pathways and a patient-centric flow to minimize stress for pets and improve client experience, supporting higher client satisfaction and loyalty.

### Preventive Membership Model

A preventative care membership stabilizes cash flow, drives long-term retention, and enables premium service levels by aligning veterinary excellence with ongoing, predictable client commitments.

## Marketing and Growth Strategy

|------------|----------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| I          | <div> Pet Parents Seeking Preventive Care</div>       | Proactive owners who value regular wellness visits, memberships, and data-driven insights to keep their pets healthy and catch issues early.                 |
| II         | <div> Owners of Multi-Pet Families</div>              | Clients with two or more pets who benefit from streamlined memberships, coordinated care plans, and bundled services across species-specific pathways.       |
| III        | <div> High-Economic-Value Clients</div>               | Pet owners willing to pay premium for premium service, longer appointment times, acoustically optimized visits, and access to tier-one clinicians.           |
| IV         | <div> First-Time Pet Adopters</div>                   | New pet guardians seeking a trusted, low-stress clinic experience and education on preventive care to establish lifelong healthy habits.                     |
| V          | <div> Tech-Savvy Pet Owners</div>                     | Clients attracted to AI-assisted diagnostics, data dashboards, and non-invasive testing that provide clear treatment rationales and personalized care plans. |
| VI         | <div> Emergency-Prevention Conscious Families</div> | Families prioritizing rapid, accurate triage with a focus on prevention to reduce emergencies through early detection and robust wellness programs.          |
| VII        | <div> Referral Networks &amp; Partners</div>        | Veterinarians, shelters, and breeders who refer patients to Vanguard for its premium, data-driven approach and specialized pathways.                         |

Solution from Phase I to Phase IV

Painpoints

# Strategic Analysis: SWOT

Strength

Premium, data-driven veterinary care with AI-assisted imaging differentiates Vanguard, enabling rapid, accurate diagnoses and high client satisfaction.

Weaknesses

High operating costs from tier-one staff, advanced tech, and acoustic room design may pressure margins during slower periods.

Opportunities

Growth in preventive membership plans drives predictable revenue and loyalty; expanding telemedicine and AI tools can broaden service mix and geographic reach.

Threats

Regulatory changes, tech maintenance costs, and competition from premium clinics could erode market share and inflate capital expenditure.

Pestel: Analysis

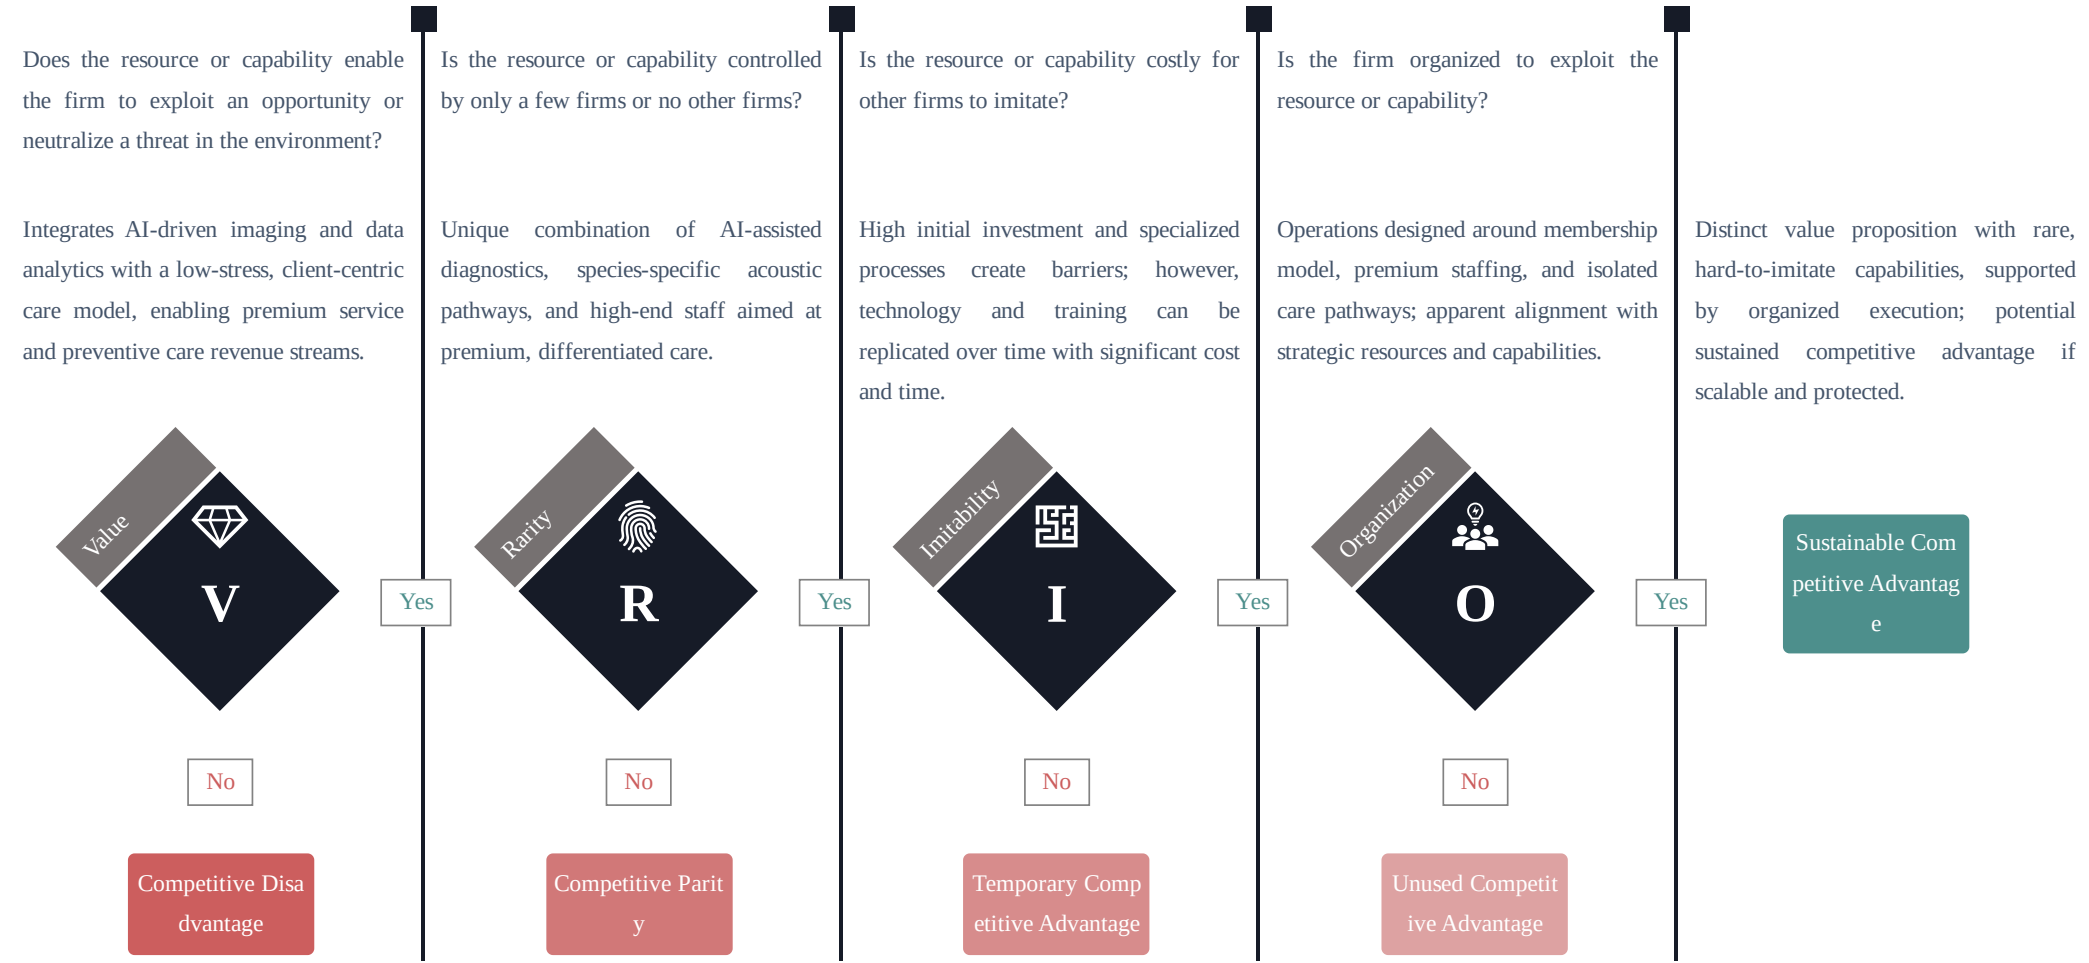

|                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                          |                                                                                                                                                                                                                          |                                                                                                                                                                                                        |                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                  |                                                                                     |        |                                                                                     |        |                                                                                     |        |

| 6       | Create premium service design and pricing model for predictive health management offerings         | ● | Not Started | Medium   | CPO  | M03 2027 |
| 7       | Secure regulatory approvals and ethical review for disruptive wellness ecosystems                  | ● | Not Started | Medium   | CLO  | Q1 2027  |
| 8       | Develop long-term investment plan and capital roadmap to fund disruptive initiatives               | ● | Not Started | Low      | CFO  | Q2 2027  |

# Core Risks & Mitigation Strategies

## 1. Operation and maintenance risks

| # | Risk Type                                               | Area | Mitigation Strategy                                                              |
|---|---------------------------------------------------------|------|----------------------------------------------------------------------------------|
| 1 | Equipment downtime and medical device failures          | CIO  | Implement redundant hardware, regular preventative maintenance, and vendor SLAs. |
| 2 | Data integrity and system interoperability failures     | CIO  | Adopt standardized data formats, APIs, and integrated EHR with audit trails.     |
| 3 | Cybersecurity and data privacy threats                  | CISO | Implement zero-trust architecture, encryption, and regular security audits.      |
| 4 | Scalability constraints with membership model           | COO  | phased capacity planning and scalable staffing models.                           |
| 5 | Reliance on specialized acoustically optimized pathways | CFO  | Develop modular, adaptable spaces with scalable acoustic solutions.              |

## 2. Regulatory and legal risks

| # | Risk Type                                            | Area | Mitigation Strategy                                                           |
|---|------------------------------------------------------|------|-------------------------------------------------------------------------------|
| 1 | Data privacy and patient (pet owner) data compliance | CIO  | Implement robust HIPAA/GDPR-aligned data governance and privacy-by-design.    |
| 2 | Medical device and AI software compliance            | CRO  | Engage regulatory affairs early; maintain 510(k)/FDA pathways and validation. |
| 3 | Professional licensing and scope of practice risk    | CLO  | Continuous credentialing, SOPs, and regular training audits.                  |
| 4 | Animal welfare and ethics compliance                 | CSO  | Establish animal welfare review board and ethical approvals for new tech.     |
| 5 | Antitrust and competition/market access              | CFO  | Transparent pricing, independent billing audits, antitrust counsel review.    |

# Core Risks & Mitigation Strategies

## 3. Strategic/Market Risk

| # | Risk Type                              | Area | Mitigation Strategy                                                        |
|---|----------------------------------------|------|----------------------------------------------------------------------------|
| 1 | Competitive landscape shifts           | CEO  | Differentiate through data-driven outcomes and superior client experience. |
| 2 | payer mix and reimbursement volatility | CFO  | Develop direct-to-consumer services and transparent pricing.               |
| 3 | Technology adoption risk               | CIO  | Invest in robust validation, training, and vendor diversification.         |
| 4 | Membership model sensitivity           | CFO  | Iterate membership tiers and offer flexible commitments.                   |
| 5 | Talent retention and premium staffing  | CHRO | Competitive compensation, career development, and a strong culture.        |

## 4. Finance risk

| # | Risk Type                         | Area | Mitigation Strategy                                                 |
|---|-----------------------------------|------|---------------------------------------------------------------------|
| 1 | Cash Flow Variability             | CFO  | Implement diversified revenue mix and reserve funds for volatility. |
| 2 | Debt/Leverage Risk                | CFO  | Maintain prudent leverage and stress-test scenarios.                |
| 3 | Pricing/Revenue Recognition       | CFO  | Adopt transparent pricing and GAAP-compliant revenue policies.      |
| 4 | Membership Revenue Sustainability | CFO  | Monitor churn, adjust tiers, and optimize member incentives.        |
| 5 | Capital Expenditure Overrun       | CFO  | Implement capex gates and ROI reviews before approvals.             |

## 5. Other general risks

| # | Risk Type                            | Area | Mitigation Strategy                                                                   |
|---|--------------------------------------|------|---------------------------------------------------------------------------------------|
| 1 | Reputation and client trust risks    | CEO  | Proactive patient feedback loops and transparent incident reporting.                  |
| 2 | Data privacy and cybersecurity risks | CIO  | Robust encryption, regular security audits, and incident response plan.               |
| 3 | Reliance on high-cost talent supply  | CFO  | Competitive compensation, ongoing training, and partnerships with veterinary schools. |
| 4 | Technology obsolescence risk         | CTO  | Vendor roadmap governance and regular platform upgrades.                              |
| 5 | Member retention risk                | CMO  | Tiered membership benefits and personalized care plans to boost loyalty.              |

# Market Overview (TAM, SAM and SOM)

# Funding Allocation

The funding will be used to finance the CAPEX and cash deficit from Year 1 operations, aiming to expedite the development process. In subsequent years the company plans to sustain operations without requiring major additional capital injection.

Table below presents the overview of expected inflows and outflows.

The total investment required is \$ 526k

| Y1 Cash Flow Stream (thnd USD)       | Inflows | Outflows |
|--------------------------------------|---------|----------|
| Gross Profit                         | 159     |          |
| Payroll Expenses                     |         | 20       |
| Rent & Utilities                     |         | 5        |
| Marketing and Branding               |         | 3        |
| Other Miscellaneous                  |         | 3        |
| CAPEX                                |         | 526      |
| Legal and Professional Fees          |         | 2        |
| Training and Development             |         | 2        |
| Office supplies                      |         | 2        |
| Communication Expenses               |         | 1        |
| Representation and Entert.           |         | 1        |
| CAPEX & WC shortage Y1               |         | 405      |
| Buffer                               |         | 121      |
| Total Required Investment (thnd USD) |         | 526      |

# Revenue Formation Narrative

Vanguard Animal Hospital targets a sizable total addressable market of 21,200,000k USD, reflecting the broad demand for premium, data-driven companion animal care in the ambulatory health space. The SAM narrative indicates the serviceable portion of this market is 0, anchored by a membership-driven model that stabilizes cash flow and elevates client lifetime value through preventive care and high-touch diagnostics. The SOM trajectory demonstrates early, prudent market capture with 1 in Year 1, expanding to 1 in Year 2 and 1 in Year 3 as patient retention and referrals compound, supported by premium staffing and AI-assisted imaging capabilities. Revenue growth is driven by four lines of business that together reflect the aligned mix: Memberships contributing 35, Vet Visits contributing 25, Diagnostics contributing 20, and Other contributing 20. The Year 1–3 revenue path totals 397.5k USD, 611.037k USD, and 830.661k USD, corresponding to the aspirational but achievable scale of memberships, visits, diagnostics, and ancillary services. The capital requirement of 526k USD underpins modern diagnostics, data-driven treatment paths, and a premium client experience while maintaining unit economics driven by a high-margin membership base. This plan anticipates a measured but sustained growth curve as client base, referral networks, and premium services scale within the TAM and SAM, with LOB contributions aligned to the stated percentages and a disciplined, customer-centric model that preserves premium pricing and service quality over time.

## Assumptions:

- invoices are paid in 30 days;
- half of admin expenses except salaries is prepaid;
- inventory is built for the next month;
- half of admin expenses except salaries is paid in 30 days;
- salaries are paid in the same month;
- interest expenses are paid in the next month.

- salaries are paid in the same month;
- half of admin expenses except salaries is prepaid;
- half of admin expenses except salaries is paid in 30 days;
- interest expenses are paid in the next month.

## Required Return on Equity Derivation

Methodology

Weighted Average Cost of Capital is calculated using Capital Asset Pricing Model (CAPM). Since the company is purely equity funded the WACC is equal to its Required Return on Equity R(E). The main research inputs used in calculations are based on studies published by professor at Stern School of Business Aswath Damodaran. Return on Equity R(E) is  $R(E)=R(F)+\beta * (ERP)$ , where: R(F) is Risk Free Rate. The basis for calculation of R(F) is the average of the yield of USD 30 Year TSY Bond. The horizon. ERP is Mature Market Equity Risk Premium. It incorporates market estimates for Rating-Based Default Spread and Default Spread Multiple ( $\beta$ ) is average equity betas of corresponding industries. Despite the company has no debt, the unlevered beta was levered with industry average figures to reflect the long-term D/E ration in the capital structure. Additionally, Illiquidity Risk Premium of 4% is added to the estimated Return on Equity to reflect risk associated with firm being Privately Held vs Publicly Traded Companies.

Additional Assumptions

To calculate the companies Firm Value, its future Free Cash Flow to Equity (FCFE) is discounted using estimated Required Return on Equity.

The 3rd-year projected cash flow is used as a representation of the long-term Free Cash Flow to the Equity (FCFE). This approach may understate the valuation because cash flows are expected to grow more aggressively in the first 10 years, and the growth from years 4 to 10 is not reflected in this calculation. Long-term growth rate of 5% is applied.

After discounting the cashflows and measuring the Firm Value it is adjusted to historical estimate of Start-up firm's survival rate. The allows to incorporate risk of start-ups fails.

Survival of new establishments

|                      | Proportion of firms that were started in 1998 that survived through |        |        |        |        |        |        |

Assumed 3Y Survival Rate

50%

Final Valuation

\$ 437k

The valuation is conducted using the Discounted Cash Flow (DCF) method. In this method, the projected cash flows for a period of 7 years, along with a terminal value, are discounted at a rate of 12.98 % to determine the Firm Value.

Starting from year 3 onwards, the cash flows are estimated to grow at a rate of 9.80 %, which is consistent with the market Compound Annual Growth Rate (CAGR) trend. Beyond year 7, the cash flows are assumed to grow at a long-term growth rate of 3.50 %.

To account for the inherent risks associated with a start-up venture, the Firm Value is adjusted using the historical survival rate of newly established firms. As indicated by the study conducted by Aswath Damodaran, there was approximately 50% probability of survival for Information sector companies. Taking into account the project's current stage of development and risk profile, the final survival rate has been assumed at 50%. This adjustment allows to incorporate the risk profile of the business and provide a more comprehensive assessment of its value.

It is important to note that if the company can successfully navigate through its initial three years of operation, it is expected to have a significantly higher likelihood of becoming a going concern. This underscores the importance of demonstrating resilience and establishing a solid foundation during the critical early stages of the business.

# Scenario Analysis: Narrative

Scenario analysis explores how external and internal factors influence key assumptions in financial planning. By analyzing potential positive and negative outcomes, company can better anticipate risks and opportunities when evaluating their future cash flows and overall valuation.

| KPI                 | Scenario | Narrative                                                                                                                                                                                                                                         | KPI affected by |
|---------------------|----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| Revenue             | Positive | This scenario reflects a favorable market environment or a strategic breakthrough, leading to higher projected revenue. It showcases the potential rewards of scaling and innovative approaches.                                                  | higher by 15%   |
|                     | Negative | This scenario accounts for challenging conditions such as economic downturns or market disruptions, forecasting a potential revenue decrease. It emphasizes the importance of adaptability and risk management.                                   | lower by 15%    |
| COGS                | Positive | This scenario demonstrates the benefits of operational efficiency or cost-saving strategies, resulting in reduced COGS. It highlights the value of innovation in supply chain and operations.                                                     | lower by 20%    |
|                     | Negative | This scenario addresses rising costs due to external pressures, resulting in an increase in COGS. It underlines the need for proactive cost-control measures.                                                                                     | higher by 20%   |
| Discount Rate (RoE) | Positive | This scenario assumes a decrease in the discount rate (RoE) due to improved market conditions, lower perceived risk, or favorable macroeconomic factors. A lower discount rate increases the present value of future cash flows, enhancing the... | lower by 10%    |
|                     | Negative | This scenario models an increase in the discount rate (RoE) driven by higher market risk, macroeconomic instability, or industry-                                                                                                                 | higher by 10%   |

| Growth Under Pressure | <p>This scenario explores the challenges of managing rapid growth while dealing with operational bottlenecks. A surge in demand and revenue places significant strain on supply chains and internal processes. Despite achieving higher sales volumes, inefficiencies in scaling lead to increased costs and a heightened risk perception, keeping the discount rate elevated. 'Growth Under Pressure' examines how businesses can balance seizing growth opportunities while investing in infrastructure, talent, and systems to support scalability.</p> | <div>Revenue</div> <div>Higher by 20%</div> | <div>COGS</div> <div>Higher by 30%</div>       |

| PaT Y3 Base     | 79    |
| Revenue Impact  | 166   |
| COGS Impact     | -319  |
| OPEX Impact     | -54   |
| Tax Impact      | 43    |
| PaT Y3 Stressed | -84   |

**Key Metrics:**

| Metric                 | Value    |
|------------------------|----------|
| Valuation              | -\$ 452k |
| Revenue Y3             | \$ 997k  |
| EBITDA                 | -\$ 25k  |
| Profit After Tax       | -\$ 84k  |
| Gross Profit Margin Y3 | 10.9%    |
| EBITDA Margin Y3       | -2.5%    |

# Stress Test: The Perfect Storm

Stress tests provide a comprehensive view of how businesses might perform under extreme conditions, enabling better preparation for the uncertainties of challenges.

| Scenario Name     | Story                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | KPIs impact                                |                                                   |

| The Perfect Storm | <p>This scenario simulates the convergence of adverse market conditions and rising operational challenges. A sharp downturn in market demand coincides with increased costs due to inflation and supply chain disruptions. The combination results in a dual hit to both top-line revenue and operational margins. Additionally, external factors such as economic instability elevate the discount rate, amplifying the pressure on future cash flows. Businesses facing 'The Perfect Storm' must focus on resilience through diversified revenue streams, cost-control measures, and contingency planning.</p> | <div>Revenue</div> <div>Lower by 10%</div> | <div>COGS</div> <div>Higher by 25%</div>          |

# Sensitivity Analysis: SAM & SOM

This sensitivity analysis evaluates the potential impact of changes in Serviceable Addressable Market (SAM) and Serviceable Obtainable Market (SOM) on key financial metrics. By simulating percentage variations in SAM and SOM, this analysis helps identify how shifts in market assumptions affect revenue, profitability, and overall valuation.

|                 |    | SAM     |         |         |         |         |         | SOM     |         |         |         |         |         |
|-----------------|----|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
