Overview

In autumn 2011, GfK EU3C conducted the 3rd European Quality of Life Survey (EQLS) in the 27 EU Member States on behalf of the European Foundation for the Improvement of Living and Working Conditions (Eurofound).

The 3rd EQLS survey does not include open ended questions and the need for coding was minimised through careful design of the questionnaire. As a result, no manual coding was required. The only coding actions that were conducted apply to existing coding schemes for closed questions that were adapted for use in the EQLS3 study.

This report provides a detailed description of the EQLS-3 coding process, including information on the international coding of regions (NUTS coding), the international coding used in EQLS3 for the respondents' occupation (ISCO), an international coding scheme to record people's income and finally an educational coding scheme (ISCED).

Coding methodology

The questionnaire was designed to minimise the need for coding. The coding process was implemented either by the interviewer during the interview (occupation, income) or at the data processing stage using the SPSS software (education, region).

Where interviewers had to code answers, they were thoroughly briefed on how to help respondents select the most relevant category. They were also provided with a glossary and examples in the local language(s).

SPSS-based coding was implemented using custom syntaxes. Country specific answer codes were recoded into standard classifications based on a code frame agreed upon in advance with Eurofound.

The coding process

1. Regions (NUTS)

National agencies provided the central coordination team with the NUTS2 codes for their country. These codes were used in the sampling frames¹ and to create a regional variable in the final data set.

The regional data obtained in this way was double-checked using a postal code recode per country. The postal recode is based on Eurostat data and additional data from national postal services. An example for Belgium can be found in annex A.

2. Occupation (ISCO)

The major codes of the ISCO-08 structure were included directly in the questionnaire. Each level was accompanied by a list of examples, including some country specific examples suggested by local teams to ensure respondents (and interviewers) can easily select the appropriate code. The categories and examples used in the questionnaire are available in annex B.

3. Income

The income question was split in two parts: an unprompted question asking respondents for their net monthly income and, in case of refusal or 'Don't know' answers, a prompted question. This question includes a table presenting income ranges in weekly, monthly and yearly terms, in the local currency. This table is available in annex C.

The master version, in euros, was converted to local currencies using the current exchange rate at the time of the questionnaire design and rounded to the nearest unit, while making sure that the figures are consistent both in terms of the differences between each category and between the daily, monthly and annual figures. The exact exchange rates used with their sources and dates on extraction, as well as the resulting national tables are available in annex C.

4. Education categories (ISCED)

Respondents were presented with lists of country (and language) specific education levels. These answers were converted into ISCED first digit categories to provide a harmonised education level variable.

¹ Please see sampling report for more details.

An example of coding for Belgium can be found in annex D and the full list of answer codes with their matching ISCED categories in annex E.

ANNEX A - Example of postal code to NUTS coding for Belgium

ANNEX B – Occupation question

OCCUPATIONS	
Manager	
	Such as business executive, managing director, finance manager, sales and marketing manager, human resource manager, senior government official, bank manager, hotel manager, restaurant manager, factory owner
Professional	
	Such as doctor, dentist, qualified nurse or midwife, lawyer, judge, architect, scientist, professor, teacher, engineer, IT professional, journalist, psychologist, accountant, artist
Technician or junior professional	
	Such as construction supervisor, air traffic controller, pilot, dental assistant, physical therapist, junior nurse, optician, broker, insurance agent, specialised secretary (like legal or medical secretary), police inspector, customs inspector, telecommunications engineering, real estate agent, credit and loans offices, IT supporting worker, sports instructor, photographer, chef
Clerical support worker	
	Such as secretary, switchboard operator, payroll clerk, typist, data entry clerk, post man, production clerk, bookkeeper, receptionist
Service worker	
	Such as travel attendant, cook, waitress, hairdresser, transport conductor, undertaker, driving instructor, building caretaker, health care assistant, child care worker, teachers' aide, fire-fighter, police officer, prison guard, security guard
Sales worker	
	Such as shop keeper, shop assistant, sales person, service station attendant, cashier
Skilled agricultural forestry and fishery worker –	
	Such as gardener, crop and animal producer, farmer, fisherman
Craft and related trades worker	
	Such as brick layer, carpenter, electrician, roofer, plumber, painter, welder, blacksmith, toolmaker, mechanic, upholsterer, tile-setter, printer, repair worker, instrument maker, foreman, motor mechanic, seamstress, baker, butcher, tailor, cabinet-maker, handicraft worker
Plant and machine operator or assembler	
	Such as miner, plant operator, machine operator, electronic equipment assembler driver, lifting truck operator
Elementary occupations	
	Such as cleaner, farm labourer, building construction labourer, hand packer, porter, unskilled factory worker, kitchen helper, street cleaner, garbage collector, messenger, meter reader, refuse sorter
Armed forces occupation
