WORK EXPERIENCE

Cypoint Inspire AB — *Consultant/Software Engineer*

OCTOBER 2022 - PRESENT

- Inriver product information management, developer certified.
- Worked with React, TypeScript, .NET / C#, relational and NoSQL databases.
- Utilized different headless CMS such as Contentful and Strapi.
- Created implementations that automated processes and enhanced customer workflows.
- Implemented stateful and stateless reusable components across several different projects.
- Deployed applications in Microsoft Azure cloud.
- Built user-friendly and responsive ecommerce websites from design specifications.
- Performed large-scale code reviews and merges.
- Worked in teams using scrum and agile methodologies.

Moonvive Entertainment — Backend Engineer

FEBRUARY 2023 - NOVEMBER 2023 (Contract)

- Made important decisions on server infrastructure and was in-charge of the development of base functionality.
- Performed code reviews and merges where I ensured that the code had high quality. I also gave feedback to other developers during this process.
- Implemented networking code using Java and the Netty library to proxy player connections and sync player data instantaneously.

Northwood Studios — *System Administrator/Web Developer*

MARCH 2019 - AUGUST 2022 (Volunteer)

- Worked with internal tools, RESTful APIs, maintenance of Linux servers, and database operations.
- Ensured that our services were available at all times as well as responding to and resolving outage incidents.
- Gained experience using C#, PHP, Redis, MySQL, and Linux.
- Participated in the creation of CI/CD pipelines used in staging and production environments.

PERSONAL PROJECTS

Admin Dashboard

- Built using React with NextJS as frontend where I learned how to utilize the full power of React.
- Obtained in-depth knowledge about server and client boundaries.
- The backend is created using .NET and is using a repository design pattern, alongside dependency injection for services.

TECHNICAL SKILLS

JavaScript

TypeScript

NodeJS

React

.NET / C#
