The Smart Watchman Tank Pack

All EcoSafe tanks now come complete with The Smart Watchman Tank Pack, which includes a Watchman Sonic Advanced Tank Monitor (Transmitter & Receiver), Watchman SENSiT USB Receiver, PTFE tape, and the Kingspan 2-Part Valve.

With the Watchman SENSiT USB Receiver, you can receive low-level alerts, sudden drop alerts, predicted run-out notifications, and monitor consumption directly from your phone. This allows you complete control over your oil levels without being tied to a single location.

The new Kingspan 2-Part Valve features a safe isolation shut-off valve and a 40-micron particle filter. It offers instant isolation, debris removal, and pollution-free operation, saving hours of labour by eliminating the need to drain the tank for filter replacement.

Suitable for the storage of Kerosene (C1/C2), fuel oil (A2) and gas oil/diesel including bio diesel (HVO) as defined in BSEN2869, BSEN590 and BSEN15940
