GROUNDSWELL PROJECT

Hadiya's Well

From Sats to Water

Help us raise $1,322 to build a community water well with an electric pump at a madrasah on a small island off the coast of Tanzania, East Africa

The well will be built in loving memory of Hadiya Masieh, founder of Groundswell Project.

SCAN TO DONATE BTC

Why Donate in Bitcoin?

We're using Bitcoin to demonstrate how people around the world can directly support a local community project, without relying on traditional banks or international money transfer services.

Your sats go directly to Gulam Mohammed, our trusted local well builder in Tanzania, who will use the funds to build a water well for a local madrasah (Islamic school).

- Direct giving across borders
- Support a local builder in Tanzania
- Real-world impact

Clean, reliable water

A new well will improve daily life for students and the wider community at Big Madrasah on Mafia Island

A trusted local builder

Gulam Mohammed is a local well builder on the island who has built wells for communities in the area

We'll keep you updated

We'll share progress, photos and updates as the well is built so you can see the impact of your donation

One global community. One local project. From sats to water.
