

# E-Mobility-Software: Built for Utilities. Designed for the Future.

## EV Charging on Your Terms:

The chargecloud ecosystem includes the ideal software solution for energy providers and municipal utilities with public charging networks who want to strengthen their role as EMPs and CPOs in the dynamic e-mobility market and expand their charging infrastructure. Our scalable operating system is flexible and adaptable to meet complex challenges.

Manage your charging infrastructure efficiently while keeping up with new regulatory requirements and growing customer expectations. Whether it's charge point management, efficient monitoring, a central CRM to manage your customers, or innovative partnerships via our Marketplace – chargecloud provides everything you need to implement your e-mobility strategy successfully. Reliability comes as a standard.

**The right e-mobility solution for your goals.**  
*Independent and versatile.*

### Supply Reliability

Stable and reliable 24/7 charging software ensures consistent service, boosts revenue, and builds trust with your customers.

### Audit Compliance

Compliance is especially important in the public sector to protect personal data and ensure secure billing.

### Future-Proof

Our adaptable ecosystem grows with your e-mobility business: automated processes and maximum integration capability for stable scaling.

# Secure, Scalable, Independent – The EV Charging Software for Your E-Mobility Business.

**One System.  
All Use Cases.**

Manage your entire charging infrastructure in a single operating system. From billing to monitoring – centralized and automated.

**Smart Charging.  
Smart Billing.**

Automated billing and reporting save time, reduce errors, and optimize accounting – for maximum efficiency.

**True Freedom.  
Maximum Choice.**

Hardware-independent and flexible: chargecloud offers seamless integration with over 50 charging hardware providers – without being tied to a manufacturer.

**Transparent Tariffs.  
Clear Costs.**

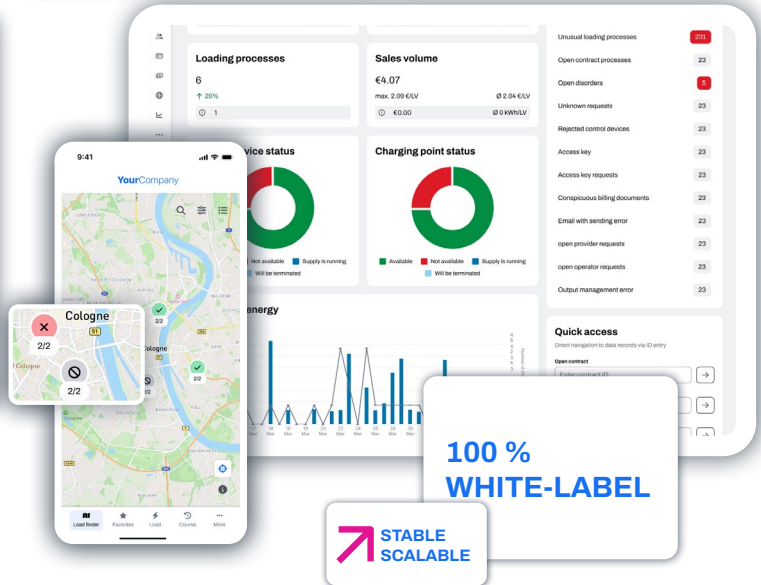

Clear user and tariff management ensures full cost transparency – for operators and drivers alike.

**For Everyone.  
Always.**

Smooth e-roaming and ad-hoc charging open your charging infrastructure to travelers and spontaneous EV drivers – without additional integrations.

**Always Available.  
Always Secure.**

Cloud-based reliability with automatic updates, audit-proof data protection, and 24/7 availability – ensuring a safe and stable operation at all times.

## Trust is good – compliance is better!

With chargecloud, you're always on the safe side. Thanks to European data protection and IT security standards, regular updates, and an ISO 27001-certified partner at your side—the standard for information security, cybersecurity, and data protection.

Software Made in Germany

ISO/IEC 27001 certified

ISO 9001 certified

DSGVO compliant

Secure TLS Encryption

ISO 14001 certified
