Discover BASECRETE XTREME!

*The New Era in Advanced
Waterproofing and Repair!*

In an evolving market, Basecrete Technologies proudly introduces **BASECRETE XTREME**, a two-component solution redefining surface protection and repair. This revolutionary **3-in-1 formula** merges advanced material science with practical application, offering superior resistance, versatility, and ease of application. Surpassing traditional solutions, **BASECRETE XTREME** sets a new benchmark in waterproofing for construction and renovation.

3^{IN}1

KEY STRENGTHS DEFINING THE FUTURE OF WATERPROOFING:

- **Innovative Composition:**

A synergistic blend of high-tech polymer and special fibrocement, with an integrated primer layer, providing a unique 3-in-1 solution in the market.

- **Direct and**

- **Simplified Application:**

Forget about prior priming.

BASECRETE XTREME ensures superior adhesion and complete waterproofing, directly on the substrate.

- **Elimination of Mesh Need:**

A revolution in installation, removing the need to place mesh between layers, saving time and resources. Installing mesh at any cold joint or control joint is still required/recommended

- **Crack and Fissure Filling:**

The fiberglass-reinforced cementitious membrane fills surface imperfections, creating a durable seal that restores the integrity of damaged areas.

Optimal Coverage:

Coverage is approximate for one coat. Slump can be adjusted to accommodate specific job requirements by adjusting the liquid or the compound.

A. Trowel:

1 gallon & 1 × 50 lb bag =
80–100 sq ft @ 1/16" or 40–50 sq ft @ 1/8"

B. Roller:

5 gallons & 3 × 50 lb bags =
450–500 sq ft @ 1/16" or 225–250 sq ft @ 1/8"

C. Squeegee:

5 gallons & 3 × 50 lb bags =
450–500 sq ft @ 1/16" or 225–250 sq ft @ 1/8"

D. Spray:

5 gallons & 3 × 50 lb bags =
400–500 sq ft @ 1/16" or 225–250 sq ft @ 1/8"

BASECRETE

FLEXIBLE WATERPROOFING **XTREME** **FIBER**

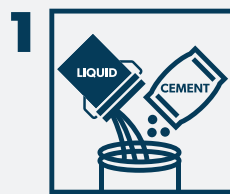

EXPANDED APPLICABILITY

BASECRETE XTREME is suitable for a wide range of applications and surfaces, from new construction to renovation projects, ensuring strength and durability. Effective for constant underwater submersion like swimming pools, cold joints, ICF / EPS, or CMU block where extreme flexibility is required. With special fiberglass reinforcement, it offers exceptional resistance against chemicals and salt, ideal for the most challenging environments. It is not only a bond coat but a reinforced waterproofing bond coat eliminating the need for fiberglass reinforced sheets in most cases.

Elevate Your Projects to the Extreme with BASECRETE XTREME

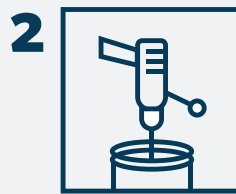

We invite architects, engineers, and construction professionals to discover how **BASECRETE XTREME** can transform their projects, offering durable, efficient, and sustainable solutions. Together, we can build the future of waterproofing.

MIX IT • APPLY IT • DONE!

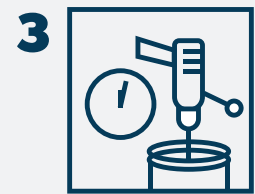

Combine

Pour Basecrete Liquid into a clean pail & add the dry Basecrete Cement Compound.

Blend

Blend with an electric paddle mixer until mixture is uniform. **Let FALSE SET for 4 minutes.**

Apply

Blend for 1 minute and use within 30 minutes. Add more liquid if needed.
