---

Specialising in architectural and structural glazing, we're proud to contribute to some of the most prestigious construction projects across the UK.

We believe that each pane of glass we install is a testament to our unwavering commitment to superior craftsmanship and exceptional service. We collaborate closely with architects, designers, and builders to ensure that every project we undertake is not just completed, but elevated to a new standard of elegance and durability.

Experience the clarity of vision and the integrity of service that define Fluid Glass, where every detail is a reflection of our promise to you.

# Clarity

THE TRUST YOU DESERVE

# Craft

THE THING WE LOVE

# Care

THE RELATIONSHIPS WE BUILT

# Our Values

Our beliefs are deeply woven into our values, guiding everything we create.

---

## CLARITY

Clarity is more than transparency in glass—it's transparency in how we work. We make complex processes feel simple, guiding clients with precision and openness at every step. Through clarity, we create confidence: in the vision, in the craft, and in the outcome.

---

## CRAFT

Craft is where innovation meets timeless skill. Every detail is shaped with purpose, elevating architecture into something enduring and extraordinary. Through craft, we transform ideas into spaces that inspire, perform, and last.

---

## CARE

Care defines the way we build relationships as much as the way we build structures. It's present in every conversation, every decision, and every installation. Through care, we ensure our clients feel valued, supported, and proud of what we create together.

# Awards & Recognitions

Our work has been recognised internationally, earning awards and industry recognition for the quality, craft and impact of the projects we create.

Vaidas Vileikis

FOUNDER OF NAME ARCHITECTS

“ Unrivalled customer service, cutting edge design and quality. Fluid Glass is firmly lodged in our list of preferred suppliers of glazing products.

Fluid X Vertical is the purest expression of structural glazing—walls of uninterrupted glass that create clarity, openness, and visual stillness.

With no visible frames and floor-to-ceiling spans, it allows architecture to dissolve into light and landscape. Whether defining exterior façades or internal partitions, Fluid X Vertical introduces natural light and spaciousness without compromise. It offers more than transparency—it shapes atmosphere, elevates material contrast, and brings architectural intention into sharp focus.

# Information

Fluid X Vertical combines high-performance glazing with a refined, minimalist system. With slim sightlines, exceptional thermal and acoustic performance, and a wide range of glass and finish options, it offers strength, flexibility, and seamless integration into any architectural vision.

## Dimensions

- ◇ Max Leaf Height : 6 m (larger on request)
- ◇ Max Leaf Width : 3.2 m (larger on request)
- ◇ Max Glass Thickness : 54mm

## Options

- ◇ RAL colours
- ◇ Solar control
- ◇ Privacy glass
- ◇ Low Iron glass
- ◇ Body tinted coloured glass
- ◇ Acoustic laminate
- ◇ Easy-Clean coatings
- ◇ CUI in advanced thermal performance
- ◇ Paint or sandblast borders

## Features

- ◇ Fully thermally broken aluminium
- ◇ Clip-in channel system (no screws)
- ◇ Market leading strength and reliability

## Performance

- ◇ Typical UW value : 1.0 U/Wm<sup>2</sup>K
- ◇ Wind load : Tested to 1.8kN/m<sup>2</sup>
- ◇ Sound insulation : Up to 46 dB

The absence of visible structure creates a calm, monolithic presence that enhances the surrounding materials, views, and spatial flow. Whether used in bold contemporary forms or integrated into sensitive restorations, it offers a timeless visual language that feels simultaneously grounded and weightless.

#### **Monolithic and Minimal**

Each installation becomes part of the architectural fabric—fixed glass panels sit seamlessly within floor, ceiling, or wall junctions. The result is a quiet yet powerful design gesture that blurs boundaries and expands perception.

#### **Transparency with Intent**

By eliminating frames, mullions, and visual clutter, Fluid X Vertical turns light and reflection into architectural tools. It captures sky, landscape, and interior with clarity, offering visual connections that shift subtly throughout the day.

# Every Fluid X Vertical installation is bespoke —tailored to the architectural vision and site conditions.

Glass types, thicknesses, coatings, and tints are carefully specified to balance visual clarity with performance. Whether defining a stairwell, framing a view, or shaping an entire façade, Fluid X Vertical offers infinite possibilities through one material: glass.

## Precision in Every Detail

Junctions are seamless. Reflections are clean. Edges align. Every line and shadow is deliberate —crafted to elevate the architecture, not distract from it.

## A Canvas for Architecture

More than a feature, Fluid X Vertical becomes the surface upon which light, space, and structure converge. It is glazing reduced to its most essential form—quiet, powerful, and undeniably architectural.

Beneath its simplicity, Fluid X Vertical is underpinned by precise engineering and rigorous technical control. Designed for both interior and exterior use, it supports large-scale glazing with exceptional thermal and structural performance.

#### High-Performance Glazing

With options for double and triple-glazed units up to 60mm, Fluid X Vertical offers thermal values as low as 0.75 W/m<sup>2</sup>K. Low-emissivity and solar control coatings ensure year-round comfort, while low-iron glass maximises clarity and light transmission.

#### Invisible Strength

Using structural silicone bonding and hidden fixing techniques, glass panels can be joined edge-to-edge with slim, precision-set tolerances. The result is a perfectly flush finish, engineered to meet wind loads, impact resistance, and acoustic requirements without visible compromise.
