SecureFeed

CARING FOR FOOD SAFETY

# Benefits of SecureFeed participant are

As a SecureFeed participant, you demonstrate to other companies that you contribute to ensuring the safety of Feed materials, Compound feeds and Feed additives. By doing so, you contribute to the safe production of animal products (milk, meat and eggs).

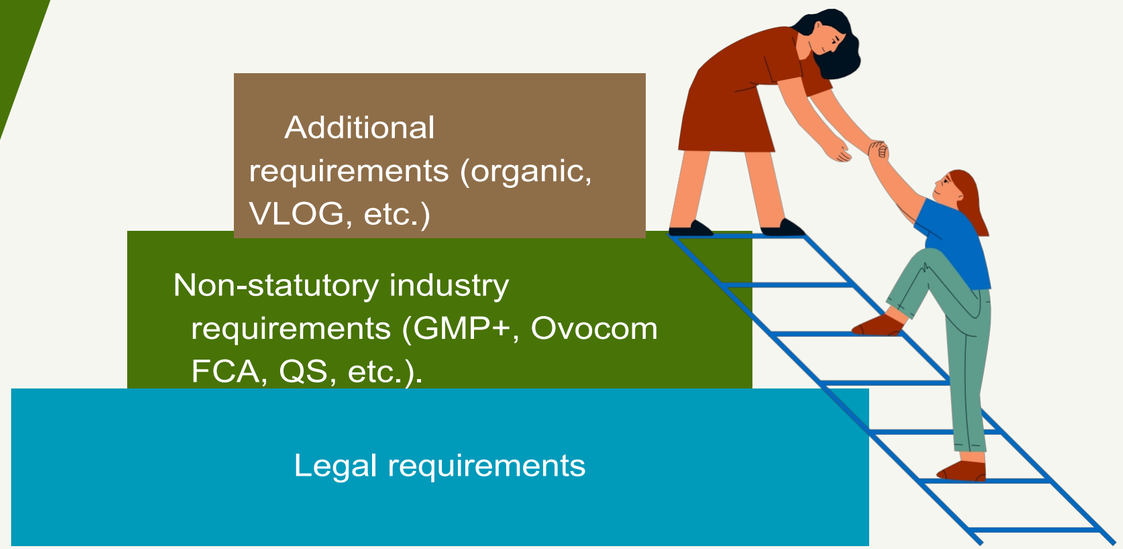
So you play an important role in the (animal) feed and food chain. But there are also benefits to being a SecureFeed participant for yourself.

Discover the benefits

# Requirements in the animal feed industry.

As a Supplier of Feed materials, Compound feed and/or Feed additives, you must comply with various **statutory and industry Non-statutory requirements**. You may even meet additional requirements such as organic or GMO-free.

**SecureFeed can help you** meet regulatory and Non-statutory requirements through **collective fulfillment** of requirements.



SecureFeed helps you meet legal and Non-statutory requirements by collectively fulfilling :

- **Monitoring:**
  - regular
  - dioxins and dioxin-like PCBs

# Animal feed industry requirements and costs

SecureFeed helps you meet legal and Non-statutory requirements by **collectively fulfilling** the requirements. Company-specific requirements you arrange yourself.

GMP+ and Ovocom FCA offer certification, SecureFeed also offers **support in completing certification requirements**.

All the requirements that SecureFeed helps you meet **no longer need to be taken care of yourself**. In addition, **the collective implementation saves you money** because SecureFeed distributes the costs proportionally among the Participants and makes good price agreements with laboratories, for example.

In addition to collective fulfillment, SecureFeed offers **several complementary activities** for your participation:

- **Monitoring** grains new crop (in addition to regular monitoring)
- **Price agreements** with laboratories
- **Auditor training**, both co- and lead auditor
- **Sounding Board**
- **Support in case of Notification**
- **Fast tracking and tracing**
- **Updates/Alerts** for **feed and food safety** alert
- Background information through **fact sheets**
- **News releases** to Participants via the website
- Access to the **participant section of the website**
- **Analysis of and insight into collective data**
- **Knowledge sharing and participation** in various working groups
- Access to the **SecureFeed handbook**
- Access to the **SecureFeed database**
