WHY CHOOSE EATING RECOVERY CENTER

Multiple Levels of Care

Your clients can step up or down seamlessly between our levels of care so they get the exact support they need.

RESIDENTIAL

Adults, 18+
Children and teens, 8-17***

For patients who would benefit from structured, contained and specialized treatment:

- Full-day programming 12 hours per day, 7 days per week
- 24-hour nursing care in a licensed psychiatric facility
- Daily medical presence, two psychiatrist and one dietitian visits minimum per week
- Expert and innovative psychopharmacologic treatment
- Intensive psychotherapeutic structure including individual, group and family therapy
- Education specialists work as school liaisons, so students can maintain educational objectives
- Average length of stay is 4-6 weeks*

GOALS: To learn and apply adaptive, safe, effective and consistent coping skills for daily functioning

PARTIAL HOSPITALIZATION

Adults, 18+
Children and teens, 8-17***

For patients in need of structure, intensive skills practice and who can maintain medication compliance:

- Programming 8 hours M-F, 8-6 hours Sat. and Sun., 7 days per week**
- Three sessions per week with a primary therapist
- Two psychiatric and nutrition sessions per week
- One psychiatrist, registered nurse, and dietitian visit minimum per week
- Intensive psychotherapeutic structure including individual, group and family therapy
- Patient spends nights at home or nearby apartment for a comfortable, supportive environment during evening hours
- Education specialists work as school liaisons, so students can maintain educational objectives
- Average length of stay is 4 weeks*

GOALS: To apply insights into perpetuating factors that amplify symptoms and develop sustainable skills and strategies for managing symptoms

INTENSIVE OUTPATIENT (on-site and virtual – Eating Recovery At Home)

Adults, 18+
Children and teens, 12-17

For patients who would benefit from structure and more group support than outpatient therapy provides:

- Outpatient care for 3 hours per day, 3-4 days per week**
- Individual psychotherapy, nutrition therapy and group therapy
- Patient can stay engaged in school or work while participating in intensive treatment
- On-site average length of stay is 3-4 weeks*
- Virtual average length of stay is 6-8 weeks*

GOALS: To continue to develop and practice consistent and sustainable skills and strategies for managing symptoms for optimal, independent daily living

Denotes average length of stay; treatment length varies by individualized treatment plan. **Programming days and hours per week vary by location. *Programming for ages 10 and under varies by treatment program and location.*

Our partnership includes:

- Responsive, efficient assessment and admission process
- Fast-track assessments and admissions available in most cases for patients admitting directly from a hospital setting
- Care teams that keep you updated on your client's progress and collaborate with you to ensure smooth transition back to your care
