Pump Service

We stand by your side – with handshake quality, solution-oriented thinking, and real commitment. Our motivated team is available for you around the clock – even at night and on weekends. Thanks to our 24/7 service, your operation keeps running safely.

Flexible. Dedicated. Independent.

Spare Parts – Spare Parts Management

Our team ensures that you receive the right spare parts quickly and reliably – independent of manufacturer and on schedule. We always keep an eye on both quality and cost.

Quality. On schedule. Cost-transparent.

New Pumps

When choosing your new pump, your requirement – not the brand – is our priority. Together, we analyze your specific needs and find the technically and economically optimal solution for your application.

Independent. Solution-oriented. Future-proof.

Custom Parts – Series Production

We manufacture what you need: high-precision series components and individual custom-made parts – from pump shafts to screw conveyors.

Flexible. Dedicated. Precise.

Consulting, Engineering & Coating Technology

Our qualified engineering team supports you from the initial consultation through planning to testing on our in-house test benches. At F&T, we unite all competencies under one roof.

Innovative. Customer-oriented. Sustainable.
