

# E-mobility software for your charging business.

## *Install. Activate. Start earning money.*

E-mobility offers far more than one-off charging station installations. The chargecloud ecosystem includes the ideal software solution to help you expand your business. For electrical installers, a new business model opens up—one that doesn't stop at hardware: automated workflows enable you to operate charging infrastructure yourself and generate a steady income through revenue sharing.

With our scalable Operating System, you can offer your customers charging infrastructure including operation, monitoring, and maintenance as a complete package. Manage charging stations efficiently—even without additional staff. The clear partner portal and smart automations ensure you earn money from every kilowatt-hour, whether it's a supermarket, flower shop or parking garage. The charging software takes care of it.

### The right e-mobility solution for your goals.

*Independent and versatile.*

#### With heart. For reliability.

A reliable software is the heart of every charging infrastructure. It ensures stable operation, detects failures at an early stage, and resolves issues remotely—without on-site intervention. Combined with real-time monitoring and automated processes, this creates the foundation for long-term e-mobility services and predictable revenue.

#### With intelligence. For flexibility.

Our modular architecture flexibly adapts to your specific market requirements and provides a stable foundation for entering and growing in the e-mobility market. And whenever support is needed, our experienced team is there for you reliably.

#### With skill. For growth.

As a cloud-based system, our software opens up numerous opportunities to expand and scale your business. Thanks to open interfaces, additional services can be integrated flexibly, and new revenue opportunities are established. Through our partnerships, you can strategically expand your charging offering - whether with certified hardware or smart services.

# More charging stations – less effort.

## Install once, profit long term.

### Recurring revenue from hardware installations.

Turn one-time projects into steady income streams and secure long-term revenue without additional effort.

- Offer maintenance, monitoring, and service contracts for continuous revenue
- Automated billing per charging session

### Maximum uptime through proactive maintenance.

Avoid outages and reduce on-site visits so your stations remain operational at all times.

- Real-time alerts for errors or anomalies incl. remote diagnostics
- Centrally control and automate firmware updates and configurations

### Efficient operations & software management.

Simplify the management of multiple charging stations and hardware manufacturers while minimizing errors and administrative effort.

- Centrally manage charging stations – with automated processes
- Seamless integration of new features or updates without reinstallation

### Professional, customized solutions.

Differentiate yourself with tailored offerings and provide high-quality services that strengthen your brand.

- Flexible pricing models by hour, user group, location, or additional services
- Expansion through modular design and marketplace partners

### Central management of partner locations.

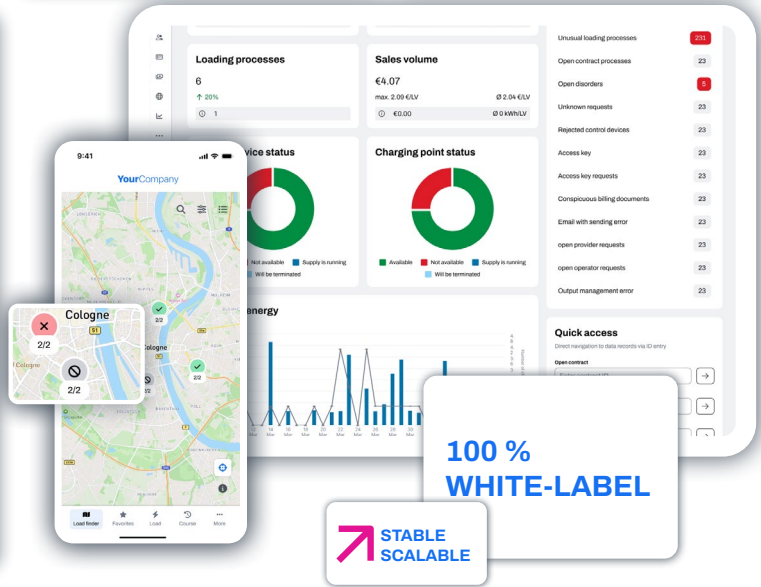

Maintain control over your partners and scale your business efficiently with transparent billing.

- Monitor and manage all partner locations centrally
- Automated, transparent billing for partner usage

### Scalable growth & flexible expansion.

Expand your charging business quickly and efficiently—new locations, partners or services can be integrated with ease.

- Centrally integrate new locations and partners and build them up in a modular way
- Flexible integration of additional services or hardware without system downtime

## Trust is good – compliance is better!

With chargecloud, you're always on the safe side. Thanks to European data protection and IT security standards, regular updates, and an ISO 27001-certified partner at your side—the standard for information security, cybersecurity, and data protection.

Software Made in Germany

ISO/IEC 27001 certified

ISO 9001 certified

DSGVO compliant

Secure TLS Encryption

ISO 14001 certified
