CONTACT 17

Specialising in architectural and structural glazing, we're proud to contribute to some of the most prestigious construction projects across the UK.

We believe that each pane of glass we install is a testament to our unwavering commitment to superior craftsmanship and exceptional service. We collaborate closely with architects, designers, and builders to ensure that every project we undertake is not just completed, but elevated to a new standard of elegance and durability.

Experience the clarity of vision and the integrity of service that define Fluid Glass, where every detail is a reflection of our promise to you.

THE TRUST YOU DESERVE

Craft

THE THING WE LOVE

Care

THE RELATIONSHIPS WE BUILT

Our Values

Our beliefs are deeply woven into our values, guiding everything we create.

CLARITY

Clarity is more than transparency in glass—it's transparency in how we work. We make complex processes feel simple, guiding clients with precision and openness at every step. Through clarity, we create confidence: in the vision, in the craft, and in the outcome.

CRAFT

Craft is where innovation meets timeless skill. Every detail is shaped with purpose, elevating architecture into something enduring and extraordinary. Through craft, we transform ideas into spaces that inspire, perform, and last.

CARE

Care defines the way we build relationships as much as the way we build structures. It's present in every conversation, every decision, and every installation. Through care, we ensure our clients feel valued, supported, and proud of what we create together.

Awards & Recognitions

Our work has been recognised internationally, earning awards and industry recognition for the quality, craft and impact of the projects we create.

Vaidas Vileikis

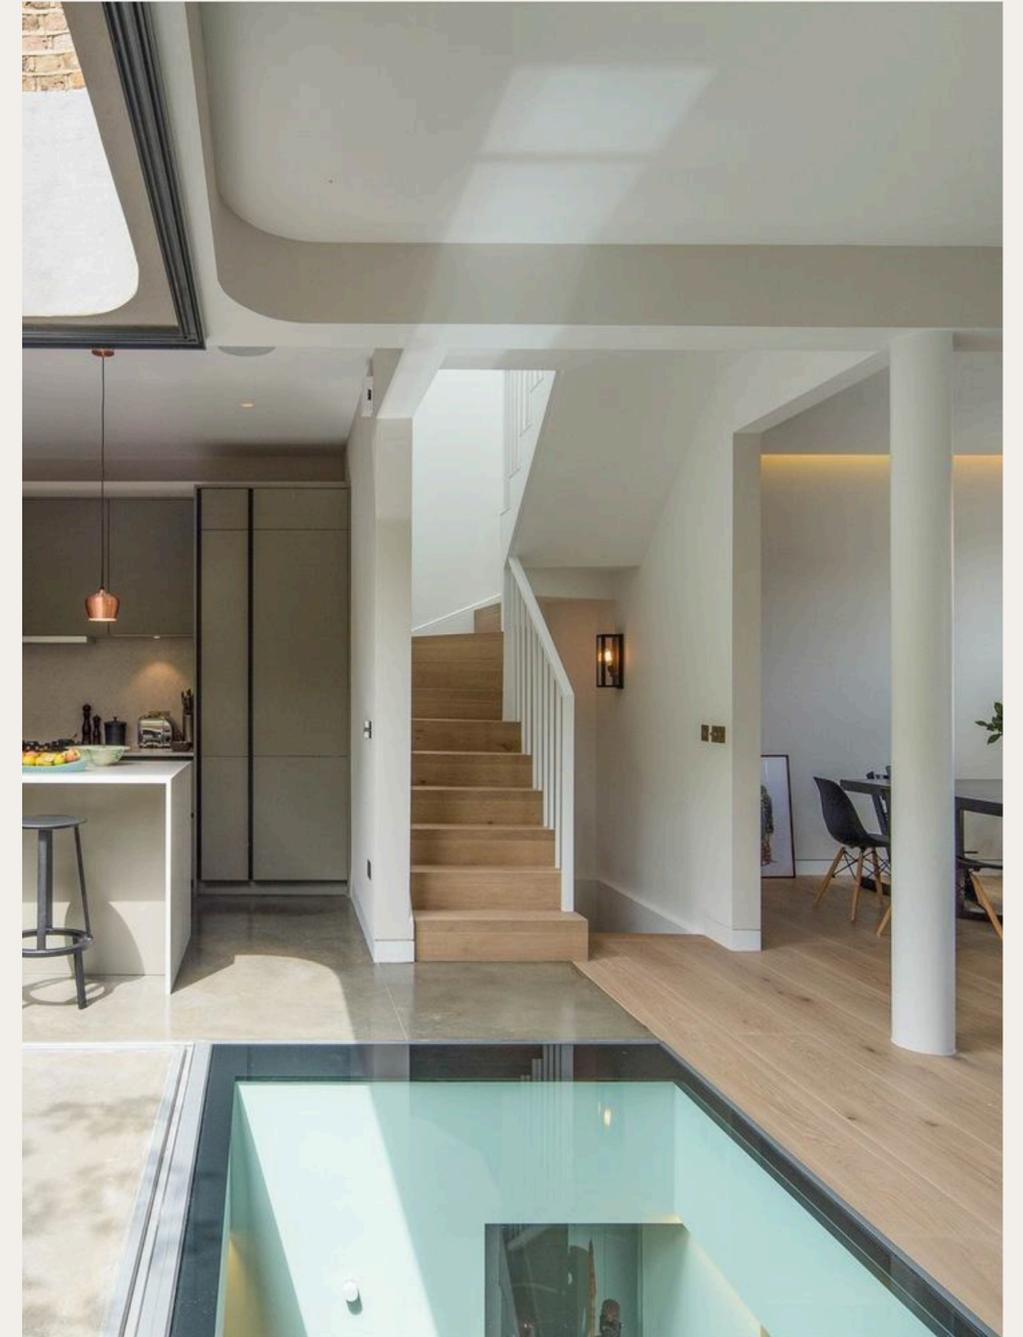

FOUNDER OF NAME ARCHITECTS

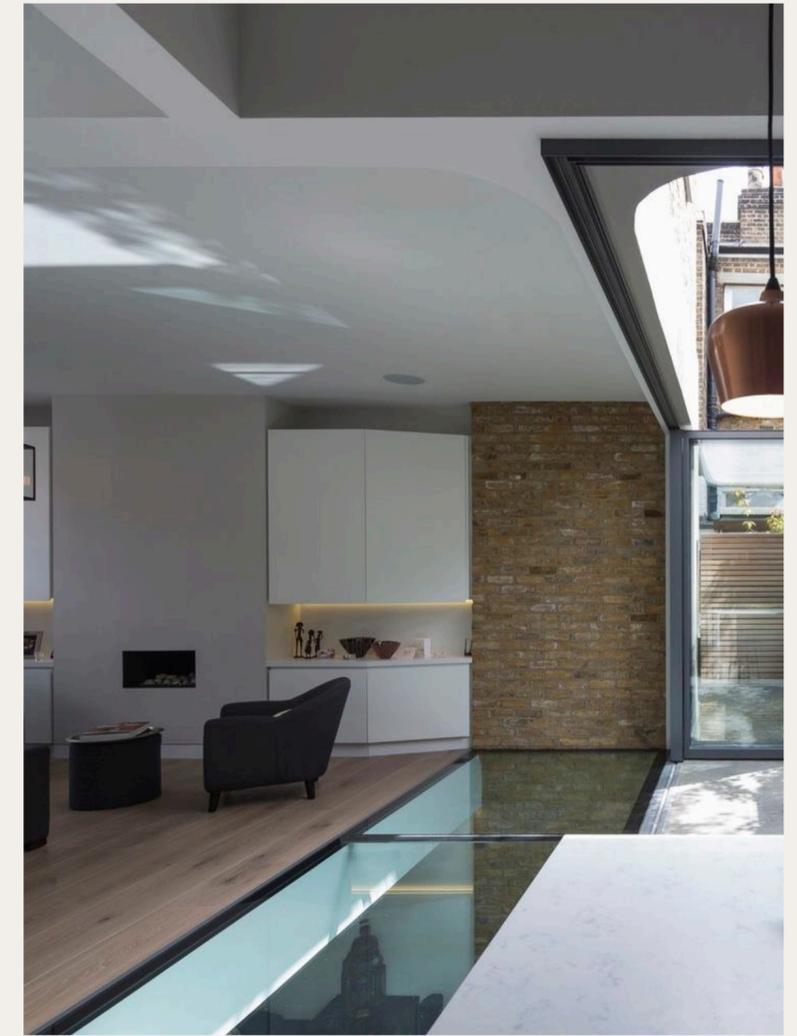

“ Unrivalled customer service, cutting edge design and quality. Fluid Glass is firmly lodged in our list of preferred suppliers of glazing products.

Fluid Glass Floors transform interiors by introducing stunning transparency and natural light.

They open up sightlines between levels, create a sense of openness, and turn ordinary circulation spaces into architectural highlights. Engineered to rigorous safety standards, our glass floors bring a sophisticated modern aesthetic while maintaining exceptional strength and durability.

Designed for Architects

Fluid Glass Floors are designed to become an integral part of your building's structure and story. Whether enhancing contemporary open-plan spaces or sensitively inserted into period properties, they offer architects a versatile tool to create visual drama and connection across different levels.

Structural integration

Our glass floors are engineered in close collaboration with architects and structural teams to achieve flawless load-bearing performance and seamless installation. Each project is meticulously assessed to ensure it meets all building and safety regulations, delivering peace of mind alongside striking design.

Visual connectivity

By opening up vertical views, Fluid Glass Floors invite daylight deeper into your home or commercial space and create captivating sightlines between floors. From showcasing a feature staircase to offering a glimpse into a wine cellar or gallery below, they add a unique architectural dimension that draws people through the space.

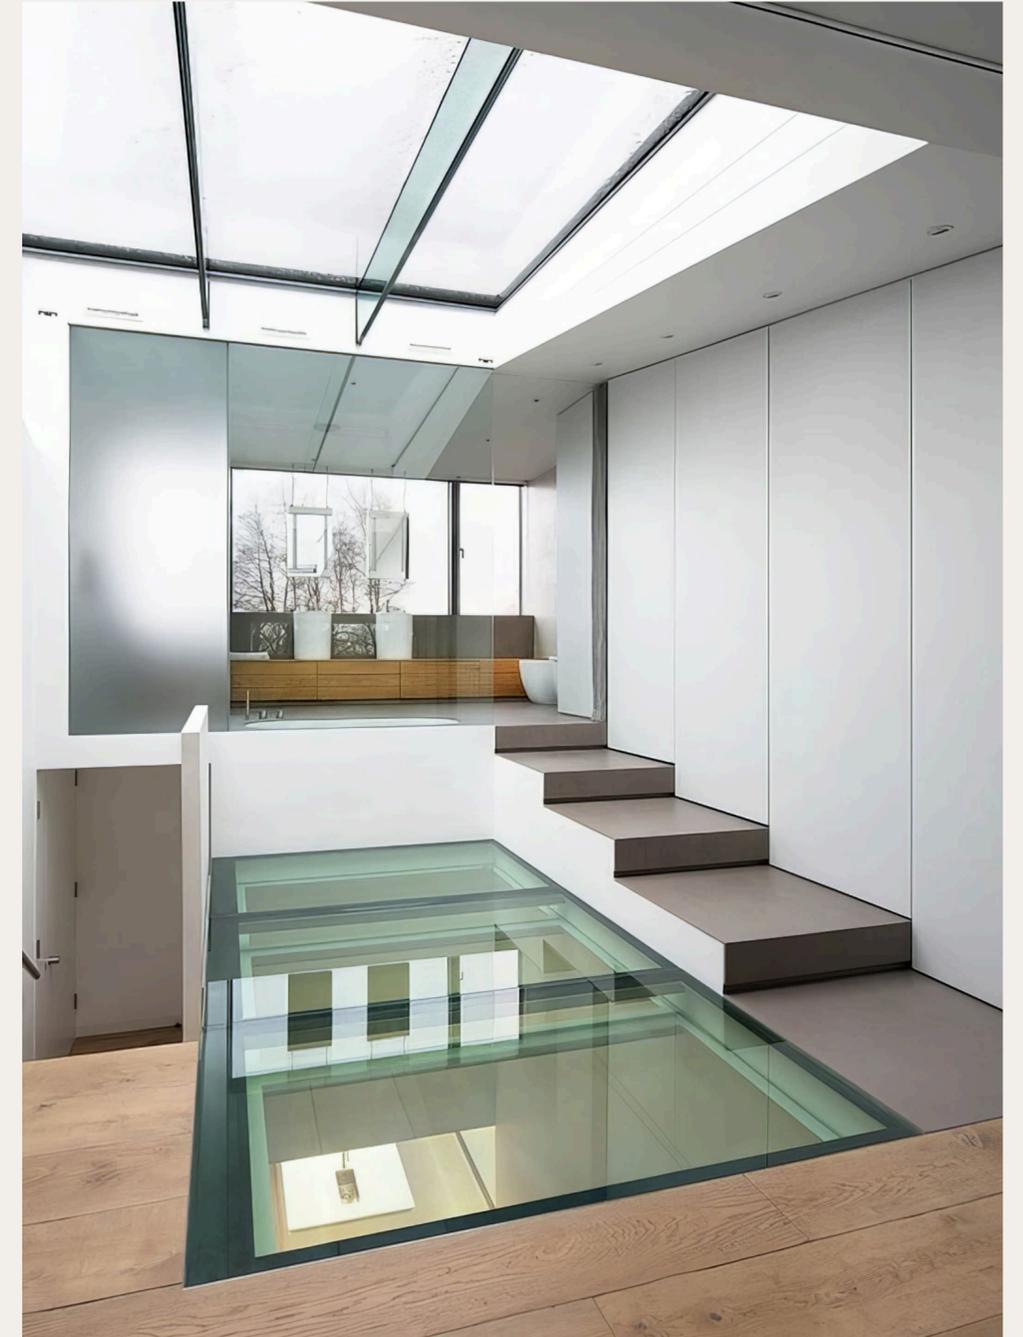

Every Fluid Glass Floor is individually crafted to complement the aesthetics and character of your project. With a focus on precision and understated luxury, we offer a range of finishes and detailing options to achieve a look that is both timeless and tailored.

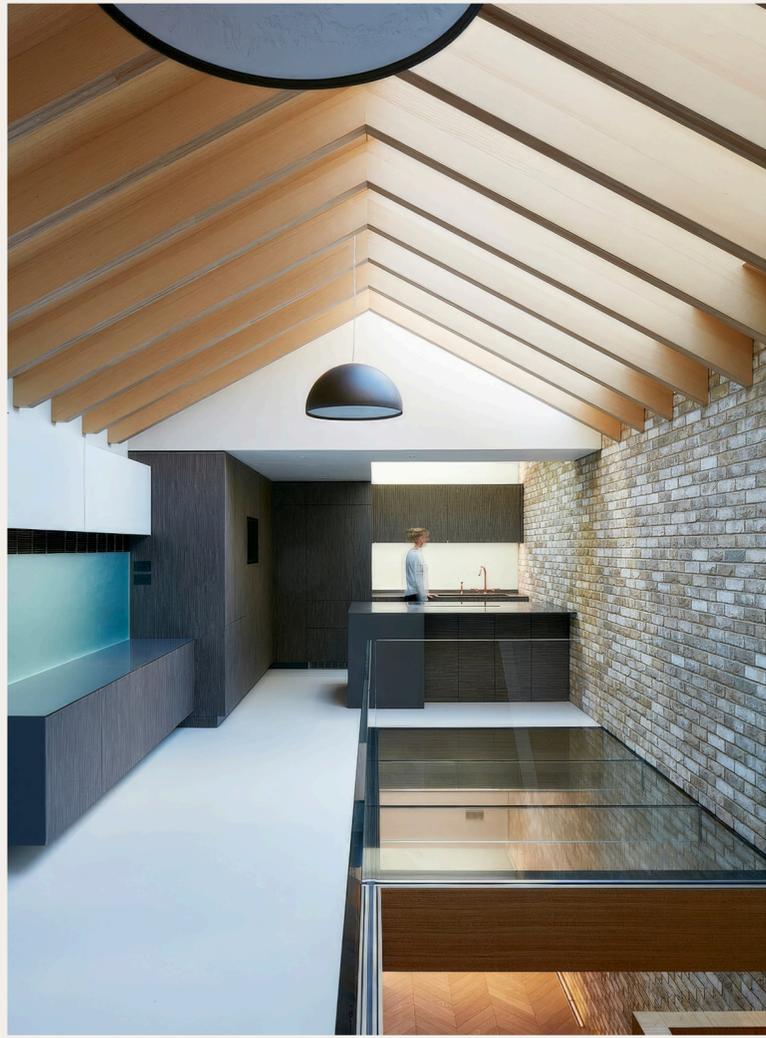

Tailored aesthetics

Choose from ultra-clear low-iron glass for maximum transparency, softly etched surfaces for added privacy, or incorporate bespoke lighting to transform your floor into an illuminated design feature. Our team will guide you through options that best suit your space and vision.

Premium detailing

From flush thresholds to frameless edges and hidden support systems, every element is designed to keep the focus on the purity of the glass. This commitment to refined detailing results in a sleek, minimalist finish that elevates both residential and commercial environments.

Behind every Fluid Glass Floor lies advanced engineering and cutting-edge glass technology that ensures outstanding performance, safety, and longevity.

Our commitment to innovation means each installation not only looks exceptional but stands up to the demands of everyday use, delivering total confidence alongside beautiful design.

Structural glazing expertise

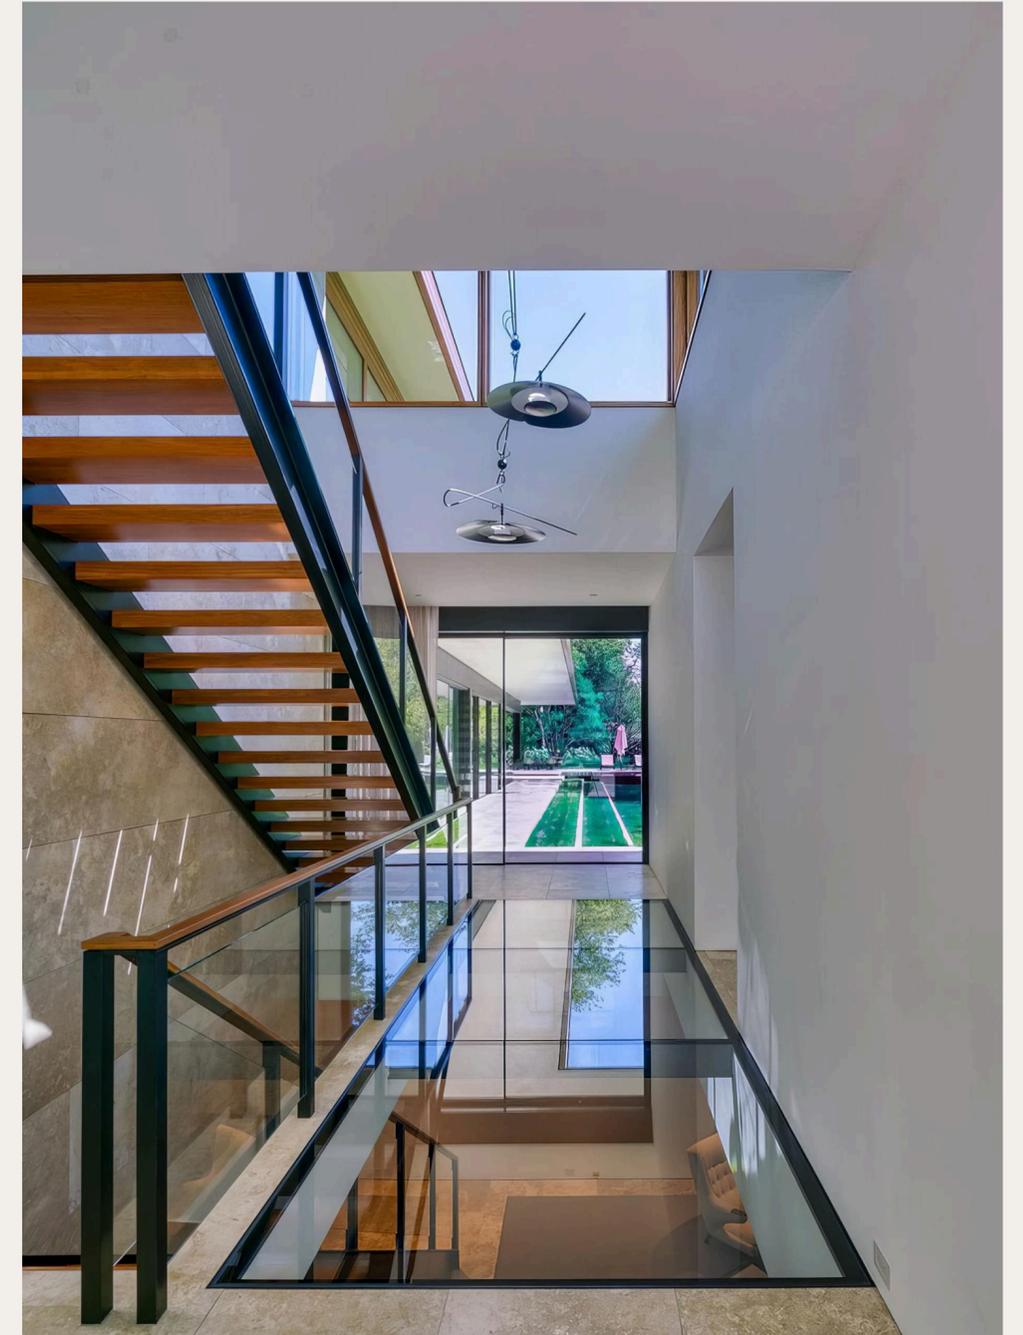

We utilise state-of-the-art structural glass systems, carefully calculated to handle live and dead loads with generous safety margins. Laminated and toughened glass panels are precisely specified to suit your span and use case, combining elegant transparency with uncompromising strength.

Safety without compromise

Our floors meet or exceed all relevant building codes and load requirements. Slip-resistant surface treatments, robust multi-layered laminates, and rigorous quality control mean you can trust your glass floor to perform safely and beautifully for years to come.

Acoustic and thermal performance

Fluid Glass Floors are engineered to maintain comfort and practicality. Acoustic interlayers can be incorporated to reduce sound transmission between floors, while thermal coatings help manage solar gain and energy efficiency, making them suitable for a wide range of interior environments.
