

Using Digital Wallets to Build Financial Resilience

The traditional financial system leaves too many behind. High fees, inflation, and strict barriers prevent everyday people, especially women and underserved groups, from building secure futures. Bitcoin for Good works directly with communities to show how simple digital tools can protect savings, foster financial independence and build resilience from the ground up.

WHY BITCOIN?

Borderless & Always Available

Send and receive money anywhere in the world, 24/7, without banking delays, foreign exchange holds or holiday shutdowns.

Lower-Cost Payments

Cross-border transfers and micro-payments move directly without middleman banks skimming fees off family aid.

Control & Direct Ownership

People hold money directly in self-custodial wallets, giving them complete ownership without risk of frozen accounts.

Highly Accessible

Anyone with a smartphone can create a free digital wallet in minutes, providing instant access to digital financial tools.

Protection Against Inflation

A fixed total supply of 21 million protects hard-earned savings from local currency devaluation and hyperinflation.

Transparent & Honest

Transactions are verifiable on an open ledger, allowing donors and non-profits to send direct aid straight to the ground.

WHERE CAN BITCOIN MAKE A DIFFERENCE?

Affordable Remittances

✗ Sending money home often means waiting days and losing money to transfer and exchange rate fees.

✓ Digital wallets enable fast, lower-cost international payments, helping families keep more of the money they earn.

Female Empowerment

✗ Many women face barriers to accessing financial services and controlling their own money.

✓ Digital wallets give women universal and instant access to financial tools, enabling greater financial privacy, independence and control.

Financial Inclusion

✗ Millions of people face barriers to traditional banking.

✓ A digital wallet can be created in minutes by anyone, anywhere, without the need for ID, using just a smartphone and internet connection.

Direct Giving

✗ Too much aid can be lost through fees and intermediaries before it reaches those who need it.

✓ Digital wallets allow donations to be sent directly to individuals and grassroots organisations.
