

A collaboration between the National Allergy Council, ASCIA, Allergy & Anaphylaxis Australia and the National Allergy Centre of Excellence (NACE) was considered an effective way to develop a robust penicillin allergy assessment guideline

Preliminary meetings were held to agree on roles of each organisation and process for guideline development:

Collaboration enabled a robust process for the initial development of an ASCIA penicillin allergy assessment guideline. Each stakeholder organisation contributed specific expertise to support quality development of this national guideline, underpinned by evidence and clinical expertise which will underpin education, training and standards of care.

Acknowledgements

The National Allergy Council would like to thank our Drug allergy Project Co-leads, the ASCIA Drug allergy working group, the NACE drug stream advisory group and the stakeholders who have contributed to the development of these guidelines

The National Allergy Council is a partnership between the Australasian Society of Clinical Immunology and Allergy (ASCIA) and Allergy & Anaphylaxis Australia (A&A). This project was funded by the Australian Government Department of Health.
