

BASECRETE

THE BENEFITS OF BASECRETE

EASE OF USE

- Easy two coat cementitious waterproofing/bondcoat system
- No primer needed
- Multiple construction applications, from swimming pools to parking garages
- Does not need to be applied in a monolithic application, allowing the applicator to stop and go at their own pace

COMPATIBILITY

- Compatible with all cementitious systems on the market including plaster/stucco
- Compatible with all thinsets/grouts on the market including epoxy

PROVEN PERFORMANCE

- Low VOC: ANSI 61 (potable water)
- Basecrete will not create a cold joint within itself.
- Miami Dade Approved
- Freeze Thaw approved
- UV Stable

VARIETY OF APPLICATION METHODS

- Trowel
- Brush
- Squeegee
- Roller
- Spray

BASECRETE vs. Other Competitors

Feature	BASECRETE	Competitor "S"	Competitor "T"
Material Type	Cementitious-polymer hybrid	Polymer-based air & moisture barriers	Wide range (polyurethane, silicone, bitumen, etc.)
Waterproofing	Excellent, fully submersible	Designed for moisture control, not fully submersible	Excellent, designed for both above and below-grade waterproofing
Flexibility	High flexibility, crack-resistant	Moderate flexibility for building envelopes	Varies by product (some are rigid, some flexible)
Adhesion	Strong adhesion to concrete, wood & metal	Good adhesion for air barriers	High adhesion, varies by product
Durability	Long-lasting, resistant to chemical and environmental exposure	Designed for durability in building envelopes	Highly durable, engineered for structural protection
Best Use Cases	Pools, decks, balconies, and structural waterproofing, re-surfacing, etc – over 101 uses	Air and vapor barriers for energy-efficient buildings	Roofing, foundation waterproofing, and industrial applications
Cost-Effectiveness	High performance for cost	Mid-range, used in energy-efficient construction	Varies by product and application scope

IF YOU'RE LOOKING FOR A HIGH-PERFORMANCE, FLEXIBLE WATERPROOFING SOLUTION, ESPECIALLY FOR POOLS, DECKS, BALCONIES, OR EXPOSED CONCRETE, BASECRETE IS THE BEST OPTION DUE TO ITS CEMENTITIOUS COMPOSITION, STRENGTH, AND WATERPROOFING PROPERTIES.
