**CONCRETE DENSIFIER**

**INTERCEPT**

## **HIGHLY VISCOUS COLLOIDAL SILICATE CONCRETE DENSIFIER**

Prevent concrete problems before they ever start by applying a base coat of **BASECRETE INTERCEPT** to your fresh concrete pour or older existing concrete.

Engineered through years of expertise and scientific innovation, **BASECRETE INTERCEPT** offers the ideal foundation to protect concrete from rust, water infiltration, and chemical exposure. Upon application, it penetrates deeply into the concrete matrix at a molecular level, seeking out and filling all voids within the structure—making it a powerful primary waterproofing solution for any concrete surface.

**BASECRETE INTERCEPT** bonds with the free Calcium and Lime present in concrete, transforming into a dense, waterproof barrier of colloidal silicate gel. Despite this powerful seal, the concrete remains breathable, allowing internal vapors to escape and preserving the material's integrity over time.

## **KEY STRENGTHS OF BASECRETE INTERCEPT – ADVANCING CONCRETE PERFORMANCE:**

- **Dual-Action Waterproofing:**

Just two quick coats deliver a reliable, long-lasting waterproof barrier, protecting concrete surfaces from water infiltration.

- **Structural Enhancement:**

Penetrates deep to densify and strengthen the concrete matrix—accelerates curing, minimizes rebar rust, and removes trapped salts.

- **Versatile Surface Compatibility:**

Designed for both fresh pours and existing concrete—ideal for new builds or restoration projects.

- **Smart Hydration Control:**

Maintains concrete breathability, allowing internal vapors to escape while managing moisture during and after application.

- **Effortless Application:**

Applied with a low-pressure sprayer, simplifying installation without sacrificing performance.

- **ASR Mitigation:**

Effectively reduces Alkali Silica Reactivity (ASR), improving durability and lifespan.

### **OPTIMAL COVERAGE:**

Apply **BASECRETE INTERCEPT** with a low-pressure pump type sprayer. Apply two coats in quick succession removing excess material immediately. Do NOT allow excess material to dry on surface.

#### **5 gallon (19.9 L)**

Typical application coverage:  
500–700 sq ft.

#### **1 gallon (3.8 L)**

Typical application coverage:  
100–140 sq ft.

**NOTHING BEATS  BASECRETE**

## EXPANDED APPLICABILITY

**BASECRETE INTERCEPT** is suitable for a wide range of applications and surfaces, from new construction to renovation projects, ensuring strength and durability. Apply to swimming pool shells, decks, driveways, sidewalks, foundations, cellar walls, bridges and more.

### Elevate Your Projects with **BASECRETE INTERCEPT**

We invite architects, engineers, and construction professionals to discover how **BASECRETE INTERCEPT** can transform their projects, offering durable, efficient, and sustainable solutions. Together, we can build the future of waterproofing.

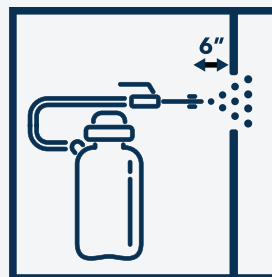

FOR ESPAÑOL, FRANÇAIS,  
AND MORE!

## SPRAY IT • APPLY IT • DONE!

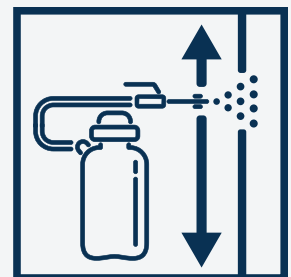

**1**

Add **BASECRETE Intercept Concrete Densifier** to a **low pressure pump sprayer**.

**2**

Hold the wand of the sprayer perpendicular to the surface and **spray 6 inches (15 cm) from the surface**.

**3**

**Apply two coats** by lightly and quickly spraying from bottom to top; removing excess immediately; overlap passes by 50% for thorough coverage.

**NOTHING BEATS  BASECRETE**
