

E-mobility software for your charging business.

Genuine white label. Stable scaling.

Your charging business, your brand: Full-service providers face the challenge of efficiently serving a wide variety of e-mobility customers – without dependencies and without compromising on brand management. The chargecloud ecosystem is the ideal software solution for you to operate charging infrastructure, services and billing entirely under your own name and expand your portfolio in a controlled manner.

As an open operating system with multi-tenant architecture, chargecloud enables you to centrally manage complex B2B2C structures – from operation and billing to integrated service partners. Scale efficiently and dynamically without lock-ins and without your own development risk. One system. Your brand. Full control.

The right e-mobility solution for your goals.
Independent and versatile.

100% white label. Maximum brand strength.

As a true white label system, chargecloud remains completely in the background. The Driver App, Fleet & Partner Portal, billing and user experience run under your branding – consistently, professionally and scalably. You retain full customer and brand sovereignty across all B2B and end customer segments.

Stable in operation. Flexible in business.

Electromobility requires both operational reliability and flexible billing models. chargecloud maps complex use cases, revenue-sharing models and service structures in a single system – and does so in a tax- and audit-compliant manner. This allows even demanding customer models to be managed and billed efficiently.

Grow in partnership. Expand predictably.

Our marketplace with certified service partners enables you to expand your offering in a targeted manner – without your own development cycles. New services, new revenue models, short time-to-market. And all this on a stable product basis with a long-term roadmap.

The operating system for all e-mobility customers!

The complete enterprise-level solution.

Uncompromising brand management.

Position yourself consistently on the market across all customer groups, touchpoints and business models – white label, just as you want it.

- Multi-client structure for separate customer, contract and tariff worlds
- Full control over brand, data and customer relationships

Bundle services instead of developing them yourself.

Expand your offering in a targeted manner – with integrated enterprise-level partner solutions.

- Access to verified services from the chargecloud Marketplace
- Uniform control and quality assurance of all additional services

Growth without friction losses.

Tap into new revenue potential without overloading your organisation or IT.

- Introduction of new services without needing your own development cycles
- Additional revenue through service margins and participation models

Making complexity manageable.

Confidently manage demanding customer and partner models – even with a growing structure.

- Clear separation of end users, contracts and billing
- Flexible revenue-sharing models for locations and business partners

Operational reliability as the basis for business.

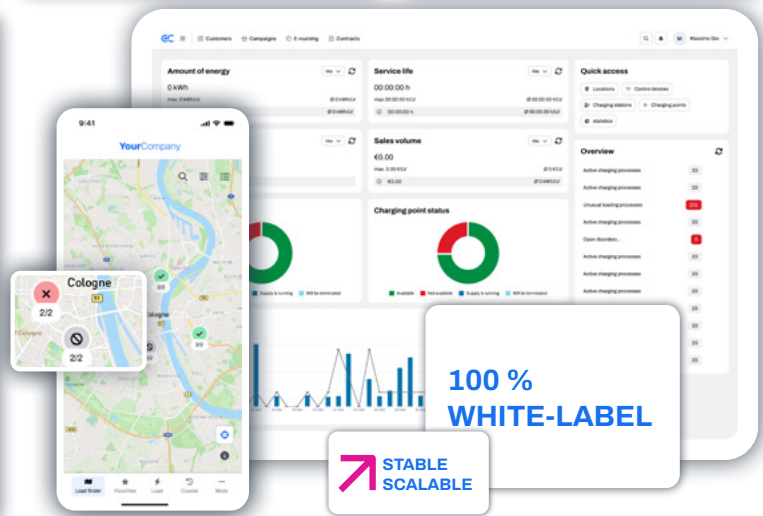

With chargecloud, you can rely on stability in your day-to-day business and reliability in your collaborations.

- Standardised support with clearly defined response times
- Transparent communication on releases and further developments

Seamless processes without system breaks.

Integrate new services and offers smoothly into your existing IT and process landscape.

- Integration into existing systems via standardised interfaces
- Proven data transfer to common accounting systems

Trust is good – compliance is better!

With chargecloud, you are always on the safe side. Thanks to European data protection and IT security, regular updates and an ISO 27001-certified partner at your side – the standard for information security, cyber security and data protection.
