Peugeot e-Traveller

Your guide to greater
efficiency and higher
earnings

Peugeot e-Traveller:

Your guide to greater efficiency & higher earnings

This guide distils insights from an experienced driver with close to ten years experience driving Uber, to transform how you use your Peugeot e-Traveller. By implementing these strategies to maximise aspects like the range of the vehicle will help to significantly increase your income.

Table of contents

Driving to maximum range	1-2
Work smarter, earn more	3-4
Financials	5

Tips to maximise range

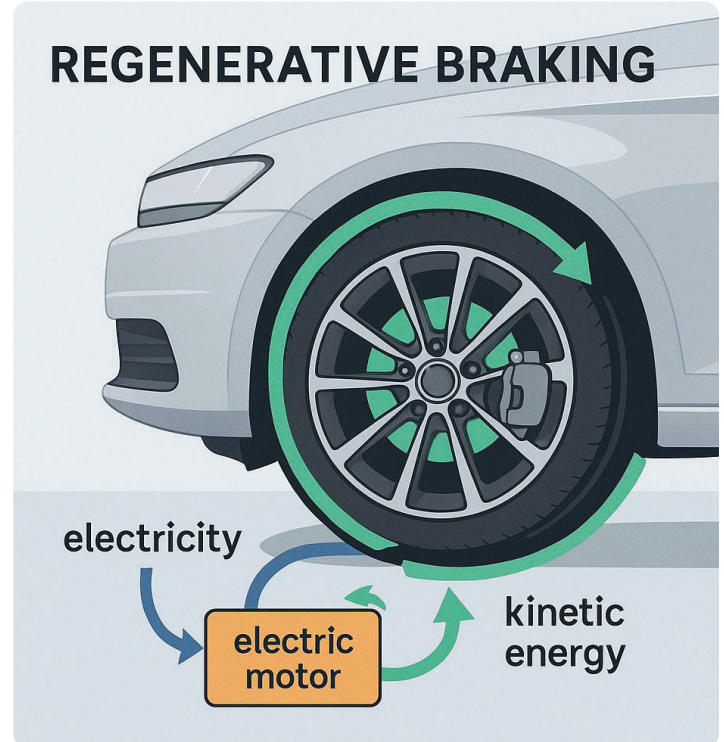

Cruising in the e-Traveller

- Lift off the accelerator often.
- The vehicle rolls significantly further, saving battery.

Prioritise regenerative braking phase 1:

- This setting provides minimal braking, allowing your e-Traveller to coast longer.
- Use it for general driving to cover more distance with less energy consumption.
- Phases 2 & 3 offer more braking (and recharge) but reduce roll.

REGENERATIVE BRAKING

Utilise slipstreaming safety

- On open roads, maintain a safe distance behind larger vehicles (lorries, coaches).
- Their slipstream reduces wind resistance, significantly extending your range.

Increase tire pressure (2-3 psi)

- A slight increase above recommended pressure reduces tire contact with the road, lowering resistance and increasing your travel distance per charge

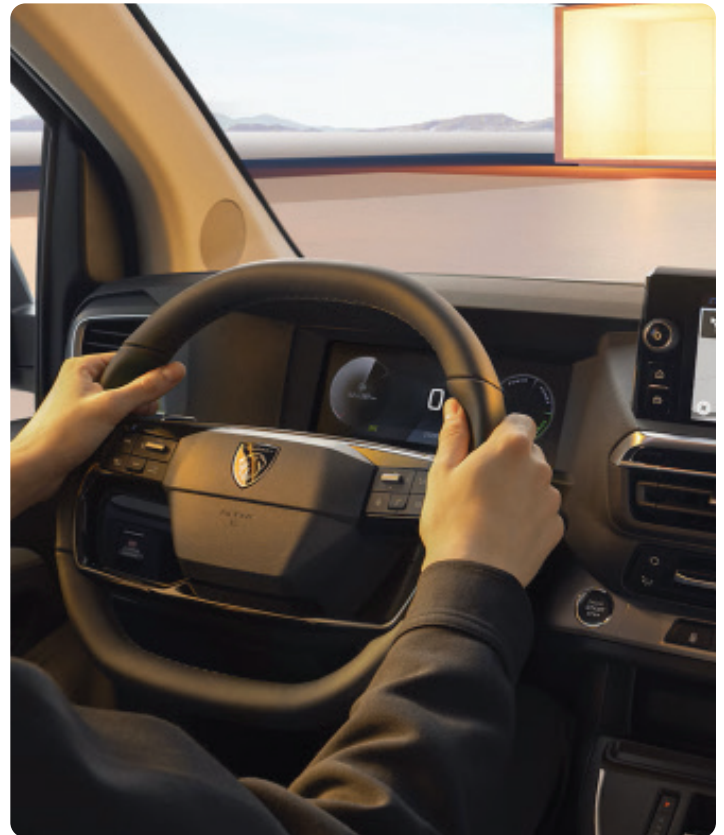

Work smarter, **earn more**

The benefits of **eco mode**

- Always drive in eco mode.
- Power mode offers instant acceleration but can **rapidly deplete your battery with excessive use**
- Your right foot on the accelerator is the primary controller for energy consumption.

‘one recommendation is to always drive in **eco mode...**’

Utilise slipstreaming **safety**

- Blast heating/ac initially to reach desired temperature, then lower the fan speed to maintain an overall temperature.

Use **recirculate button**

- When heating/cooling is off, press the recirculate button. This closes external vents, trapping conditioned air inside and preventing cold/hot air from entering, **which dramatically improves battery life.**

Work smarter, **earn more**

Start fully charged **(85-90%)**

- Always start your day with an **85-90% charge**. This simple habit lowers costly downtime for charging during peak earning hours.
- This **eliminates mid-shift charging stops**, keeping you on the road and earning.

Target scheduled & **executive work**

Seek private hire firms

- Companies with pre-booked, scheduled jobs (airport transfers, executive runs) **offer predictable, higher-value work**. This is superior to unpredictable Uber trips.

Predictability equals profit

- Knowing your destination and fare in advance allows efficient routing, minimises wasted miles, and eliminates range anxiety.

Why it's ideal to minimise the **apps you use**

- If Uber or your primary firm provides consistent work, **focus solely on them**.
- This **streamlines operations and boosts focus**.

Work smarter, **earn more**

Leverage 7-8 seat capacity for **higher fares**

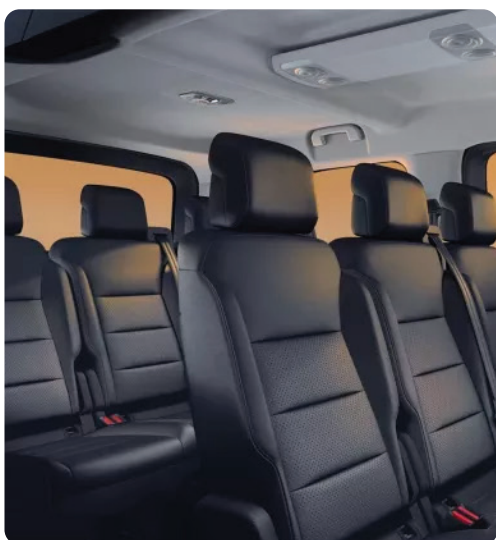

Focus on exec & large group bookings

- Your e-Traveller **excels in exec** and similar high-capacity categories. Actively pursue these jobs; they pay significantly more.

Deliver a premium **experience**

- Offer bottled water and maintain a spotless interior.
- Passengers **appreciate the luxury and space**, leading to better tips and repeat business.
- A small, foldable stool for elderly or less mobile passengers shows exceptional service.

Leather seats – **low maintenance**

- The e-Traveller's leather interior is easy to clean.
- A quick wipe down is all it takes, unlike fabric seats that absorb stains.
- This reduces vehicle downtime for cleaning, **keeping you earning**.

Financials

Monthly charging **invoices**

- Your e-Traveller **excels in exec** and similar high-capacity categories. Actively pursue these jobs; they pay significantly more.

Consistent income **strategy**

- Don't solely wait for large airport transfers
- **A steady flow of smaller**, local jobs ranging from £10-£20 fares adds up quickly and **ensures consistent daily earnings**.

Peugeot eTraveller:

These insights prove that leveraging the e-Traveller's **premium features**, combined with disciplined work allocation and smart driving techniques, creates a powerful formula for increasing earnings.
