

This is the key!

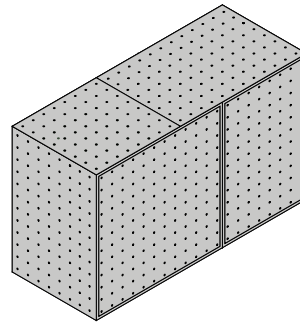

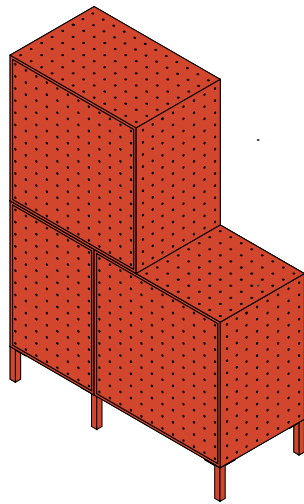

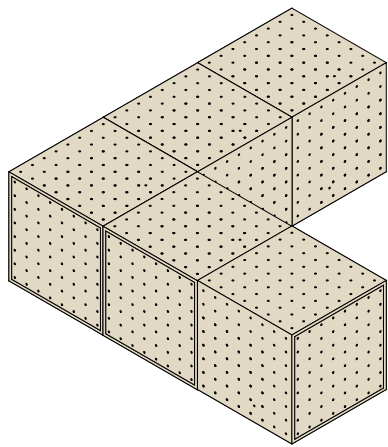

# Center

## CENTER CENTER, BY FUWL FOR STRING FURNITURE

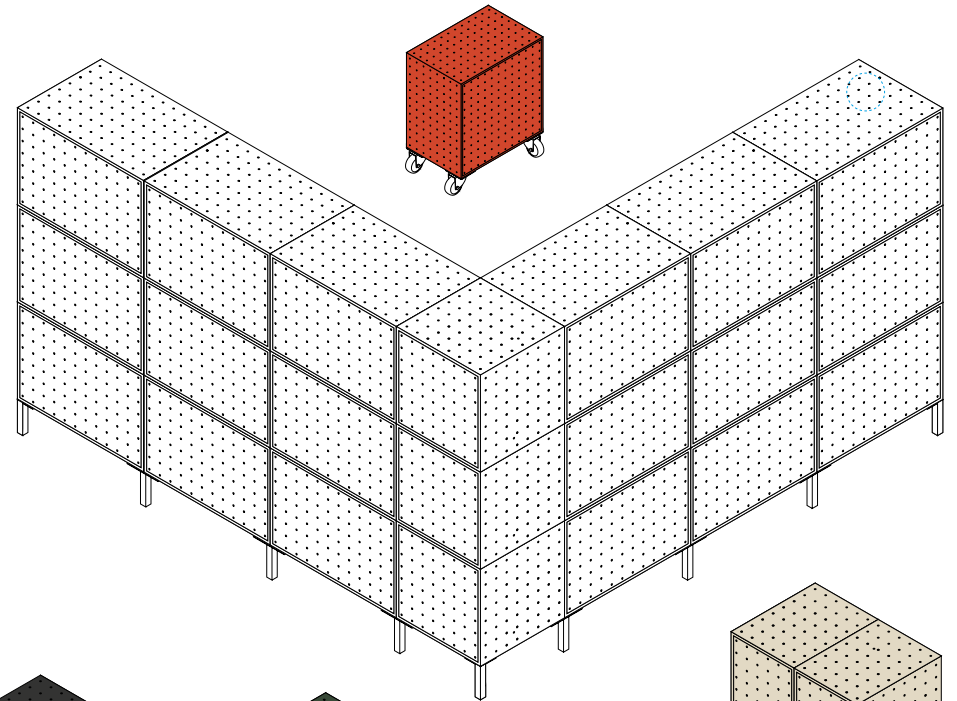

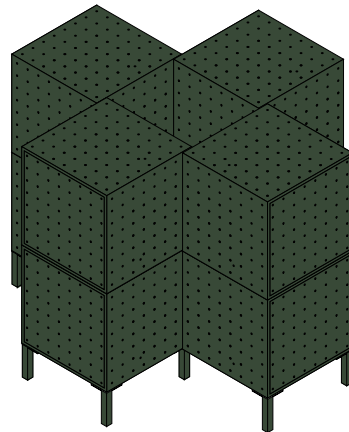

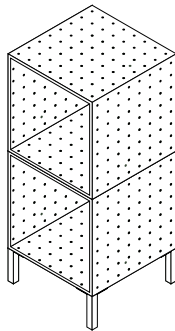

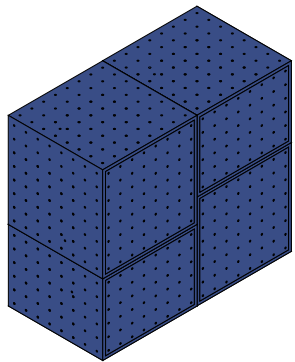

Center Center is a modular system from String Furniture, designed by Form Us With Love, made entirely of metal in a constructivist hole pattern. The system consists of modules that can be combined almost infinitely without restrictions, vertically and horizontally. The key to this flexibility is a special fitting, an ingeniously simple way to connect units, accessories and more through the hole pattern – however you choose to place them!

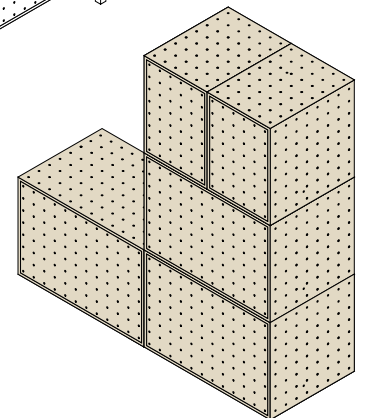

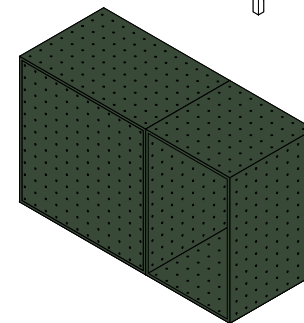

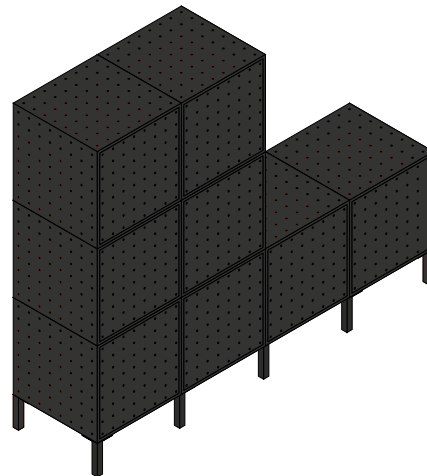

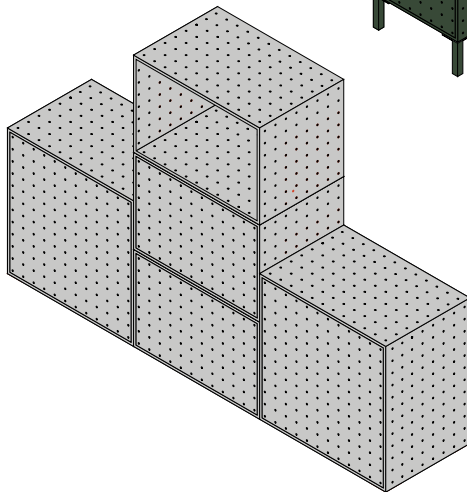

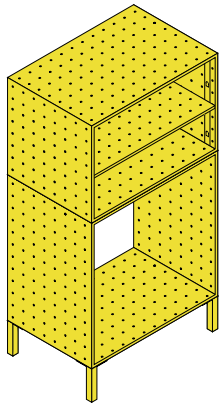

## COMBINATIONS, WITHOUT COMPROMISE

Its individual modules can come together to create almost anything you envision, offering multifunctional solutions. Connecting seamlessly, Center Center can create open or hidden storage. Be tucked away in corners or divide spaces - becoming whatever you need now, and again in the future. This is modular minimalism made for the modern office and beyond, with flexibility and collaboration in mind.

## EVERY DETAIL, DOWN TO YOU

There is a host of accessories designed to fit with the hole pattern in order to customise the modules: The doors can have a push mechanism, a simple U-handle or a bluetooth lock. Add an extra dimension with external shelves, trays and hooks to optimise your design further.

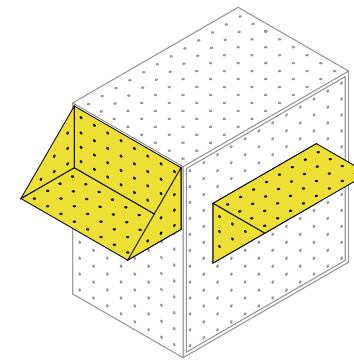

Finally choose between legs, connecting legs, wheels - or stay close to the ground with rubber pads.

## DIMENSIONS, FOR INFINITE COMBINATIONS

Center Center comes in six sizes, depending on the position of shelves and doors - horizontally vs vertically. All sizes have a depth of 40 cm (which is why we only refer to height and width below) and can be combined almost infinitely, independent of size.

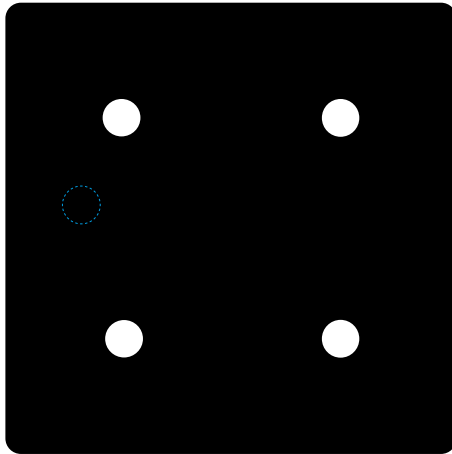

"Static storage is a notion of the past. Center Center challenges this idea by offering a solution that evolves with the user's needs, both now and into the future. With Center Center, there is the freedom to customise spaces and create configurations that suit any need or preferences."

— Jonas Pettersson, co-founder of FUWL.

## COLOURS, THAT COMPLEMENT

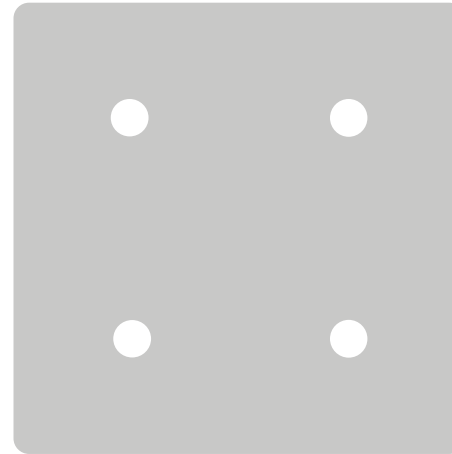

Center Center comes in eight colours, carefully balanced to complement each other. From the more traditional greys and whites all the way to the bold reds and yellows. Consequently, they can be combined in any way, just like the system modules.

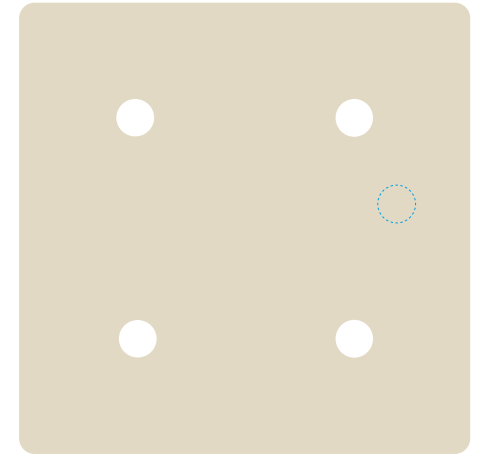

Black, RAL K7 9005

White, RAL K7 9003

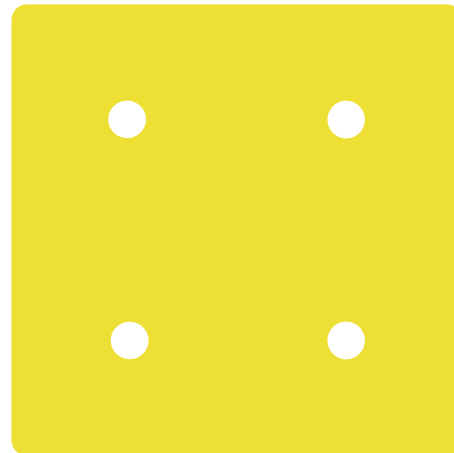

Light Grey, RAL 7047

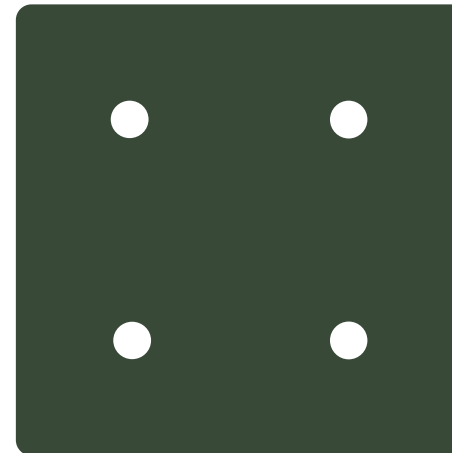

Oyster White, RAL 1013

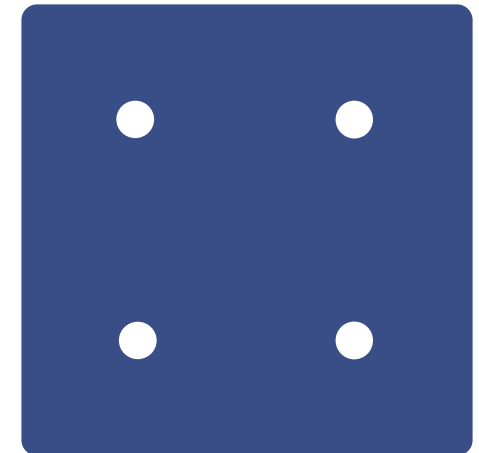

Pompeii Red, RAL D2 040 50 70

Sulphur Yellow, RAL 1016

Chrome Green, RAL 6020

Ultramarin, RAL 5002
