

E-mobility software for wholesalers with ambition.

For secure revenue and strong projects

Retain installers, secure revenue, scale your charging business. With the chargecloud ecosystem, electrical wholesalers can tap into a business model that goes beyond pure hardware sales. Thanks to integrated revenue sharing and 100% white label capability, you can turn one-off hardware sales into ongoing revenue—all under your own branding.

At the heart of it all is the scalable chargecloud operating system (OS), which allows you to offer your electrical installers an attractive complete package: preconfigured charging stations including operation, monitoring, billing, and service. The clear partner portal and fully automated accounting ensure that you earn money on every kilowatt hour. For successful charging projects.

The right e-mobility solution for your goals.
Independent and versatile.

With heart. For reliability.

Reliable software is at the heart of every charging infrastructure. Our OS ensures stable operation, detects failures early on, and enables remote troubleshooting—without the need for on-site intervention. In combination with real-time monitoring and automated processes, this creates the basis for long-term e-mobility services and predictable revenue.

With intelligence. For flexibility.

Our modular architecture adapts flexibly to your specific market requirements. You can rely on a reliable structure with automated processes to get started and grow in the e-mobility market. And if you ever need assistance, our experienced support team is there to help.

With skill. For growth.

As a cloud-based system, our software opens up a wide range of opportunities to expand and scale your business. Thanks to open interfaces, additional services can be flexibly integrated and new revenue opportunities established: Through our partnerships, you can expand your charging offering in a targeted manner—whether with certified hardware or smart services.

AI Generated

From hardware sales to complete solutions.

Empower installers.

Installers install and operate independently, putting you at the forefront as an enabler—with your own brand on the portal and app.

Secure long-term revenue.

Receive a steady share of charging infrastructure revenue through the revenue-sharing model—long-term projects instead of one-time hardware sales.

Grow independently of manufacturers.

An operating system for different hardware providers and product ranges – remain flexible in the hardware business without being tied to a specific manufacturer.

Master complex structures.

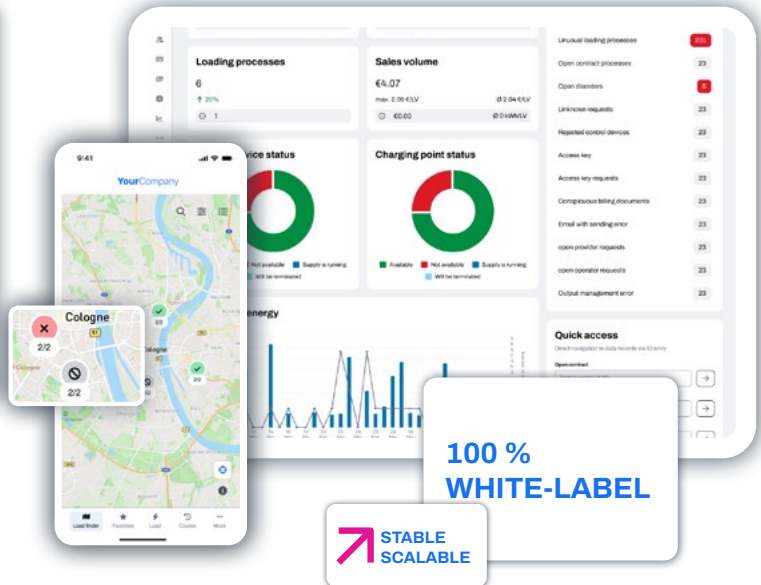

A smart system and uniform processes provide an overview despite many brands, locations, and customers – easily implement large rollouts.

Billing that runs smoothly.

Tax- and audit-compliant partner and end customer billing ensures clear document chains and minimal effort through automation.

Plan securely for the long term.

Our structure stands for stability and reliability: even with growing project volumes, your charging business remains reliably operable.

Trust is good – compliance is better!

With chargecloud, you are always on the safe side: thanks to European data protection and IT security standards, regular updates, and ISO 27001-certified operations that meet the highest requirements for information security, cybersecurity, and data protection.
